TR-48 Vehicular Telematics Engineering Committee

August 24, 2011

Update on ITS Related Activities

- ITS, Intelligent Transport Systems, has been an area members of TR-48 shown interests on.
 - The group used to follow the ITS work through ISO TC 204 activities.
- With the development on US ITS, the interest on ITS has been rekindled in TR-48.
- In preparation of re-engaging the work, Telcordia (Kevin Lu, former Chair of TR-48) presented an introduction of the US ITS work and the standards related to ITS in June meeting (June 25, 2011).
 - We will have a follow-up presentation on introduction to "Vehicle-to-Vehicle Communications" in August meeting (August 25, 2011).
- One area of interests is to link Commercial Mobile Services (CMS) and other accesses, such as BlueTooth, with ITS as auxiliary accesses for non-emergency services.
- The objective is to start a Project on ITS in 2012.
