United Arab Emirates (country code +971)

Communication of 7.IX.2006:

The *Telecommunications Regulatory Authority (TRA)*, Abu Dhabi, announces that, as the statutory body responsible for the regulation and liberalisation of the telecommunications market, it has hereby taken responsibility for the National Numbering Plan (NNP) for the United Arab Emirates (UAE). As part of this change, the TRA has undertaken a review of the National Numbering Plan (NNP). This review has resulted in some changes to the plan, which are incorporated into the table as highlighted below.

The review of the National Numbering Plan (NNP) has taken into account the need to minimise the impact of any changes on the consumers within the UAE, and those calling consumers in the UAE from overseas, whilst allowing for foreseeable growth and developments in the telecommunications market. The changes will occur in accordance with the schedule of implementation for mobile services and for fixed services as directed by the TRA.

The most significant change is to the mobile sector, where a second 05X number range is being made available. In parallel, there are changes to the dialling of mobile numbers by all consumers in the UAE, whereby subscribers will have to dial the full mobile number, including the escape digit "0", for all calls regardless of the originating or destination communications provider.

NOTE: callers from overseas will not dial the escape digit "0", as per standard international dialling practice.

There are no other significant changes to the plan at this time. However, there have been minor changes intended to standardise and rationalise the plan in accordance with international best practice. The full UAE National Numbering Plan (NNP) Policy is available on the TRA website [www.tra.ae], within the Policies and Regulations section, as a PDF document.

- Numbering classification

Numbering grouping – Numbering in the National Numbering Plan (NNP) is divided into two groups: geographic and non-geographic numbers. This makes it necessary to ascertain the kind of service involved.

- Non-geographic numbers

These are numbers for which a service, user or telephone terminal is not associated with its geographic location. They comprise:

(a) Numbers commencing with digit 1 identifying various telephony services such as:

- public assistance (11X and 12X),
- operator code (13X, 14X, 145X, 16X),
- operator code for country direct service (1459 XXX),
- information and assistance of government entities or non-profit organizations (15XX),
- for commercial purposes (17XX),
- services with special rates (1-8XX XXX XXXX and 1-9XX XXX XXXX).

(b) Numbers intended for use for mobile telecommunications services and identified by the National Destination Codes (NDC) 5 and 4, or any other National Destination Code (NDC) decided by SIT. They are structured as follows:

<i>National destination code</i>	<i>Subscriber number</i>
5	ABC XXXX
National number	

<i>National destination code</i>	<i>Subscriber number</i>
4	ABC XXXX
National number	

- Geographic numbers

These are numbers intended for use for fixed telecommunication services identified by the National Destination Codes (NDC) 2, 6 and 7, depending on the geographic zone, or any other National Destination Code (NDC) decided by SIT. The following should be noted:

- Geographic areas

- Metropolitan zone: this zone is identified by the National Destination Code (NDC) 2, as follows:

<i>National destination code</i>	<i>Subscriber number</i>
2	ABC XXXX
National number	

The metropolitan zone includes the municipality of Guatemala and, partially, some municipalities of the department of Guatemala.

- Suburban metropolitan zone: this zone is identified by National Destination Code (NDC) 6, as follows:

<i>National destination code</i>	<i>Subscriber number</i>
6	ABC XXXX
National number	

The suburban metropolitan zone includes the areas of the municipalities of the department of Guatemala not included in the metropolitan zone.

- Interurban zone: this zone is identified by the National Destination Code (NDC) 7, as follows:

<i>National destination code</i>	<i>Subscriber number</i>
7	ABC XXXX
National number	

The interurban zone includes the departments of: Quetzaltenango, Huehuetenango, El Quiché, Totonicapán, Sololá, San Marcos, Retalhuleu, Sacatepéquez, Chimaltenango, Escuintla, Santa Rosa, Jutiapa, Suchitepéquez, El Petén, Izabal, Zacapa, Chiquimula, El Progreso, Jalapa, Alta Verapaz and Baja Verapaz.

- Numbering configuration

- International number

The current configuration of international numbering is specified in ITU-T Recommendation E.164. Accordingly, the international number comprises a maximum of 15 digits, of which 15 – n figures may be used for the National Numbering Plan (NNP), “n” being the number of figures corresponding to the Country Code (CC). Guatemala has been assigned country code (CC) 502. Consequently, 12 digits are available for national numbering. Thus, the format of the international number for Guatemala is as follows:

Country code	National number
502	National destination code ABC XXXX
International number	

- International access prefix

The international access prefix for users in Guatemala is “00” (automatic international long distance with prior subscription).

- National subscriber number

In accordance with ITU-T Recommendation E.164, the national subscriber number is structured as follows:

<i>NDC</i>	<i>ABC XXXX</i>
National destination code subscriber number	

The present plan recognizes geographic and non-geographic national numbers.

Numbering for mobile communications for the Maritime Sector – In conformity with the international norms established by ITU, a 9- digit “Ship Station Identification Code” is formed as follows:

M I D XXX 0 0 0, in which:

MID (Maritime Identification Digits): represents the three maritime identification digits of each country. Guatemala’s identification number is 332.

XXX: corresponds to the three identification digits of the ship flying the Republic of Guatemala’s flag; the digits range from 0 to 9, and are assigned by the authorized entity of each country.

000: are the last three digits constituting the ship station identification code.

The format for these services is:

Country code	Ship identification code
332	XXX 000

**LIST OF INTERNATIONAL SIGNALLING
POINT CODES (ISPC) (ACCORDING TO
ITU-T RECOMMENDATION Q.708 (03/1999))**

(POSITION ON 1 OCTOBER 2006)

List of International Signalling Point Codes (ISPC)

Note from TSB

1. This List of International Signalling Point Codes (ISPC) replaces the previous one published as Annex to the ITU Operational Bulletin No. 845 of 1.X.2005. Since then, a number of notifications have been received by TSB and they have been published separately in various issues of the ITU Operational Bulletin. The present list recapitulates all the different amendments that have been published up to ITU Operational Bulletin No. 869 of 1.X.2006.

2. ITU-T Recommendation Q.708 states that the assignment of signalling area/network codes (SANC) is to be administered by TSB. Each country will be responsible for the assignment of international signalling point codes (ISPC) that will then be notified to TSB.

3. The numbering plan of ITU-T Recommendation Q.708 contains 2 048 SANCs providing for 16 384 international signalling points. From these, currently 1 536 SANCs are available for assignment allowing for 12 288 international points. At present 759 SANCs are assigned; the reported utilisation is 4 187 international signalling points.

4. In order to keep the list up to date, Administrations are requested to notify TSB, by using the attached notification form, as soon as an ISPC assignment or withdrawal is made, <http://itu.int/itu-t/inr/forms/ispc.html>.

5. This List will be updated by numbered series of amendments published in ITU Operational Bulletin. Furthermore, the information contained in this Annex is also available on the ITU home page <http://www.itu.int/itu-t/bulletin>, and can be consulted by subscribers by remote access.

6. Please address any comments or any modifications concerning this List to the Director of TSB:
