

Innovations for Digital Inclusion

Technically co-sponsored by the IEEE Communications Society

31 August–1 September 2009, Mar del Plata, Argentina

Fourth Call for Papers

Innovations for Digital Inclusion is the second in a series of peer-reviewed academic conferences that aims at increasing the dialogue between experts working on the standardization of information and communication technologies (ICTs) and academia. By viewing technologies through a *Kaleidoscope*, these forward-looking events will also seek to identify new topics for standardization.

No industry undergoes faster changes than the ICT industry. With this in mind, how will ICT standardization promote digital inclusion? Innovative technologies can turn the “digital divide” into a “digital opportunity” bringing the benefit of ICTs to all segments of the population, in particular those in underserved communities and developing countries.

Future applications and services have the potential to build the ubiquitous society, and the infrastructure is central in achieving digital inclusion. This will enable universal, sustainable, ubiquitous and affordable access to ICTs by all. This Kaleidoscope event is calling for original academic papers offering innovative approaches addressing this challenge.

Background

The World Summit on the Information Society (WSIS), Geneva 2003 – Tunis 2005, committed to turning the digital divide into digital opportunity and declared a “...commitment to build a people-centred, inclusive and development-oriented Information Society, where everyone can create, access, utilize and share information and knowledge, enabling individuals, communities and peoples to achieve their full potential...”.

Since ITU is committed to connecting the world, the Telecommunication Standardization Sector has chosen digital inclusion as the theme for this Kaleidoscope event.

Audience

Innovations for Digital Inclusion is targeted at all researchers, academics, students, engineers, regulators and thinkers who look into the future.

Date and venue

31 August – 1 September 2009, Mar del Plata, Argentina.

Submission of papers

Prospective authors are invited to submit complete, original papers with a maximum length of 4500 words within eight pages, including summary and references, using the template on the event website. All papers will be reviewed through a double-blind, peer-review process and handled electronically; see www.itu.int/ITU-T/uni/kaleidoscope/2009 for the online submission (EDAS). The main themes are suggested in the list of topics. The deadlines for paper submission are highlighted below.

Deadlines

Submission of full paper proposals: *1 February 2009* *extended*

Notification of paper acceptance: *1 May 2009* *extended*

Submission of camera-ready accepted papers: *15 May 2009*

Publication and presentation

Accepted papers will be presented during the event, published in the proceedings and made available through the IEEE Xplore. The best papers will be invited for evaluation for potential publication in the IEEE Communications Magazine.

Awards

Awards of USD 5k, 3k and 2k will be granted to selected best papers, as judged by the organizing and programme committees. In addition, authors presenting accepted papers who have not yet received a PhD title will also receive a young author recognition certificate.

General Chair

Yoichi Maeda (ITU-T; NTT, Japan)

Organizing Committee

Tohru Asami (University of Tokyo, JP)
Jim Carlo (IEEE ComSoc, US)
Yoshikazu Ikeda (Otani University, JP)
Kai Jakobs (RWTH Aachen University, DE)
Chae-Sub Lee (ITU-T; ETRI, KR)
Mitsuji Matsumoto (Waseda University, JP)
Yushi Naito (ITU-T Mitsubishi Electric Corp., JP)
Helmut Schink (ITU-T, Nokia Siemens, DE)
Mostafa Hashem Sherif (AT&T, US)
María Victoria Sukeñik (Secretaría de Comunicaciones, AR)
Alfredo Terzoli (Rhodes University, ZA)
John Visser (ITU-T; Nortel, CA)

Programme Committee

Chairman: Mostafa Hashem Sherif (AT&T, US)
V.Chair-Tk 1: Helmut Schink (ITU-T, Nokia Siemens, DE)
V.Chair-Tk 2: Alfredo Terzoli (Rhodes University, ZA)
V.Chair-Tk 3: Kai Jakobs (RWTH Aachen University, DE)
Rui Aguiar (Universidade de Aveiro, PT)
Eyhab Al-Masri (University of Guelph, CA)
Tohru Asami (University of Tokyo, JP)
Albert Banchs (Univ. Carlos III of Madrid, ES)
Benjamín Barán (Universidad Nacional de Asunción, PY)
Abbie Barbir (Nortel, CA)
Nestor Becerra Yoma (Universidad de Chile, CL)
Knut Bliind (Fraunhofer ISI; TU Berlin, DE)
Dario Botazzi (University of Bologna, IT)
Michael Bove, Jr. (MIT, US)
Marco Carugi (ITU-T, Nortel, FR)
Vicente Casares Giner (Universitat Politècnica de València, ES)
Piero Castoldi (Scuola Superiore Sant'Anna, IT)
Lyman Chapin (Interisle Consulting Group, LLC, US)
Jun-kyun Choi (Info. and Comms. University, KR)
Seong-gon Choi (Chungbuk National University, KR)
Ernesto Ciaramela (Scuola Superiore Sant'Anna, IT)
Antonio Corradi (University of Bologna, IT)
Noel Crespi (GET-INT, FR)
Amilton da Costa Lamas (CPqD, BR)
Marcelo Sampaio de Alencar (Universidade Federal de Campinha Grande, BR)

Organized by:

Marc De Leenheer (Ghent University, BE)
 Giancarlo De Marchis (Tiscali, IT)
 Mahmoud El-Hadidi (Cairo University, EG)
 Khalil El-Khatib (UOIT, CA)
 Tineke M. Egyedi (TU Delft, NL)
 Luca Foschini (University of Bologna, IT)
 Eduardo Gabelloni (UADE, AR)
 Ranjan Gangopadhyay (Indian Institute of Technology, IN)
 Wen Gao (Peking University, CN)
 Carlo Giannelli (University of Bologna, IT)
 Danielo Gomes (Federal University of Ceará (UFC), BR)
 Anahita Gouya (INT, FR)
 Adam Grzech (Politechnika Wroclawska, PL)
 Chris Guy (University of Reading, UK)
 Guenter Haring (University of Vienna, AT)
 Yukio Hiramatsu (Osaka Institute of Technology, JP)
 Doan Hoang (University of Technology, AU)
 Yoshikazu Ikeda (Otani University, JP)
 Emmanuel Jaffrot (Universidad Nacional de S. Martin, AR)
 T. Jayawardena (AT&T, US)
 Carlos Juiz (University of the Balearic Islands, ES)
 Tim Kelly (World Bank, US)
 Nargis Khujanazarova (Tashkent University, UZ)
 Wolfgang Kleinwachter (Aarhus University, DK)
 Masafumi Koga (Oita-University, JP)
 Andrej Kos (University of Ljubljana, SI)
 Ken Krechmer (University of Colorado at Boulder, US)
 Rubén Kustra (ITBA, AR)
 Claude Lamblin (France Telecom, FR)
 Olivier Le Grand (France Telecom, FR)
 Leo Lehmann (OFCOM, CH)
 José G. López Perafán (University of Cauca, CO)
 Lorne Mason (McGill University, CA)
 Thomas Magedanz (TU Berlin / FhG FOKUS, DE)
 Lorne Mason (McGill University, CA)
 Mitsuji Matsumoto (Waseda University, JP)
 Werner Mohr (Nokia-Siemens, DE)
 Edson Moschim (UNICAMP, BR)
 José Neuman de Souza (Federal University of Ceará, BR)
 Sergio Ochoa (University of Chile, CL)
 Máirtín O'Droma (University of Limerick, IR)
 Fumitaka Ono (Tokyo Polytechnic University, JP)
 Piotr Pacyna (Akademia Górniczo-Hutnicza, PL)
 Yong-Jin Park (Hanyang University, KR)
 Louis Pouzin (Eurrolinc, FR)
 Ramjee Prasad (Aalborg University, DK)
 Pierre-André Probst (ITU-T, OFCOM, CH)
 Ramón Puigjaner (Universitat de les Illes Balears, ES)
 Peter Radford (LogicaCMG, UK)
 Humberto Ribeiro (FUCAPI, BR)
 Anna Riccioni (Università degli Studi di Bologna, IT)
 Jungwoo Ryoo (Pennsylvania State University, US)
 Felipe Rudge (UNICAMP, BR)
 Anthony Rutkowski (Verizon, US)
 Tarek Saadawi (City University of New York, US)
 Susana Sargento (Universidade de Aveiro, PT)
 Ulrich Schoen (Nokia, DE)
 Kenzo Takahashi (University of Fukui, JP)
 Klaus Turowski (University Augsburg, DE)
 Hiromi Ueda (Tokyo University of Technology, JP)
 Yoshiyori Urano (Waseda University, JP)
 Luca Valcarenghi (Scuola Superiore Sant'Anna, IT)
 José L. Vázquez González (Universidad de las Américas, MX)
 Jari Veijalainen (University of Jyväskylä, FI)
 Fábio Violaro (Universidade Estadual de Campinas, BR)
 Klaus Wehrle (RWTH Aachen University, DE)
 Rudi Westerveld (TU Delft, NL)
 Wilson Yamaguti (National Institute for Space Research, BR)
 Rachid Zagrouba (ENST Bretagne, FR)
 Ahmad Zaki (Universiti Teknologi Malaysia, MY)

Keywords

Access, accessibility, applications, behaviour and life style changes, climate neutrality, connecting the world, digital divide, digital inclusion, economics of standardization, energy savings, fixed-mobile

Technically co-sponsored by:

Supported by:

Organized by:

convergence, ICTs and climate change, ICTs and food security, ICTs and global greenhouse gas (GHG) emissions, information and communication technologies (ICT), innovative technologies, Internet Protocol (IP), Internet, interoperability, IPTV, marginalized communities, mitigation of climate change, mobility, multilingualism, multimedia, network infrastructure, next-generation networks (NGN) and beyond, object to object communication, Quality of Service (QoS), security, standardization research, services, telecommunication, ubiquitous sensor networks (USN), ubiquitous societies, virtual communities, voice over IP.

For additional information

Additional information can be found at the event website:

www.itu.int/ITU-T/uni/kaleidoscope/2009

Inquiries should be addressed to kaleidoscope@itu.int

Suggested (non-exclusive) list of topics

Track 1: Architecture evolution to foster digital inclusion

- Evolution of NGN architecture to achieve digital inclusion
- Open-service interfaces, service interaction and interoperability in future scenarios
- Interworking of advanced services between legacy networks and NGN
- Seamless handover, multihoming and mobility
- Converged multimedia emergency communications
- Future packet-based, ultra-high-speed transport networks
- Advanced network security, network identification, biometrics, localization techniques and USN
- Digital rights management
- NGN and the next-generation Internet

Track 2: Applications and services in the inclusive ubiquitous society

- Enhancing telecoms accessibility for all
- Broadcasting, multicasting, unicasting and peer-to-peer in NGN: IPTV, interactive TV, mobile TV, and others
- Guaranteed QoS in end-to-end, inter-provider real-time multimedia services
- Innovative multimedia applications and content delivery using all-IP converged fixed/mobile
- Future virtual communities and social networking services
- New programming models and service creation
- Creative combinations of web and network services
- Services and experiences using location, presence, context awareness and personalization
- Advanced smart terminals
- NGN-enabled public services, e.g. telemedicine and distance learning
- ICT recycling and waste reduction

Track 3: Social, economic and policy issues to achieve digital inclusion

- How to turn the digital divide into digital opportunity
- ICTs as an enabling technology to mitigate climate change in all sectors
- New ICT technologies and their impact on GHG emissions in the sector
- Evolution of legislative and regulatory frameworks towards inclusive converged networks
- Security and ubiquity: what's the right balance?
- NGN standardization: stifling or encouraging innovation?
- Business models for the information society (including accounting, billing and charging)
- Analysis of NGN standardization processes
- Economics of NGN standardization
- Societal impact of NGN and of virtual, collaborative environments
