

# New Journal Initiative: Journal on Standardization

# Background

- Standardization is essential for our society as well as economy from usage to communication between different devices, i.e. interoperability
- Standardization gives choice and reduces cost of the products
- Standards make technology or create path for technologies to be available globally
- As standards / standardization is essential part of human society, it is essential for people to understand standards and all aspects related to it

# Aim and Scope

- Aim:
  - The aim of this journal is to publish standardized as well as related work making “standards” accessible to a wide public – from practitioners to new comers.
  - The journal aims at publishing in-depth as well as overview work including papers discussing standardization process and those helping new comers to understand how standards work.
- Scope:
  - Bring up-to-date information regarding standardization in the field of Information and Communication Technology (ICT) covering all protocol layers and technologies in the field

# Objective

- Bring papers on de-jure as well as de-facto standards to the readers
- Cover pre-development, including technologies with potential of becoming a standard, as well as developed / deployed standards
- Publish on-going work with potential of becoming a standard technology
- Publish papers giving explanation of standardization process
- Publish tutorial type papers giving new comers a understanding of standardization

# Frequency of Publication

- Current plan is to start with 3 issues per year
