Identification code for basic long-distance service provider

The identification code for the basic long-distance service provider consists of two (2) digits, as follows:

Service provider identification code
Q R
Where Q ≠ 0, 1, 8 and 9; P and R ≠ 0 and 9

The service provider identification code is not part of the numbering structure and will be dialled after the prefix 00 for each international long-distance call.

Procedure for dialling international long-distance calls

00 + Q R + international number

Note:

- Q R will be used when there is more than one provider for the basic international long-distance service.

Procedure for making freephone calls

National calls

101 + 0 + mobile telephone service number

International long-distance calls

100 + 00 + Q R + international number for destination country

Use of special characters

The assignment of the special characters (asterisk * and hashtag #) to the unstructured supplementary service data (USSD), whose structure is defined as *ABC#, will be regulated by the Basic Technical National Numbering Plan.

The assignment and use of other special characters (asterisk * and hashtag #) not included in the provisions of the Basic Technical National Numbering Plan regulating USSD remain at the discretion of telephone service providers. Although the assignment and use of these special characters is not regulated, they may NOT be used in tariffed communications.

National Numbering Plan (According to Recommendation ITU-T E.129 (01/2013))

Web: www.itu.int/itu-t/inr/nnp/index.html

Administrations are requested to notify ITU about their national numbering plan changes, or to give an explanation on their webpage concerning the national numbering plan as well as their contact points, so that the information, which will be made available freely to all administrations/ROAs and service providers, can be posted on the ITU-T website.

For their numbering website, or when sending their information to ITU/TSB (e-mail: tsbtson@itu.int), administrations are kindly requested to use the format as explained in Recommendation ITU-T E.129. They are reminded that they will be responsible for the timely update of this information.

From 15.VIII.2021, the following countries/geographical areas have updated their national numbering plan on our site:

<i>Country/Geographical area</i>	<i>Country Code (CC)</i>
Azerbaijan	+994
Iran (Islamic Republic of)	+98
Malta	+356
Papua New Guinea	+675
