

RECOMMENDATION ITU-R SM.1047

NATIONAL SPECTRUM MANAGEMENT

(Question ITU-R 68/1 and Decision ITU-R 118)

(1994)

The ITU Radiocommunication Assembly,

considering

- a) that effective spectrum management is essential to maximizing the benefits drawn from the spectrum resource;
- b) that due to the growing demands on the radio-frequency spectrum, there is a need to improve spectrum management;
- c) that material is needed to assist spectrum managers in the development and implementation of effective national spectrum management systems,

recommends

1. that the Handbook on National Spectrum Management be used as a guide for developing national spectrum management programs in the following areas:
 - spectrum management fundamentals,
 - spectrum planning,
 - spectrum engineering practices,
 - frequency authorization,
 - spectrum use (including spectrum efficiency),
 - spectrum control (inspection and monitoring),
 - automation of spectrum management;
 2. that the Handbook on Spectrum Monitoring and the future Handbook on Computer-Aided Techniques for Spectrum Management be used as guides where more detailed information is required with respect to those two subjects.
-
