Communication of 26.I.2006:

The *Autorité de Régulation des Communications Electroniques et des Postes (ARCEP)*, Paris, recalls that numbers in the format +33 8 7B PQ MC DU, the purpose of which is to serve users wishing to have non-geographic interpersonal numbers on French territory, are accessible from all other countries. The destinations served by such numbers are not mobile terminals (i.e. no airtime cost is included in the total routing cost).

Such numbers will in no case be used for value-added services.

Additional information

Moreover, further to complaints by certain telephone service operators and providers in France to the effect that network operators in other countries were not routing traffic to them, it would appear helpful to publish this communication simply in order to inform all interested parties of the E.164 destination codes currently in service after the country code +33 for accessing geographic fixed or mobile service subscribers with a number in metropolitan France, as well as the equivalent codes in the French Overseas Departments.

Reminders

The numbering plan in metropolitan France is a closed plan with the following format:

CC (+33) + N(S)N (nine digits), where:

CC = country code;

N(S)N = national (significant) number; and, more specifically: +33 ZABPQMCDU.

It is customary practice in France for the sequence of digits of a national (significant) number (N(S)N) to be designated by the following letters:

1st digit: Z	4th digit: P	7th digit: C
2nd digit: A	5th digit: Q	8th digit: D
3rd digit: B	6th digit: M	9th digit: U

Destinations currently open to telephone traffic in metropolitan France

Below are lists of the possible +33 Z, +33 ZA and +33 ZAB destinations:

- 1) for the fixed telephone service (Z = 1, 2, 3, 4 or 5)
- 2) for mobile services (Z = 6)
- 3) for virtual private networks on the national territory (ZA = 85)
- 4) for non-geographic interpersonal numbers (ZA = 87, except 876).

For further details

The number blocks are described on the website of the *Autorité de Régulation des Communications Electroniques et des Postes (ARCEP)*:

<http://www.art-telecom.fr/interactive/numeros/index-d1.htm>

This brings up a page displaying either:

- an actual list of operators with the PQ digits assigned to them; their addresses may then be obtained by clicking on the "adresse" (address) link; or
- "il y a plus de 50 réponses, veuillez préciser par un chiffre supplémentaire" (there are over 50 replies, please specify further by indicating an additional digit). The sequences of values 0ZAB1, 0ZAB2, 0ZAB3, etc., should then be entered into the search engine in order to obtain the operators' names, and subsequently their addresses by clicking on the "adresse" link.

The numbering information is updated each week by the *Autorité de Régulation des Communications Electroniques et des Postes* (ARCEP). Numbers recently assigned to operators are therefore readily obtainable and can be taken into account by operators from other countries.

Remarks

Geographic numbers, non-geographic interpersonal numbers and mobile numbers are not the only types of number in the French numbering plan. The following categories also exist:

- 1) Short numbers (four digits beginning with the digit "1" or the digit "3"); barring exceptions, these are not accessible from other countries.
- 2) Non-geographic fixed service numbers (freephone or paying numbers); for these numbers, Z = 8 with A ≠ 5 and A ≠ 7. Whether or not they can be accessed from other countries is determined on a case-by-case basis through bilateral agreements between the incumbent operator and certain operators of other countries.
- 3) Special numbers comprising two or three digits that are not accessible from other countries.

In future, when changes are made to the list of Z, ZA and ZAB indicated in this communication (by the addition of new ZAB or the suppression of certain existing ZAB), the *Autorité de Régulation des Communications Electroniques et des Postes* (ARCEP) will publish a communication listing the changes.

Interpersonal numbers have likewise been allocated in the French Overseas Departments: Guadeloupe (including the French part of Saint Martin and Saint Barthélemy), French Guiana, Martinique and Réunion. They have the following formats:

Guadeloupe:	+590 876 PQ MC DU	P = 0 or 1
French Guiana:	+594 876 PQ MC DU	P = 4
Martinique:	+596 876 PQ MC DU	P = 6 or 7
Reunion:	+262 876 PQ MC DU	P = 2 or 3
