

## Standards for Vehicle Gateway

HyunJeong Yun

SoYeon Lee

Telematics Research Group, ETRI

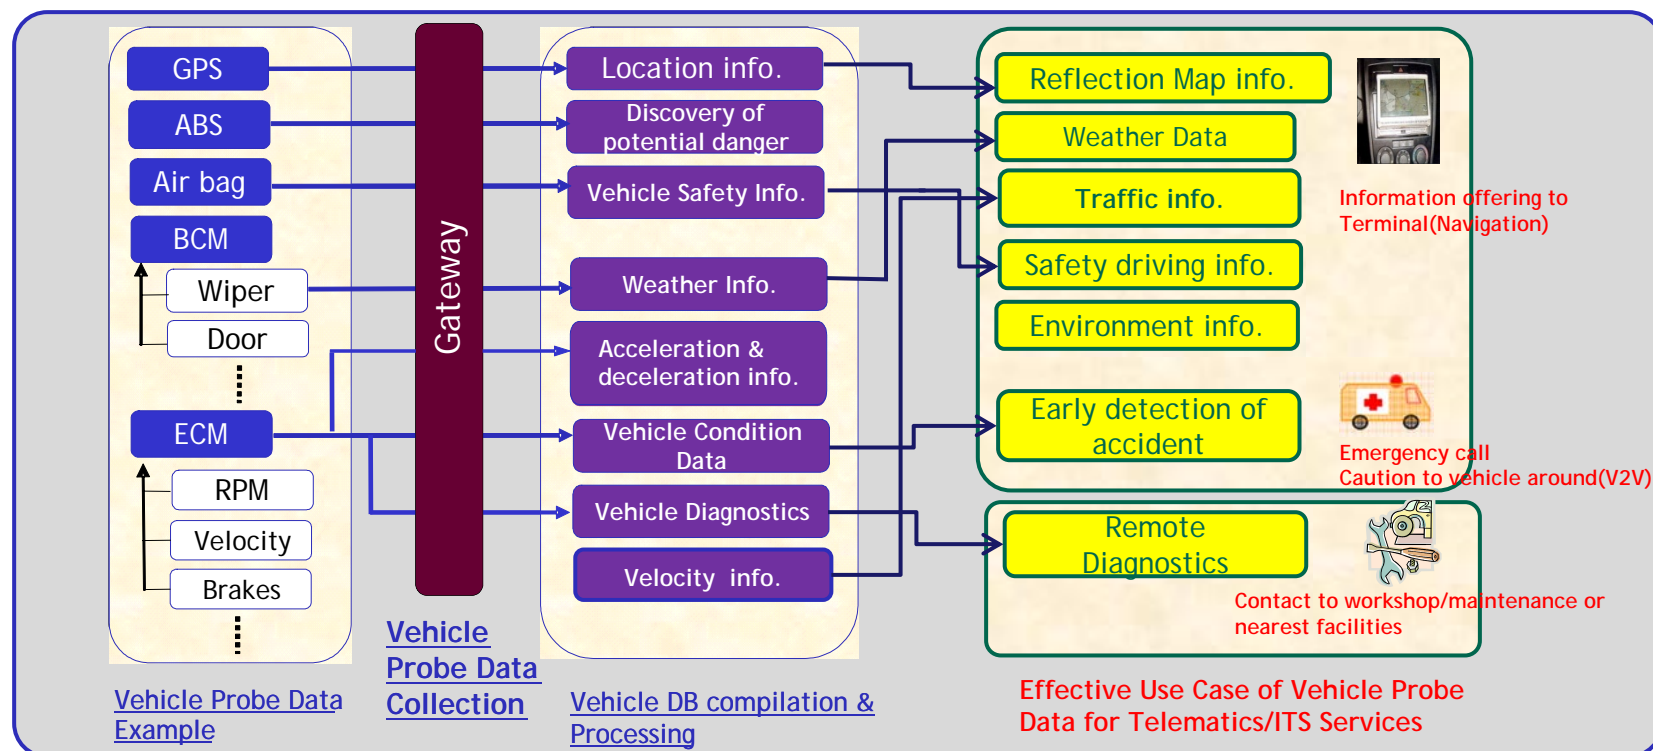

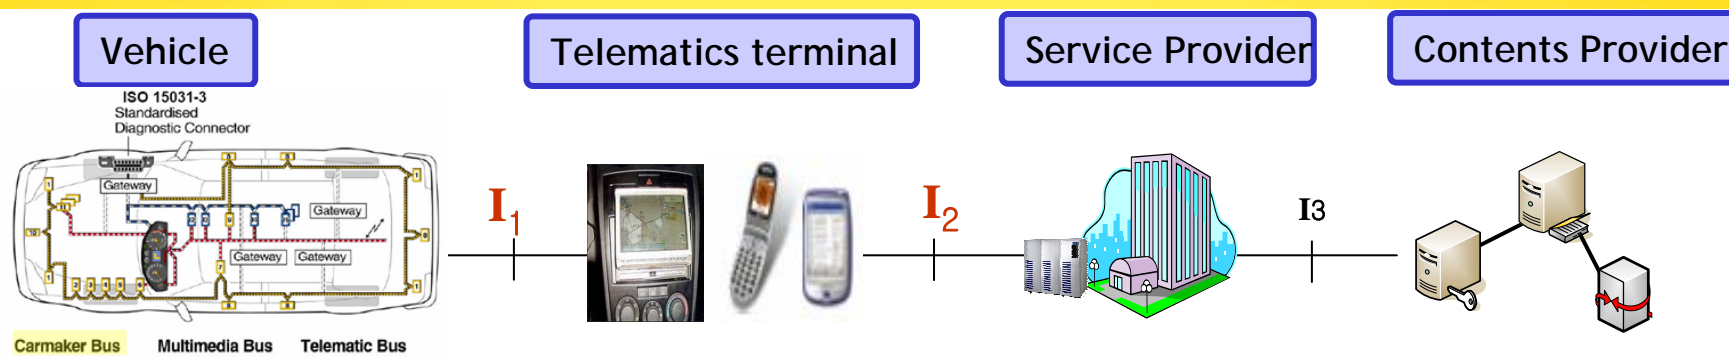

Geneva, 5-7 March 2008

- Vehicle Gateway for Telematics/ITS Services
- Standards for Vehicle Gateway
  - NM Gateway AUTOSAR
  - OSGi Vehicle Interface
  - Vehicle Gateway AMI-C (ISO 22902)
  - M-VCI (ISO 22900)
  - Car gateway for V2I(MYCAREVENT)
- Conclusions and outlooks

# Vehicle Gateway for Telematics/ITS Services

3

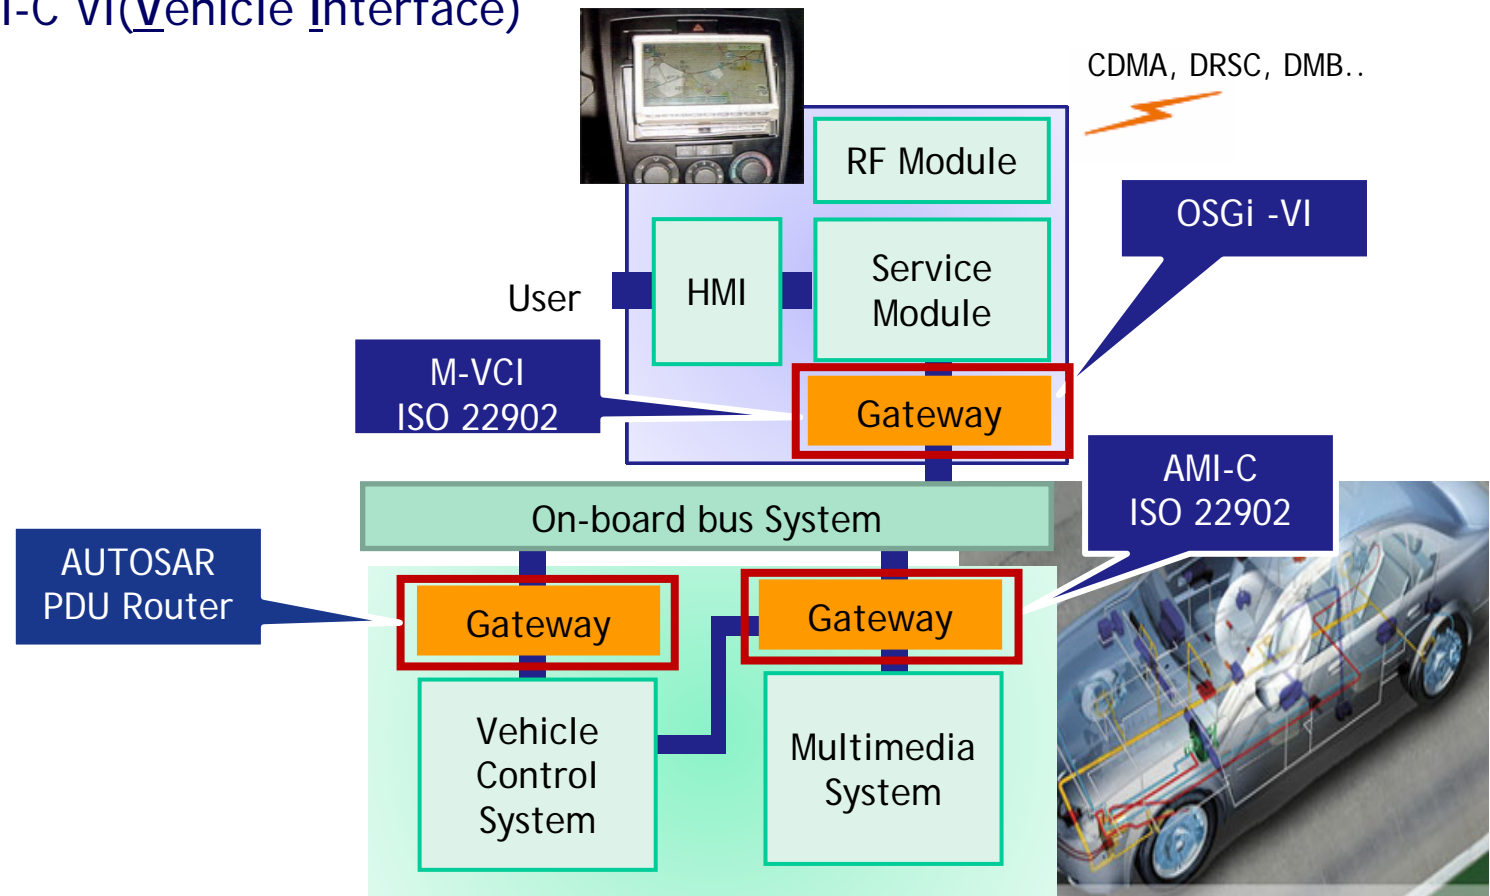

The Fully Networked Car  
Geneva, 5-7 March 2008

# Standards for Vehicle Gateway

4

- o AUTOSAR : PDU Router/Signal Gateway for CAN, LIN, FlexRay Interfaces
- o OSGi -VI : Vehicle Interface for Telematics Service Platform
- o ISO 22902 : Modular Vehicle Communication Interface
- o ISO 22900 : AMI-C VI(Vehicle Interface)

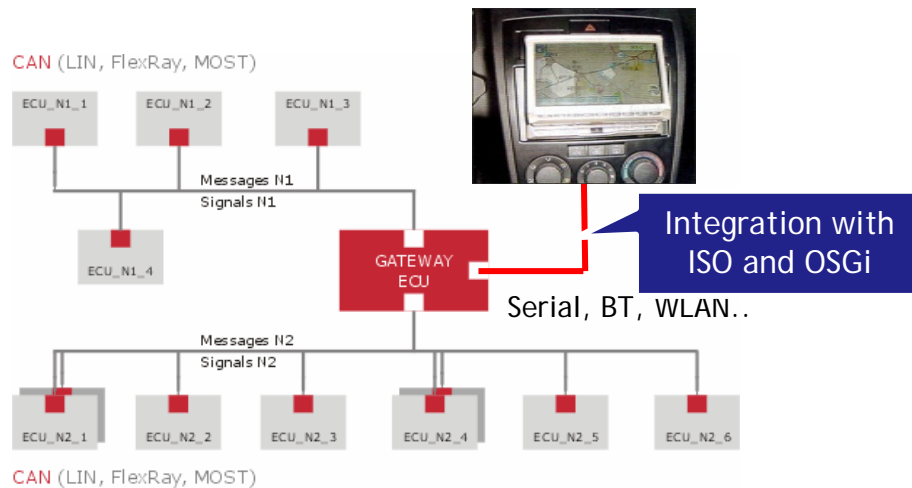

The Fully Networked Car  
Geneva, 5-7 March 2008

# NM Gateway in AUTOSAR

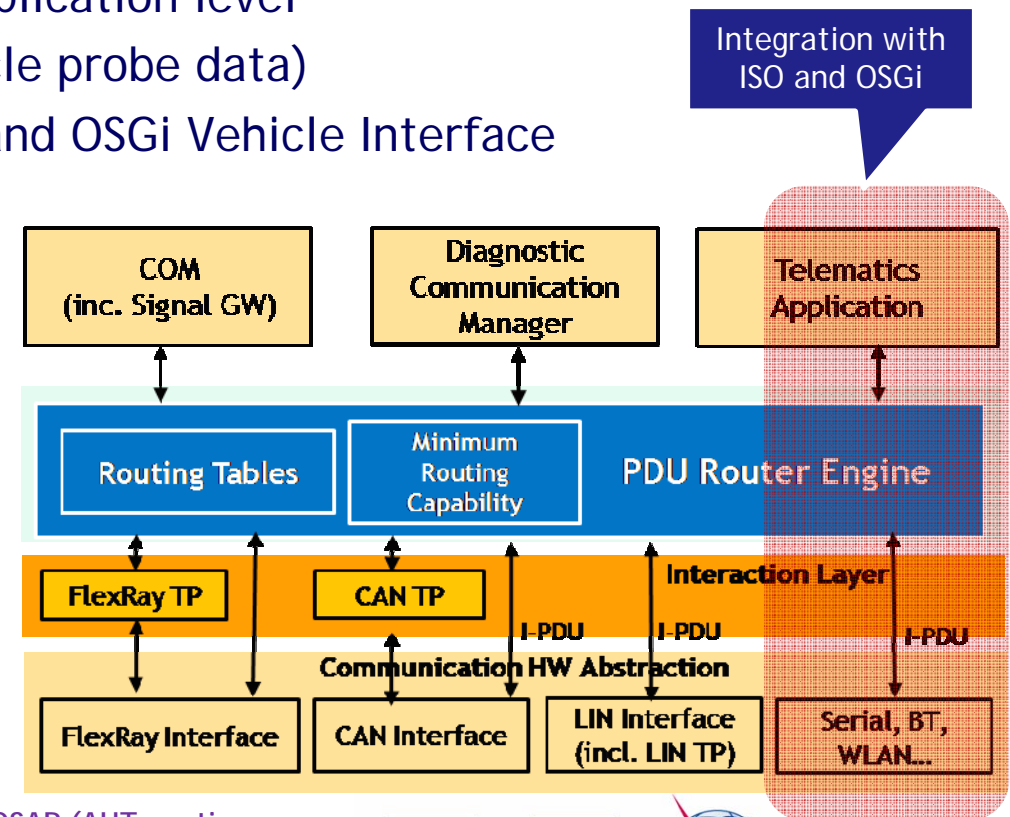

5

- o AUTOSAR Network Management Gateway Functionality
  - Frame-based Gateway (PDU Router)
  - Signal-based Gateway (COM)
- o AUTOSAR Phase II (2007~2009)
  - Interface standardization on application level
  - Telematics API (collecting vehicle probe data)
  - Integration with ISO standards and OSGi Vehicle Interface

The Fully Networked Car  
Geneva, 5-7 March 2008

# Vehicle Interface in AMI-C

6

- ISO 22902 AMI-C Architecture
  - Application View : how to provide the standard interface to Apps
  - Structure View : vehicle interface, network, host
  - Functional View : service discovery, system management, security, HMI
- Vehicle Interface(Gateway)
  - Translate Apps request into appropriate messages or protocols

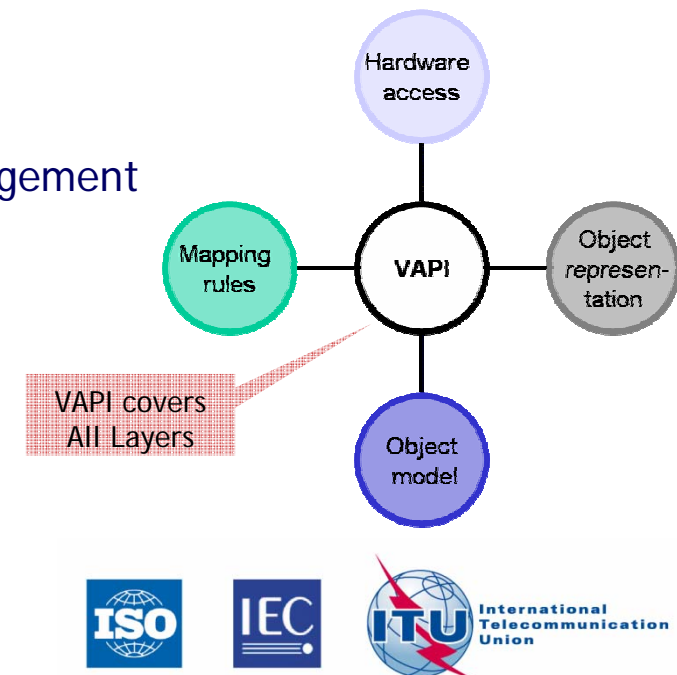

The Fully Networked Car  
Geneva, 5-7 March 2008

Source : ISO 22902 AMI-C

- o OSGi Technology is Universal Middle
- o OSGi Vehicle Expert Group
  - Goal :
    - Provide the technical foundation for projects like VII, GST ..
    - Create a business model for service providers, aggregators, and OEMS
  - Major Issues
    - “Off-board” Diagnostics (need vehicle bus type abstraction)
    - Vehicle Interface(VAPI : Vehicle API)
    - Navigation APIs
    - Integration with AUTOSAR defined system
    - Communication Manager for mobile session management

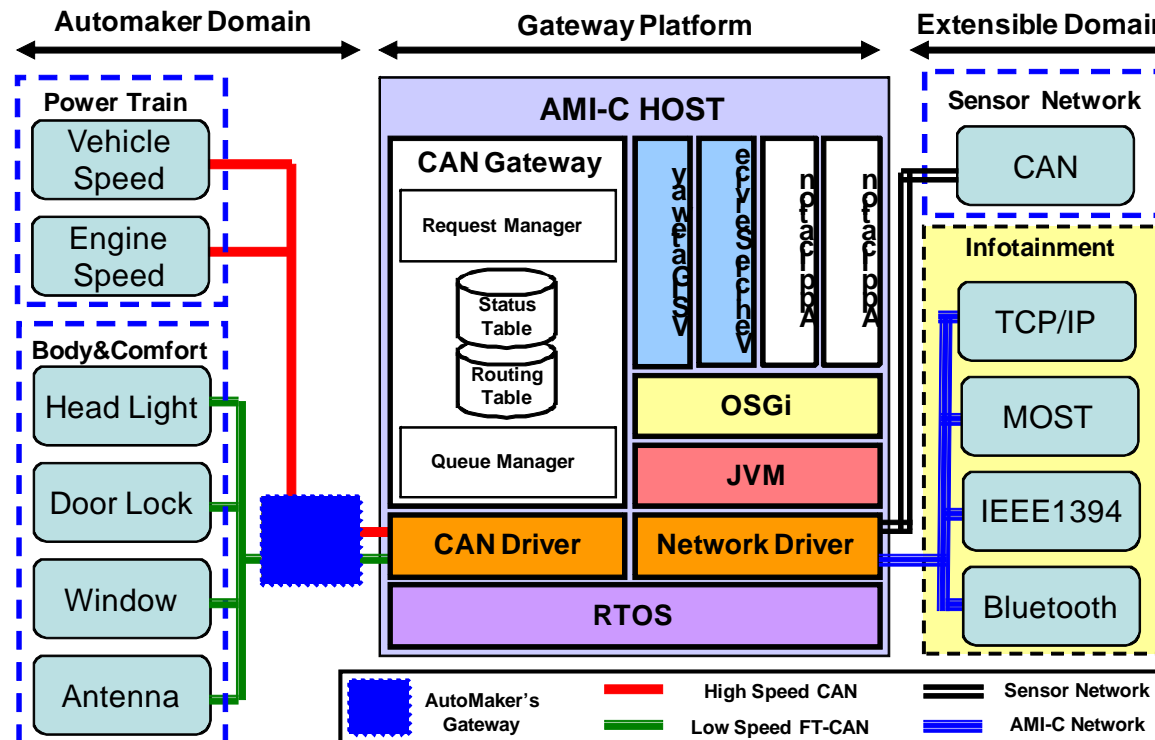

# Vehicle Sensor Gateway Platform

8

## o Vehicle Sensor Gateway

- Based on AMI-C HOST platform
- In-vehicle CAN gateway for Interworking with AMI-C Vehicle Interface
- Adding the Sensor Network (via CAN bus)

Geneva, 5-7 March 2008

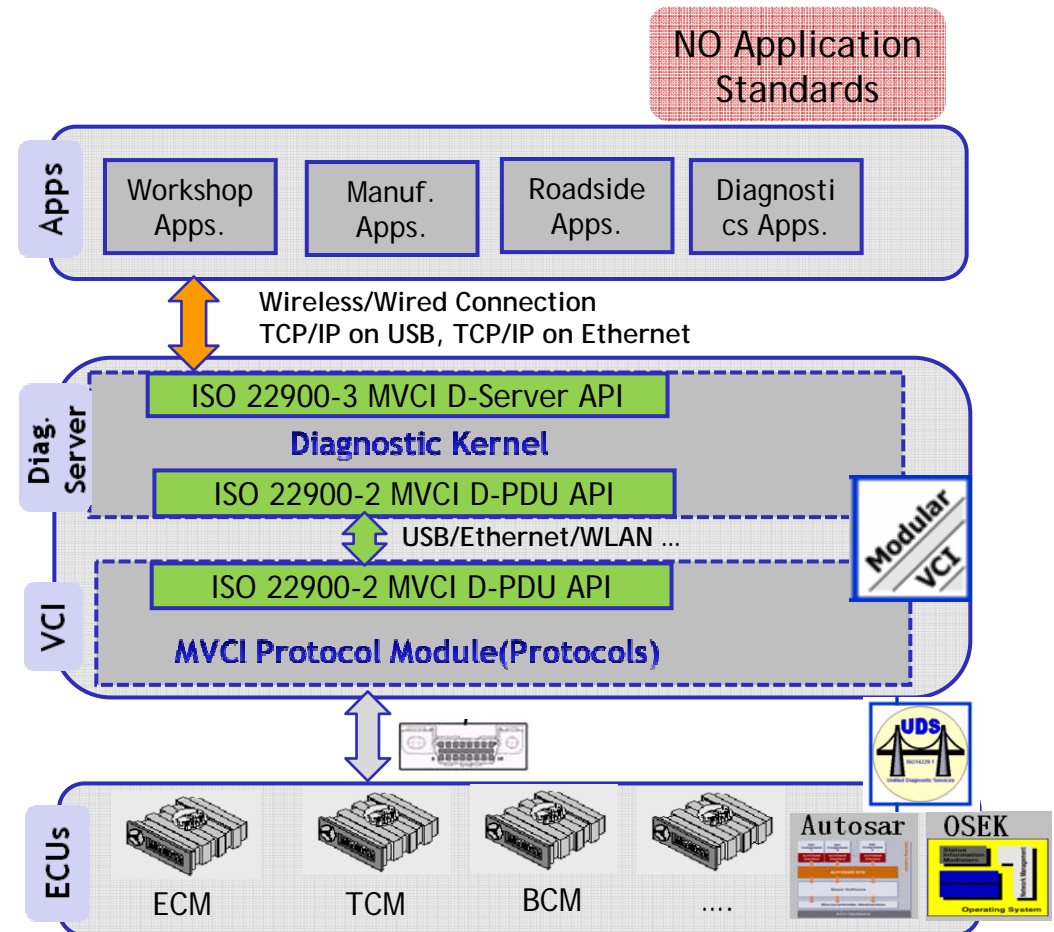

# M-VCI for Vehicle Diagnostics

9

- o Modular Vehicle Communication Interface (ISO 22900)
- o Motivation
  - Non standardized diagnostic connector in vehicles
- o MVCI HW
  - Using by All vehicle manuf. for service outlets and aftermarket
- o MVCI SW
  - Standardized APIs to support manufacturer specific service diagnostic applications
- o Next Steps
  - Standardized Application APIs for Telematics, Logistics and so on.

Geneva, 5-7 March 2008

# Car Gateway for V2I

10

- o MYCAREVENT for optimizing the European market for automotive services and repair.
- o Central Communication Device for managing in-vehicle, inter-vehicle, vehicle-to-infrastructure communication
- o Integrated Car gateway with in-vehicle network for collecting and transmitting probe data

The Fully Networked Car  
Geneva, 5-7 March 2008

Source : MYCAREVENT Project  
Mobility and Collaborative work  
in European Vehicle Emergency  
Networks

- Telematics/ITS Services need standards framework for collecting vehicle probe data
- Standards for vehicle gateway or vehicle interface
  - NM Gateway AUTOSAR
  - OSGi Vehicle Interface
  - Vehicle Gateway AMI-C (ISO 22902)
  - M-VCI (ISO 22900)
- Challenges for Telematics based vehicle probe data
  - Will OEMs open the OBE open up to third party applications ?
  - Need Integrated Standards for Vehicle Interface or Vehicle Gateway

# Thank you for attention !
