GENERAL INFORMATION

Lists annexed to the ITU Operational Bulletin

Note from TSB

- A. The following Lists have been published by TSB or BR as Annexes to the ITU Operational Bulletin (OB):

OB No.

- 932 Mobile Network Code (MNC) for the international identification plan for public networks and subscriptions (According to Recommendation ITU-T E.212 (05/2008)) (Position on 15 May 2009)
- 930 List of ITU-T Recommendation E.164 assigned country codes (Complement to ITU-T Recommendation E.164 (02/2005)) (Position on 15 April 2009)
- 919 List of Issuer Identifier Numbers for the International Telecommunication Charge Card (In accordance with ITU-T Recommendation E.118 (05/2006)) (Position on 1 November 2008)
- 909 List of International Signalling Point Codes (ISPC) (According to ITU-T Recommendation Q.708 (03/99)) (Position on 1 June 2008)
- 907 List of Signalling Area/Network Codes (SANC) (Complement to ITU-T Recommendation Q.708 (03/99)) (Position on 1 May 2008)
- 905 Dialling Procedures (International prefix, national (trunk) prefix and national (significant) number) (In accordance with ITU-T Recommendation E.164 (02/2005)) (Position on 1 April 2008)
- 903 Access codes/numbers for mobile networks (According to ITU-T Recommendation E.164 (02/2005)) (Position on 1 March 2008)
- 899 List of terrestrial trunk radio mobile country codes (Complement to ITU-T Recommendation E.218 (05/2004)) (Position on 1 January 2008)
- 897 List of Mobile Country or Geographical Area Codes (Complement to ITU-T Recommendation E.212 (05/2004)) (Position on 1 December 2007)
- 883 Status of Radiocommunications between Amateur Stations of Different Countries (In accordance with optional provision No. 25.1 of the Radio Regulations) and Form of Call Signs assigned by each Administration to its Amateur and Experimental Stations (Position on 1 May 2007)
- 880 List of Names of Administration Management Domains (ADMD) (In accordance with ITU-T F.400 and X.400 series Recommendations) (Position on 15 March 2007)
- 879 List of Telegram Destination Indicators (In accordance with ITU-T Recommendation F.32 (10/1995)) (Position on 1 March 2007)
- 878 List of Telex Destination Codes (TDC) and Telex Network Identification Codes (TNIC) (Complement to ITU-T Recommendations F.69 and F.68) (Position on 15 February 2007)
- 877 List of Country or Geographical Area Codes for non-standard facilities in telematic services (Complement to ITU-T Recommendation T.35 (02/2000)) (Position on 1 February 2007)
- 876 List of Data Network Identification Codes (DNIC) (According to ITU-T Recommendation X.121 (10/2000)) (Position on 15 January 2007)
- 875 List of Data Country or Geographical Area Codes (Complement to ITU-T Recommendation X.121 (10/2000)) (Position on 1 January 2007)
- 781 Various tones used in national networks (According to ITU-T Recommendation E.180 (03/98)) (Position on 1 February 2003)
- 669 Five-letter Code Groups for the use of the International Public Telegram Service (According to ITU-T Recommendation F.1 (03/1998))

- B. The following Lists are available online from the ITU-T website:

List of ITU Carrier Codes

Approval of Recommendations ITU-T

By TSB AAP-14, it was announced that the following Recommendations ITU-T were approved, in accordance with the procedures outlined in ITU-T Recommendation A.8:

- Recommendation ITU-T G.996.2 (22/05/2009): Single-ended line testing for digital subscriber lines (DSL)
- Recommendation ITU-T M.3345 (29/05/2009): Principles for self-service management (SSM)*
- Recommendation ITU-T Y.2214 (22/05/2009): Functional model for customized multimedia ring service

* This Recommendation is in English only.

Maritime Identification Digits (MID)

In accordance with No. **19.35** of the Radio Regulations, the Maritime Identification Digit (MID) "241" has been allocated to Greece.

Assignment of Signalling Area/Network Codes (SANC) (ITU-T Recommendation Q.708 (03/99))

Note from TSB

At the request of the Administrations of Uzbekistan, the Director of TSB has assigned the following signalling area/network code (SANC) for use in the international part of the signalling system No. 7 network of this country/geographical area, in accordance with ITU-T Recommendation Q.708 (03/99):

<i>Country/geographical area or signalling network</i>	<i>SANC</i>
Uzbekistan (Republic of)	4-165

SANC: Signalling Area/Network Code.
Code de zone/réseau sémaphore (CZRS).
Código de zona/red de señalización (CZRS).

El Salvador (country code +503)

Communication of 18.V.2009:

The *Superintendencia General de Electricidad y Telecomunicaciones de El Salvador (SIGET)*, San Salvador, presents its updated National Numbering Plan (NNP), in force since 14 May 2005 in El Salvador.

- General description

The numbering plan for the Republic of El Salvador uses the following numbering structure:

- for services provided via eight (8) digit access networks including the National Destination Code (NDC),
- freephone numbers and premium rate numbers use seven (7) and eight (8) digits.

- National numbering structure and allocation of digits

The number of digits used to identify the fixed or mobile subscriber terminal is eight (8) for any part of the country, using the structure (NDC) XYZ-MCDU, where:

<i>NDC</i>	<i>X</i>	<i>Y</i>	<i>Z</i>	<i>M</i>	<i>C</i>	<i>D</i>	<i>U</i>
National Destination Code	Millions	Hundreds of thousands	Tens of thousands	Thousands	Hundreds	Tens	Units

- Allocation of the National Destination Code (NDC) in fixed and mobile networks

<i>National Destination Code (NDC)</i>	<i>Type of network</i>
2	Fixed
7	Mobile

- Numbering for national fixed telephony

For the purposes of numbering allocation for fixed telephony, El Salvador has been divided into four geographic areas: Western, Central, Eastern and Metropolitan.

Allocation of digit X within the structure of eight-digit numbers (NDC) XYZ-MCDU for the fixed telephony service:

<i>Digit X</i>	<i>Use within the structure (2) XYZ-MCDU</i>
0	Not used in this structure – reserved for future use.
1	For future use in the Metropolitan area.
2 and 5	Used for identifying the fixed telephony service in any locality within the Metropolitan area known as “Gran San Salvador”.
3	Used for identifying the fixed telephony service in any locality within the Central area.
4	Used for identifying the fixed telephony service in any locality within the Western area.
6	Used for identifying the fixed telephony service in any locality within the Eastern area.
7	For future use in the Eastern area.
8	For future use in the Western area.
9	For future use in the Central area.

- Numbering for mobile telephony

Allocation of digit X within the structure of eight-digit numbers (NDC) XYZ-MCDU for the mobile telephony service:

<i>Structure (7) XYZ-MCDU</i>	<i>Digit X</i>									
Mobiles	0	1	2	3	4	5	6	7	8	9

- International numbering with automatic dialling and length of number

Recommendation ITU-T E.164 provides that the maximum number of digits for subscribers in the automatic international service should be 15, excluding the international prefix.

In the interests of harmonizing and facilitating the use of dialling structures within the region vis-à-vis the rest of the world, El Salvador has adopted the prefix "00" for the automatic international service, in line with Recommendation ITU-T E.164, number 11, relating to the use of international prefixes and codes.

In El Salvador, the 15 digits do not include: two digits from the international prefix and three digits from the multicarrier system code; in other words, telephone exchanges must analyse a minimum of 20 digits. To this end, the owner of the destination telephone exchange must ensure that its equipment is capable of processing the said number of digits in a single segment or, failing that, and by agreement between the parties, in a number of segments.

<i>Digit X</i>	<i>Use in the structure XYZ</i>
0, 2, 3, 4, 5, 6, 7, 8	Not used in this structure.
1	a) Used for the selection keys of the multicarrier system. b) Used in special services for : <ul style="list-style-type: none"> - government institutions; - assistance to the population in cases of emergency or criminal acts; - humanitarian aid; - temporary arrangements to meet community needs;¹ - operators' own internal services, and c) Future services to be determined by SIGET.
9	Special services used by government institutions, where Y = 1.

¹ Emergencies caused by natural phenomena, public disaster situations, coordination efforts for humanitarian purposes, major national or regional events, and any unforeseen and duly acknowledged situations, calling for telephone access by means of a short number. Such numbers shall be assigned for a maximum period of three months, with any request for an extension to be assessed by SIGET.

Further information on El Salvador's numbering plan may be found at:

**National Numbering Plan
(According to ITU-T Recommendation E.129 (09/2002))**

<http://www.itu.int/itu-t/inr/np/index.html>

Administrations are requested to notify ITU about their national numbering plan changes, or to give an explanation on their webpage concerning the national numbering plan as well as their contact points, so that the information, which will be made available freely to all administrations/ ROAs and service providers, can be posted on the ITU-T website.

For their numbering website, or when sending their information to ITU/TSB (e-mail: tsbtson@itu.int), administrations are kindly requested to use the format as explained in ITU-T Recommendation E.129. They are reminded that they will be responsible for the timely update of this information.

From 15.V.2009 to 31.V.2009, the following countries have updated their national numbering plan on our site:

<i>Country</i>	<i>Country code (CC)</i>
Kuwait	+965
Lebanon	+961
Liberia	+231
Nauru	+674
Poland	+48
Solomon Islands	+677
Sudan	+249
