Brazil (country code +55)

Communication of 6.II.2013:

The *Agência Nacional de Telecomunicações* (ANATEL), Brasilia, announces that the Numbering Plan of mobile services in Brazil will be modified due to the increasing demand for new numbers.

The current format of mobile numbers is $N_8N_9N_7N_6N_5N_4N_3N_2N_1$ and the first digit which identifies this service is 9, 8, 7 or 6. However, in accordance with Resolution No. 553, issued by the Agencia Nacional de Telecomunicações (ANATEL) on 14 December 2010, there will be the inclusion of a ninth digit in mobile number length and all subscriber numbers will begin with the digit "9".

Therefore, mobile numbers will have the following format: +55 XX 9XXXX XXXX (country code + area code + subscriber number).

This change will be gradually implemented and will occur firstly in the area codes 12,13,14,15,16,17,18,19 (State of São Paulo) on 25 August 2013 and in the area codes 21, 22, 24, 27 and 28 (States of Rio de Janeiro and Espírito Santo) on 27 October 2013. ANATEL will announce in the future the date in which the other changes will take place in the other area codes of Brazil.

In addition, ANATEL would like to highlight that this format change will not be applied to mobile radio service numbers nor to fixed switched telephone numbers. Consequently, subscriber numbers for these services will remain eight digit long.

Brazil's area codes and the numbering plan for mobile and fixed services:

b) Geographic numbering

The *Ministry of Transport and Communications*, Dili, announces that the Timor-Leste has adopted the following revised numbering plan for Timor-Leste that have been used on since 28 September 2003

- The country code for Timor-Leste is +670.
- The numbering plan in Timor-Leste shall be a closed plan.
- The National Significant Number (NSN) will consist of seven (7) digits with no area code.

The country will comprise three regions with a number of sub-regions. Until such time as full geographic number portability is introduced, the regions and sub-regions will be recognizable from the numbers as follows:

Western Region

21X XXXX	Manufahi
22X XXXX	Cova Lima
23X XXXX	Bobonaro
24X XXXX	Ainaro
25X XXXX	Oekuse

Central Region

31X XXXX	Dili
32X XXXX	Dili
33X XXXX	Dili
36X XXXX	Liquica
37X XXXX	Aileu
38X XXXX	Ermera

Eastern Region

41X XXXX	Baucau
42X XXXX	Manatuto
43X XXXX	Viqueque
44X XXXX	Lautem

The international prefix will be "00" instead of "001".

To conform to the seven (7) digit subscriber number, all current local six (6) digits subscriber numbers will be extended to seven (7) digits by adding digit "3" in front of the existing subscriber numbers. No subscriber number may begin with "1", "7", "8" or "9".

c) Non-geographic numbering

The following non-geographic destination codes and number ranges are assigned in accordance with international trends:

80X XXXX	freephone and specially tariffed services (including Internet dial-up access numbers)
90X XXXX	premium rate services
70X XXXX	personal numbering
71X XXXX	voicemail
7YX XXXX	cellular mobile (Y=2, 3... as required)
79X XXXX	paging

The code 112 shall be provided as a general emergency number, but the existing emergency numbers will continue to be in service whether or not they are advertised.

Short codes in use are:

- 100 – Prepaid service PPS Recharge
- 102 – Prepaid service PPS Balance
- 112 – General emergency number
- 115 – Fire Brigade number
- 120 – Operator assistance
- 121 – Fault report
- 123 – Customer service
- 128 – Directory Enquiries
- 172 – Timor Telecom Customer Care
- 190 – TT Internal technical support (Switching)
- 197 – TT Internal technical support (Local network)

Short codes beginning with “1” which connect to information services will be moved to “800” or “900”.

In order to allow for competition by different operators on the whole territory of Timor-Leste, telecommunication operators will be allocated blocks of subscriber numbers in areas where they wish to operate. Number blocks will be a minimum of 10,000 numbers, but any operator may be allocated more than one block.

No numbers should be used for any purpose in Timor-Leste without prior allocation by the *National Communication Authority or Ministry of Transport and Communications*. The exception to this will be regarding numbers already in use, in which case a retrospective allocation will be made.

The inconvenience to subscribers associated with the introduction of the new numbering plan will be kept to a minimum by ensuring that for the first three months, old and new numbers will be used in parallel (i.e. both the old numbering system “three-digit area code + six-digit subscriber number” will remain in operation in parallel with the new numbering scheme “seven-digit subscriber number”). Thereafter the operator will take all necessary measures to ensure that subscribers experience a minimum of inconvenience.
