

RESOLUTION 771 (WRC-19)

Use of the frequency bands 37.5-42.5 GHz (space-to-Earth) and 47.2-48.9 GHz, 48.9-50.2 GHz and 50.4-51.4 GHz (Earth-to-space) by non-geostationary-satellite systems in the fixed-satellite service and 39.5-40.5 GHz (space-to-Earth) by non-geostationary-satellite systems in the mobile-satellite service

The World Radiocommunication Conference (Sharm el-Sheikh, 2019),

considering

- a)* that this conference has adopted regulatory provisions for the operation of non-geostationary-satellite (non-GSO) fixed-satellite service (FSS) systems in the frequency bands 37.5-42.5 GHz (space-to-Earth) and 47.2-48.9 GHz, 48.9-50.2 GHz and 50.4-51.4 GHz (Earth-to-space) and non-GSO mobile-satellite service (MSS) systems in the frequency bands 39.5-40.5 GHz (space-to-Earth);
- b)* that this conference has introduced a new coordination procedure associated with the use of these frequency bands by these space services;
- c)* that there are already several frequency assignments to non-GSO FSS/MSS satellite systems that have been notified or recorded in the Master International Frequency Register prior to 23 November 2019,

resolves

- 1 that frequency assignments to non-GSO networks or systems for which the complete notification information has been received by the Radiocommunication Bureau before 23 November 2019 shall be brought into use before 23 November 2022 or the end of the regulatory period set forth in No. **11.44**, whichever date comes earlier;
- 2 that frequency assignments to which *resolves* 1 applies and that are not brought into use before 23 November 2022 or the end of the regulatory period set forth in No. **11.44**, whichever date comes earlier, shall be suppressed,

instructs the Radiocommunication Bureau

to take the necessary actions to implement this Resolution.
