

# **Universities Of The Future**

At a time when technology, mobility & affordability are changing the way we live life, the world's **colleges and universities** are facing a **changed landscape**

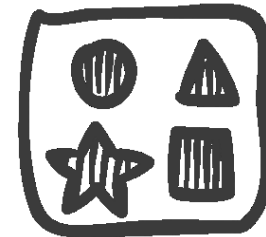

**Technology is omnipresent**

Millennials have abundant access to information and services enabled through technology

**Role of Faculty**

Academic fraternity will need to increasingly evolve into mentoring & knowledge integration roles

**Play. Work. Learn.**

Learning will become more engaging & increasingly focused on adoption of skills through learning by doing

# Employability Focus

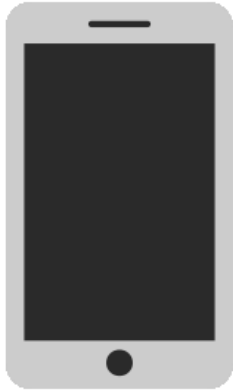

**TECHNOLOGY ENABLED  
ASSESSMENT &  
PERSONALIZED LEARNING  
PLATFORM**

# Imagine Your Personal Trainer

iAugmentor is an **assessment** based learning platform which will **determine the learning roadmap** of the learner according to his performance in the assessments

# iAugmentor's **USP**

## **PERSONALIZED & ADAPTIVE**

The system shows the most effective learning medium for each individual learner

### **SPACED REPETITION**

Spaced repetition through multiple learning mediums to ensure learning is inculcated

### **TRACKING OF PROGRESS**

Track progress and get inputs on next learning milestones

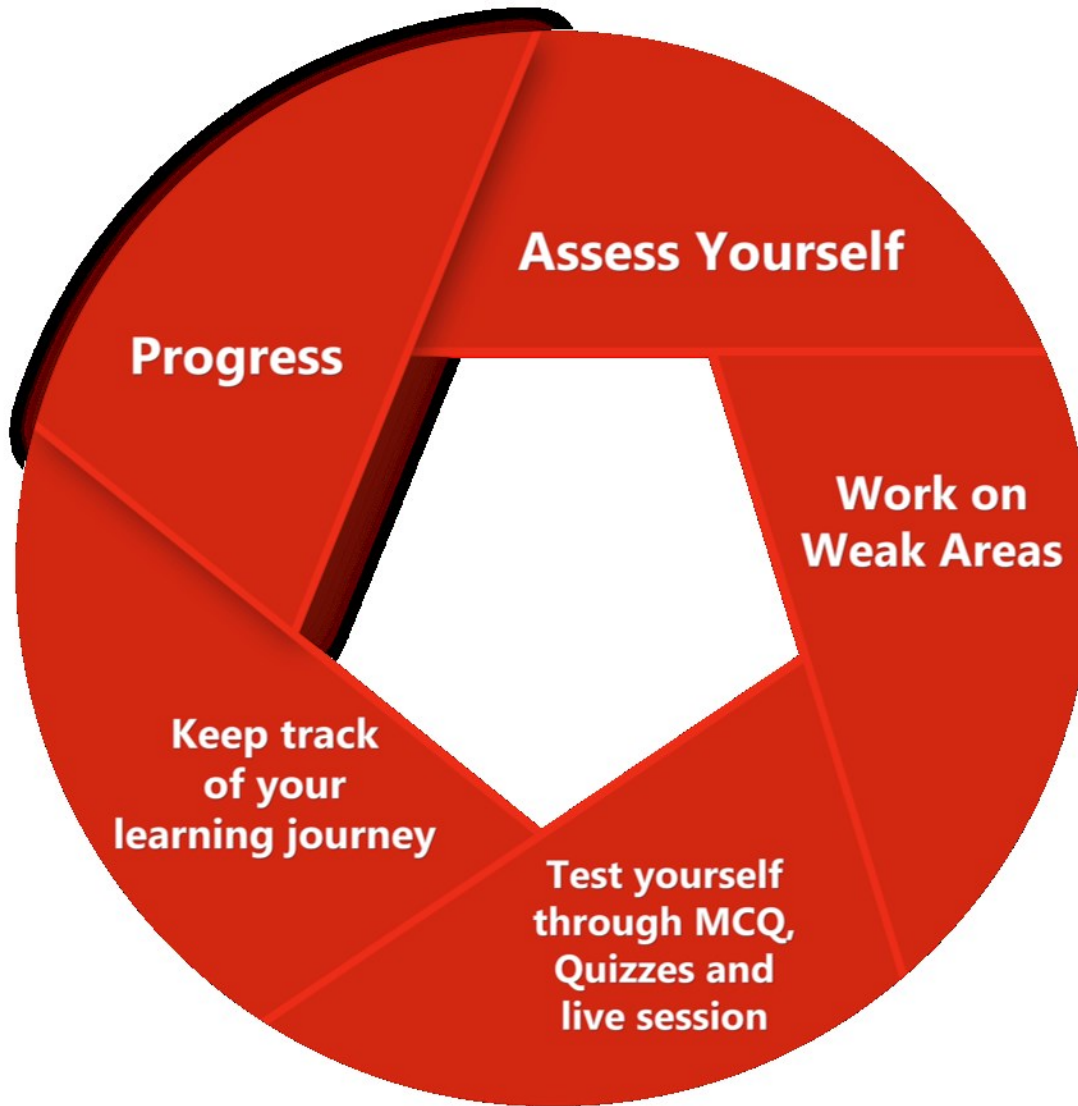

### **LEARNING BY DOING**

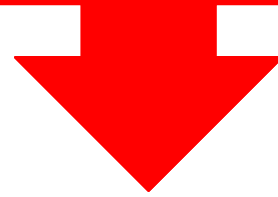

Learning will be imparted by immersing user in real life situations

**Engaging Learners  
Through Multiple  
Learning Mediums**

A whole range of learning mediums **to engage the learners** depending on their learning tendencies, learning needs & learning capabilities.

**VIDEOS**

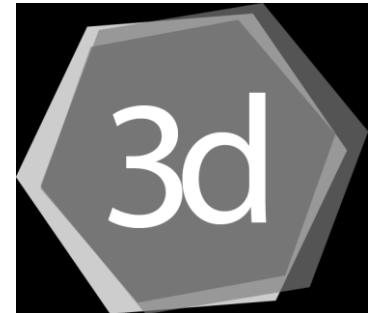

**READING  
ARTICLES**

**CARTOONS**

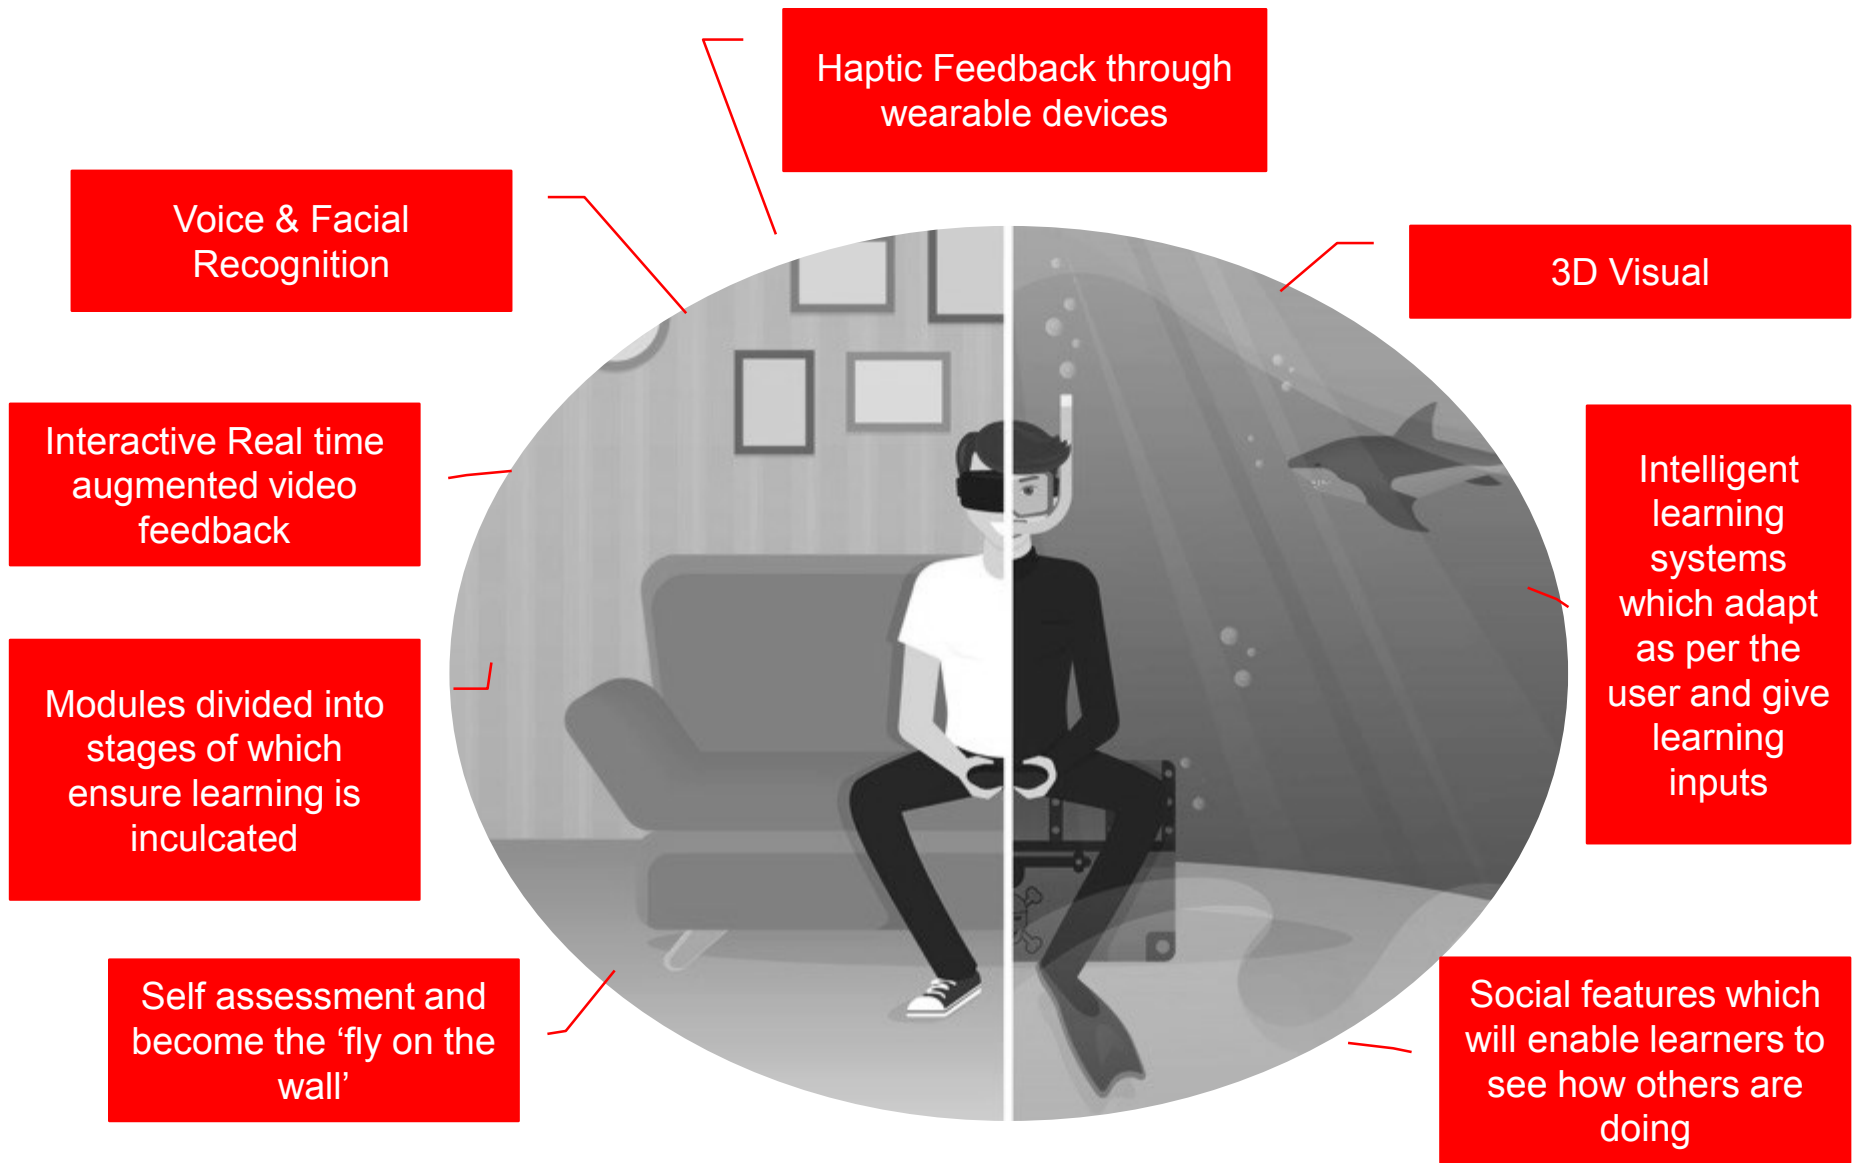

**GAMES**

**ANIMATION  
S**

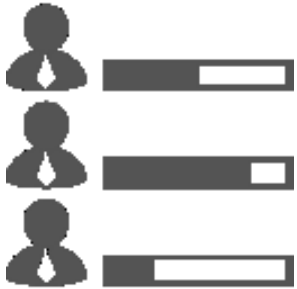

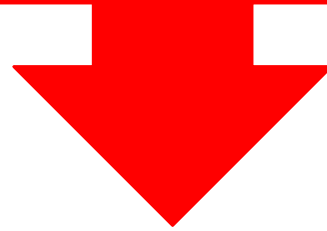

# Leveraging Technology To Provide Immersive Learning

We are collaborating with IIT Kanpur, CSE Department (Machine Learning) to develop the technology and effectively leverage it to deliver maximum impact learning.

Through the use of cutting edge technology which is in use, iAugmentor will provide the most immersive learning experience.

By leveraging technology iAugmentor provides learners with the most **immersive, engaging & effective learning experience.**  
Going forward we will introduce features like **AR/VR, Haptic Feedback & Big Data Analysis**

Personalized

Accessible Anytime  
Anywhere

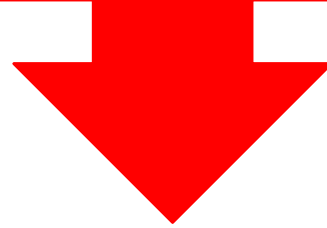

Facial, Audio & Profile  
Analysis

Social Connect

Through the **Learning Management System (LMS)**, the management can track the performance & progress at an organizational as well as at an individual level. The LMS will make the **in-house trainers more effective** and also make them **more accountable**.

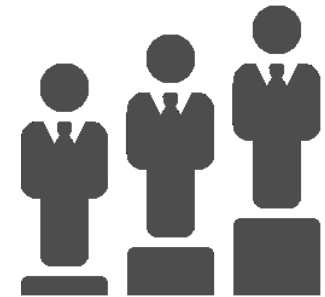

Track Progress

Assign Tasks

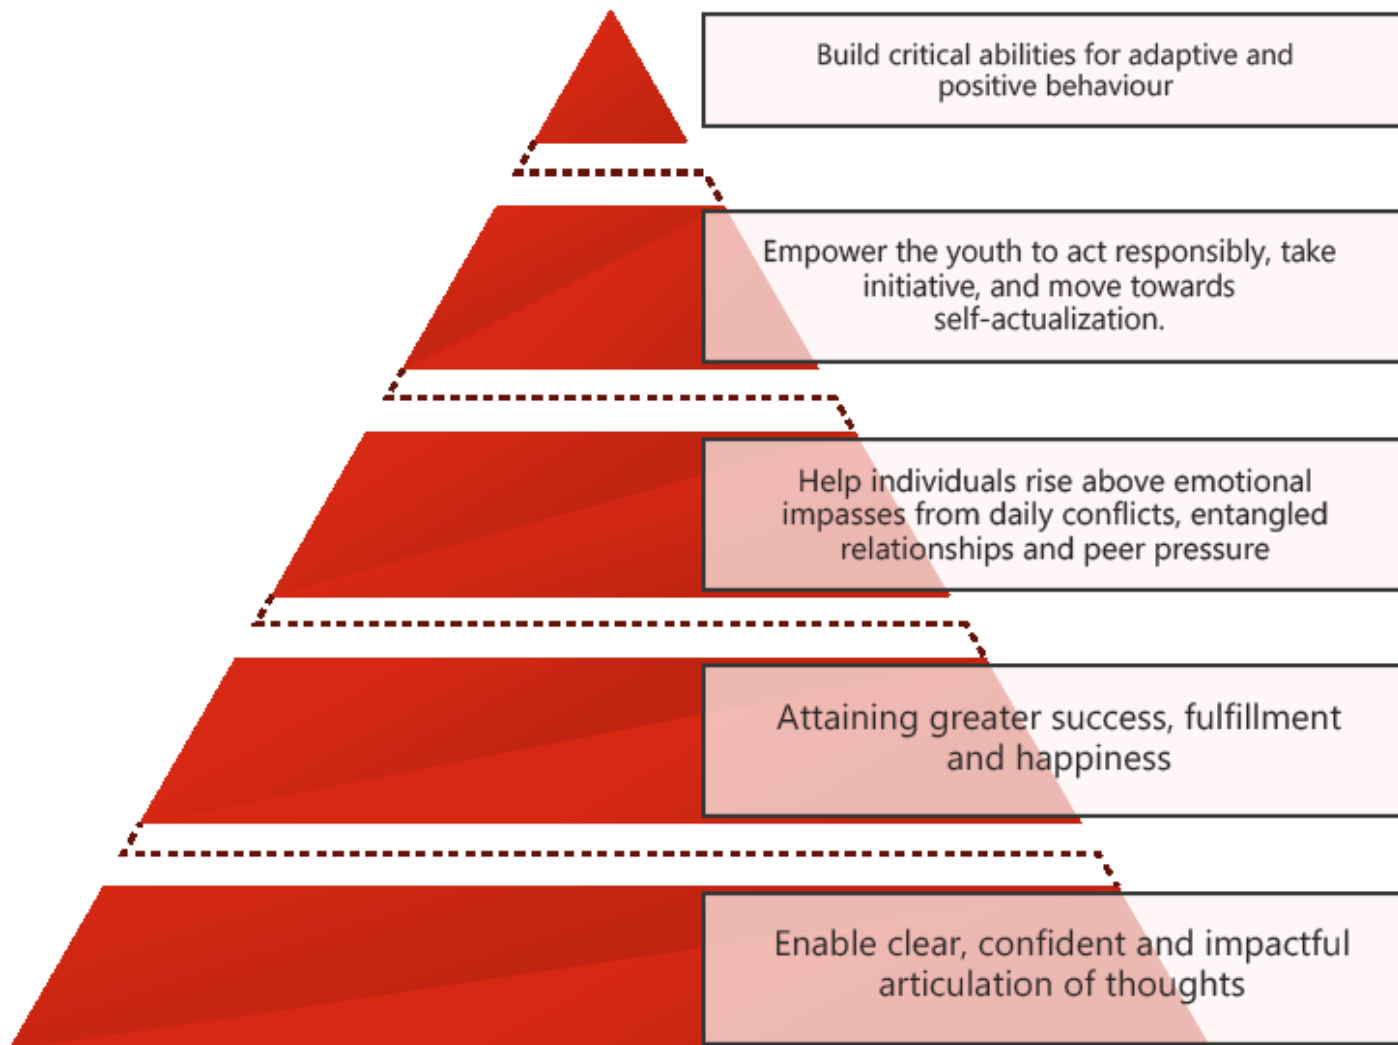

Cluster Learners  
according to their  
learning needs

See the Top/Worst  
performers

# **Learning Outcome**

**KEEP**

**LEARNING...**
