# Brainstorming

# Brainstorming

## What is Security?

Security according to two boys of 10 years old

# Brainstorming

## What is Security?

Security According to Junior High School ICT teacher

# Brainstorming

## What is Security?

# Definition Security

# Definition Security

---

*There is no clear cut definition*

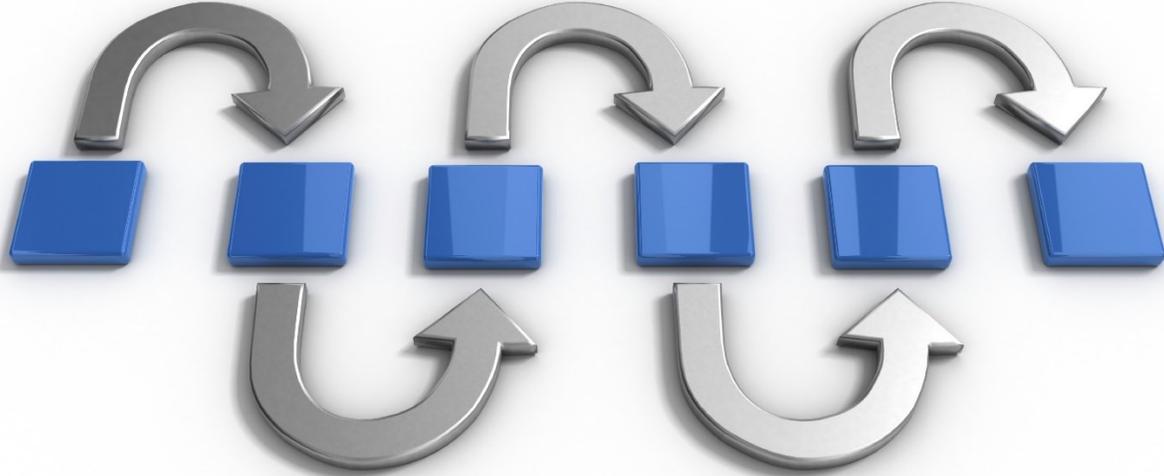

# Definition Security

Security is a process, not an end state.

# Definition Security

**Security is the process of maintaining an acceptable level of perceived risk.**

# Definition Security

---

No organization can be considered "secure" for any time beyond the last verification of adherence to its security policy.

*If your manager asks, "Are we secure?"*

*you should answer, "Let me check."*

*If he or she asks, "Will we be secure tomorrow?"*

*" you should answer, "I don't know."*

Such honesty will not be popular, but this mind-set will produce greater success for the organization in the long run.

# **Security Features**

Security has three features

# Security Features

## Confidentiality

Confidentiality is roughly equivalent to privacy. Measures undertaken to ensure confidentiality are designed to prevent sensitive information from reaching the wrong people, while making sure that the right people can in fact get it:

## Confidentiality

Assurance that information is shared only among authorized persons or organizations.

# Security Features

## Integrity.

Assurance that the information is authentic and complete.

## Integrity

In information security, data integrity means maintaining and assuring the accuracy and consistency of data over its entire life-cycle.

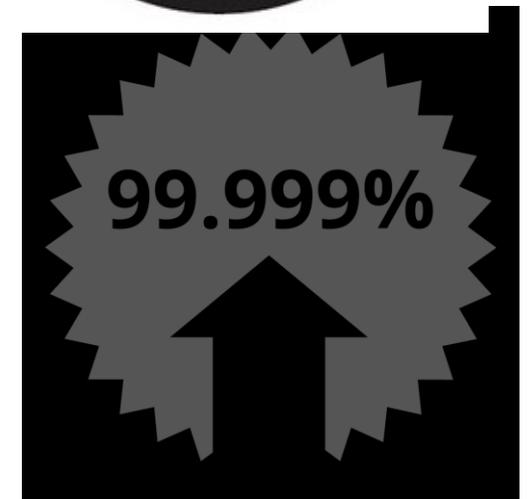

# Security Features

## Availability

Assurance that the systems responsible for delivering, storing and processing information are accessible when needed, by those who need them.

## Availability

Availability of information refers to ensuring that authorized parties are able to access the information when needed

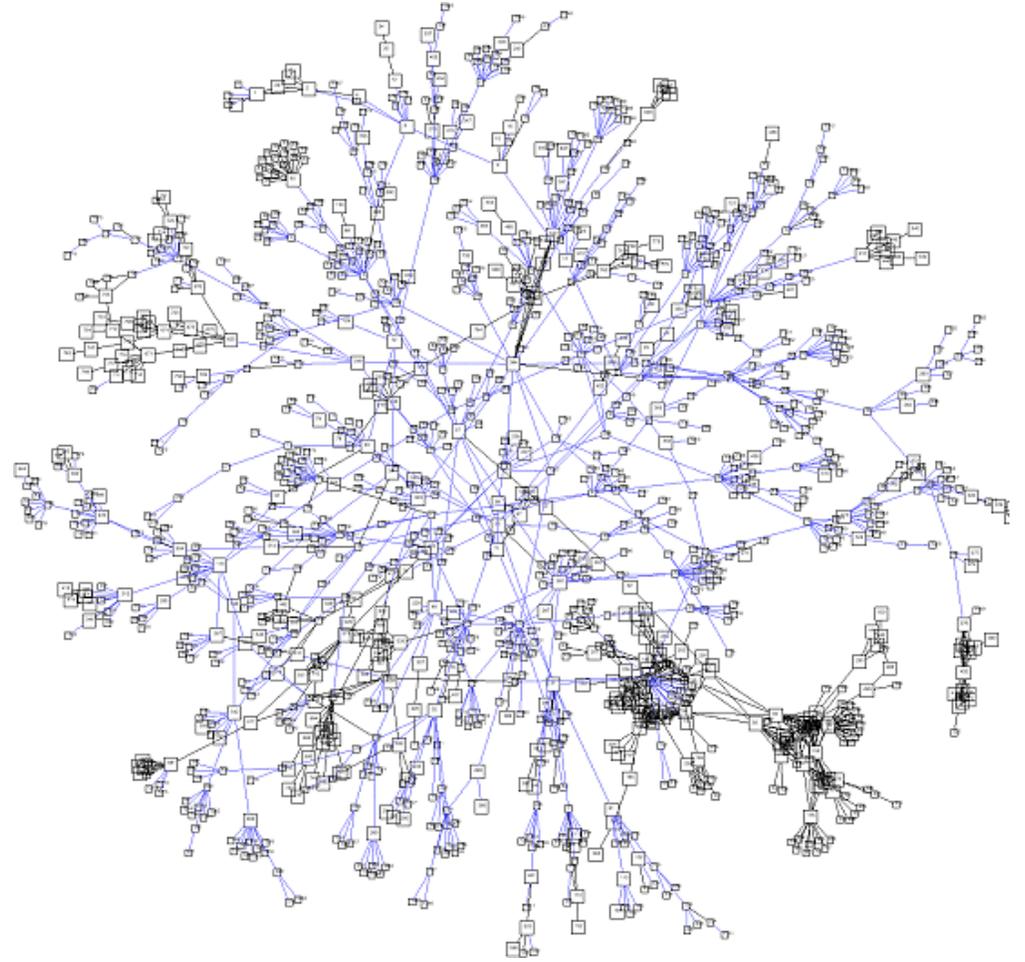

# **Concept of Cyberspace**

# Concept of Cyberspace

## Cyberspace

Cyberspace is "the environment in which communication over computer networks occurs."

**And almost everybody  
in one way or the other  
is connected to it**

# Concept of Cyberspace

**Ladies in the market  
are connected to  
run their businesses**

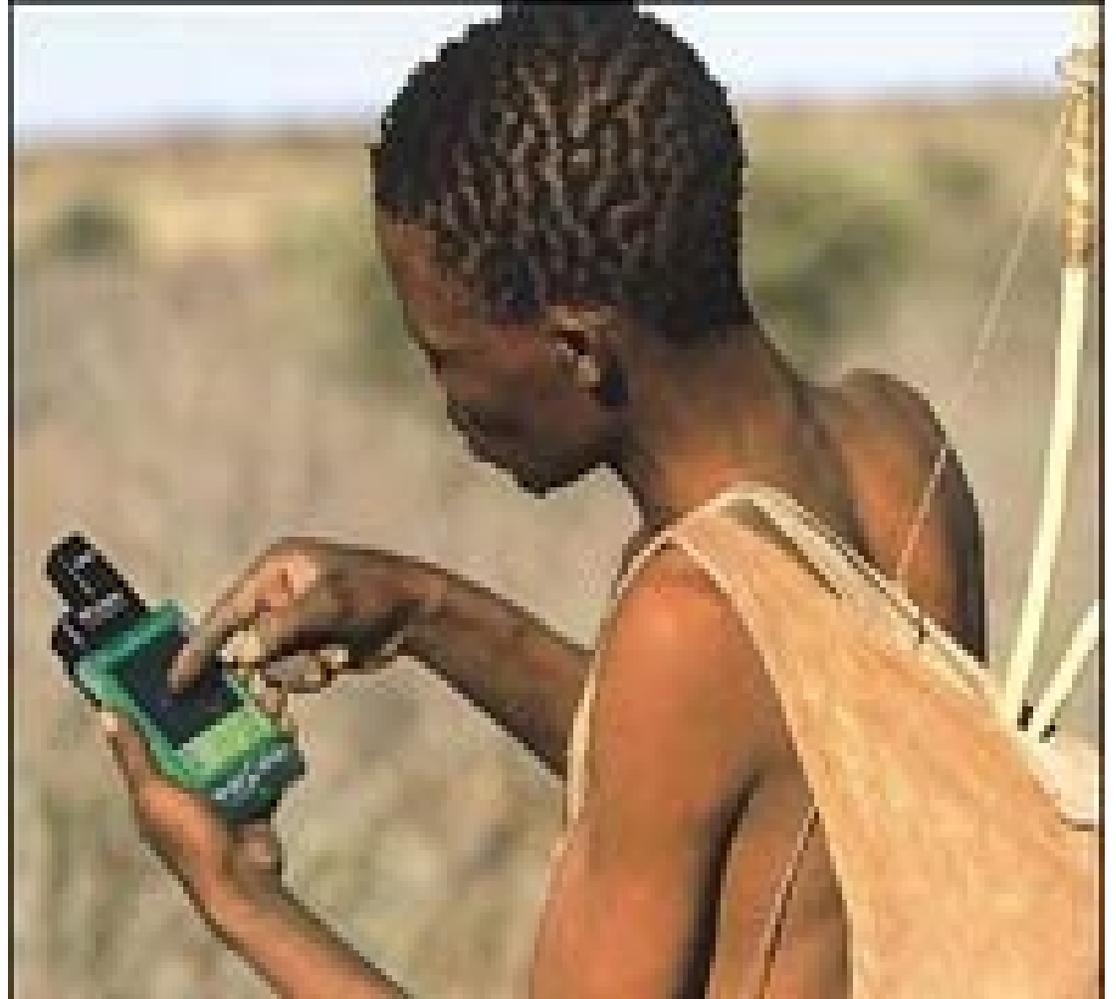

# Concept of Cyberspace

**Shepherds are connected  
to locate their cattle**

# Concept of Cyberspace

**Hunters are connected to it to locate their prey**

# Concept of Cyberspace

**Our friend, the farmer is  
connected to it and  
“Facebooking” in the coconut  
tree**

# Concept of Cyberspace

**Our friends in the remote areas are also connected to it**

# Concept of Cyberspace

**Huum! isn't amazing?  
They are also  
connected.**

# Concept of Cyberspace

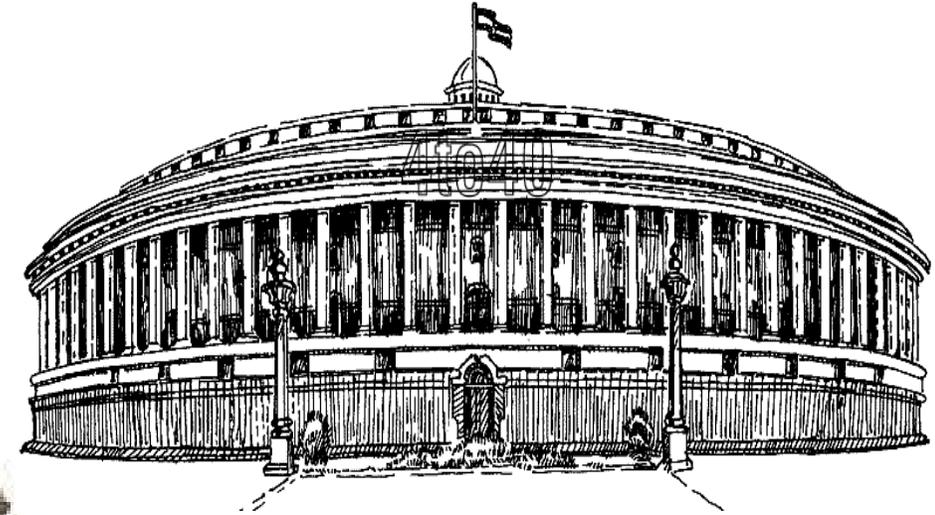

On a more serious note, are connected

**Government**

**Judiciary**

**Law makers**

# Concept of Cyberspace

**Militaries**

# Concept of Cyberspace

**Banks**

**Transportation Sectors**

**Health Sectors**

# Concept of Cyberspace

# **Concept of Cybercrime**

# Concept of Cybercrime

## Cyber Crime

Computer crime, or cybercrime, is any crime that involves a computer and a network.

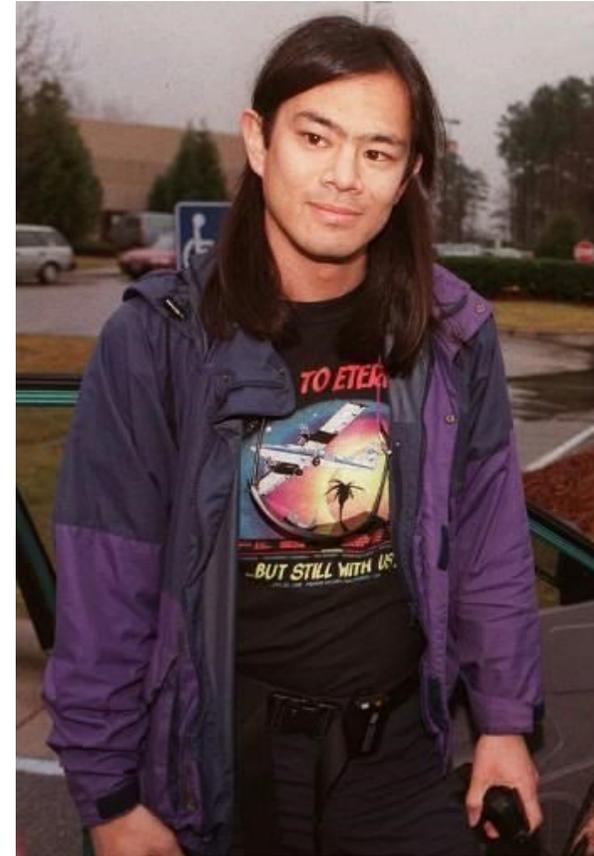

The computer may have been used in the commission of a crime, or it may be the target.

# Concept of Cybercrime

**Kevin Mitnick**

**Tsutomu Shimomura**

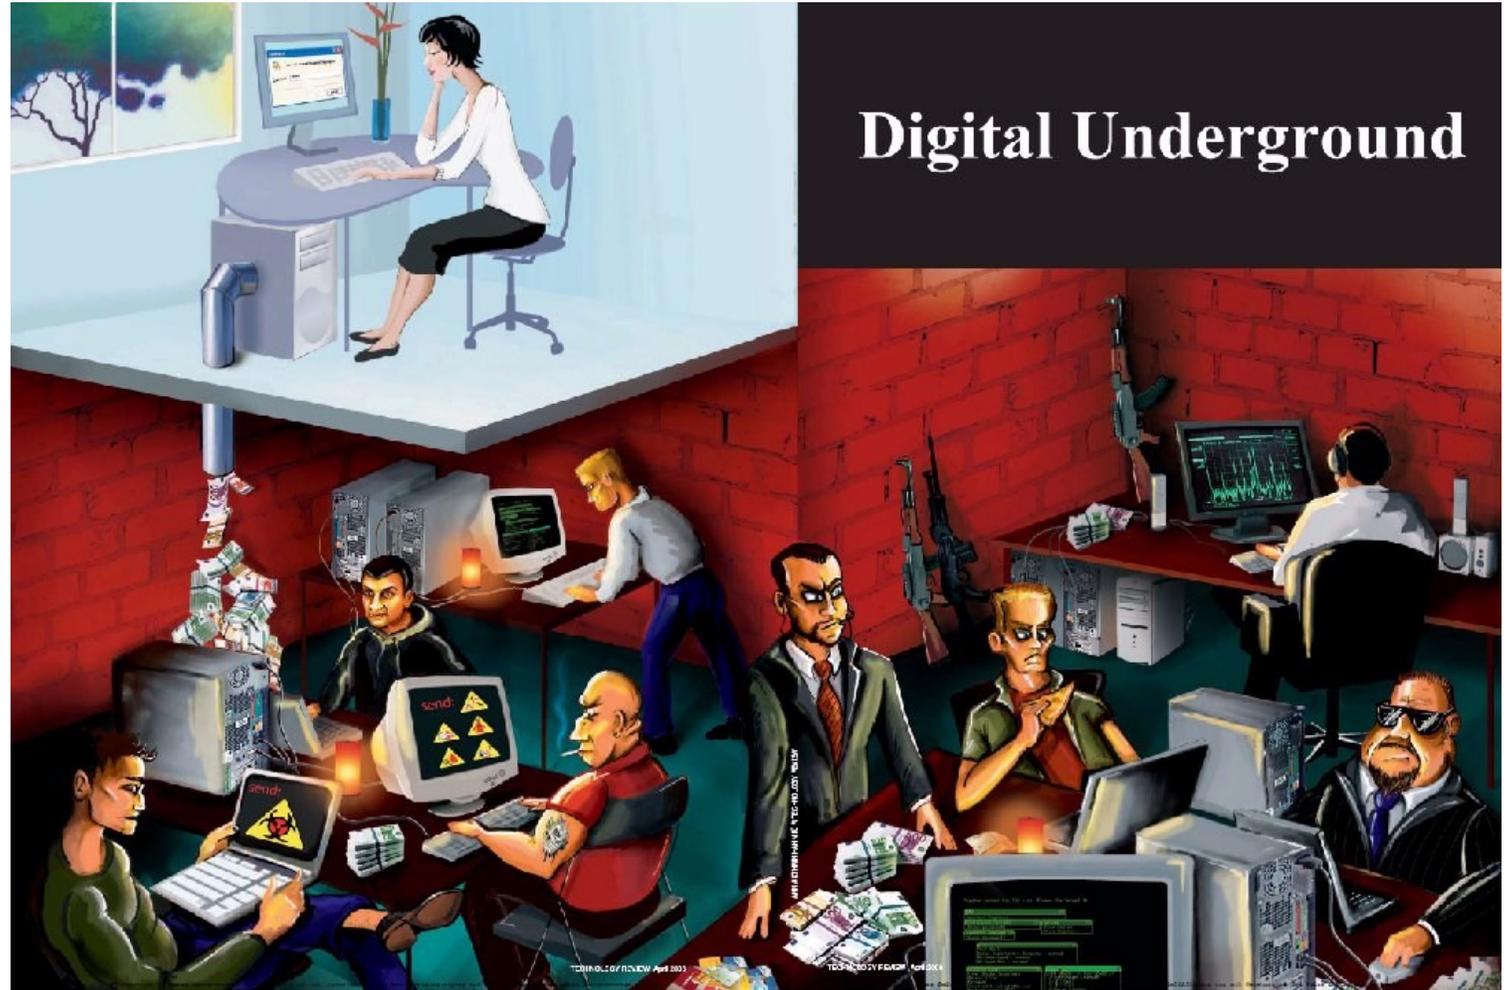

# Concept of Cybercrime

Commonwealth Bank, Australia - March 2011:-  
Automatic teller machines (ATMs) spat out  
tens of thousands of free dollars in Sydney  
Tuesday after a computer glitch turned into a  
nightmare for the Commonwealth Bank. IT  
Security Believe that it is a the consequence of  
hacking.

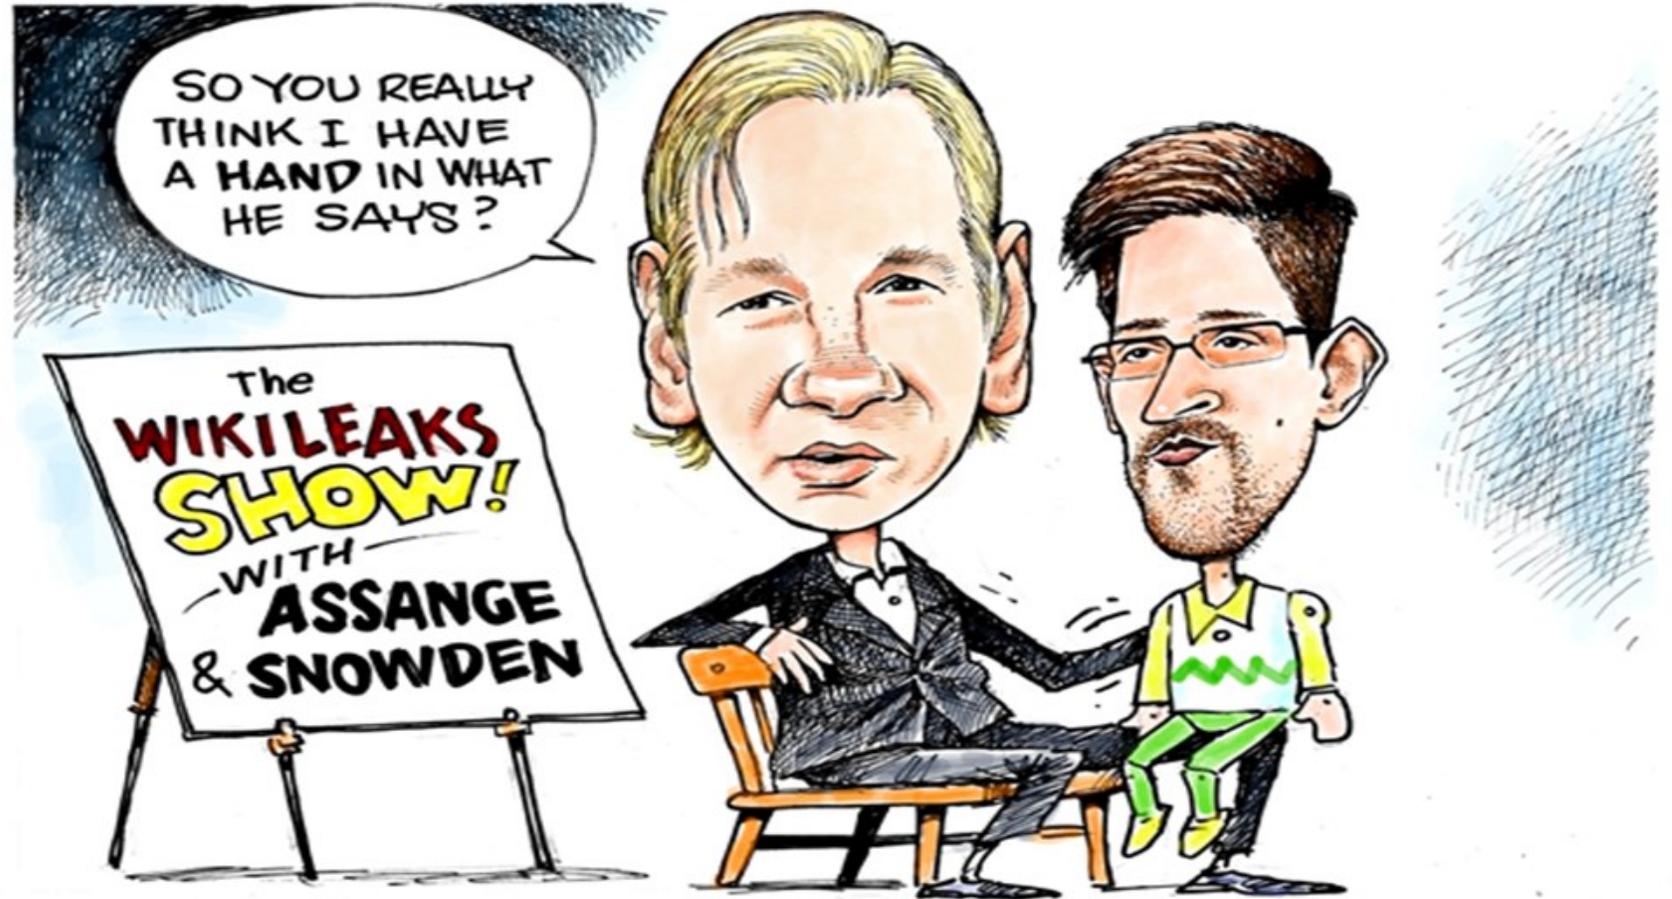

# Concept of Cybercrime

## Underground Economy

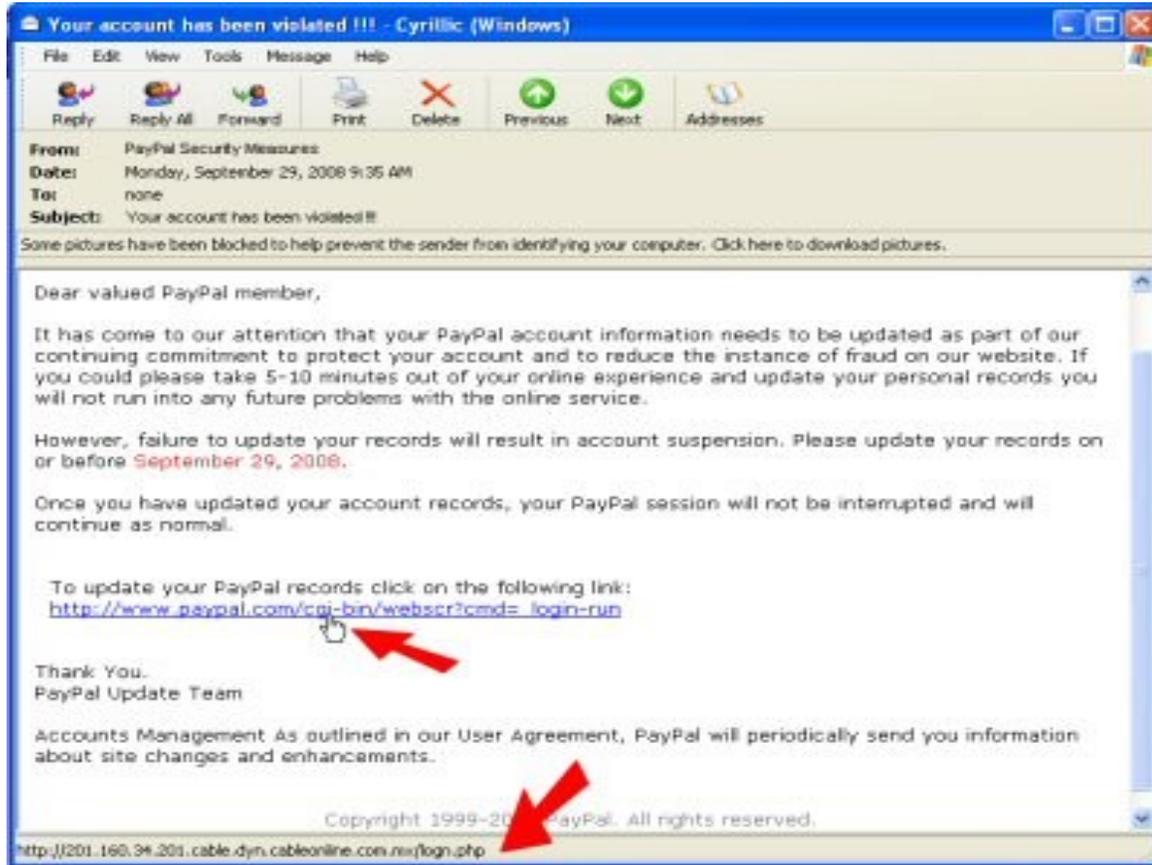

# Concept of Cybercrime

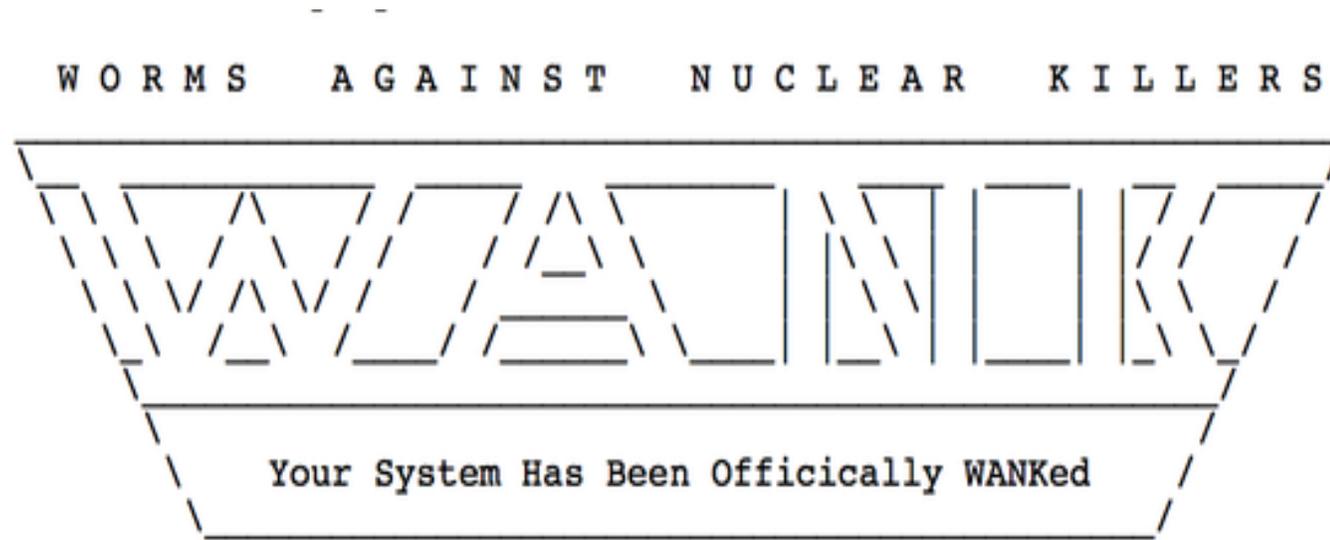

# Concept of Cybercrime

## Phishing

# Concept of Cybercrime

## Hacktivism

You talk of times of peace for all, and then prepare for war.

# Concept of Cybercrime

## Cyberwar: Estonia Case

# Concept of Cybercrime

Tuuli Aug, an editor of the daily newspaper "Eesti Paevaleht," stated the following:

*"I felt the country was under attack by an invisible enemy. . . . It was extremely frightening and uncontrollable because we are used to having Internet all the time and then suddenly it wasn't around anymore, . . . You couldn't get information; you couldn't do your job. You couldn't reach the bank; you couldn't check the bus schedule anymore. It was just confusing and frightening, but we didn't realize it was a war because nobody had seen anything like that before".*

# Concept of Cybercrime

## Stuxnet

### HACKERS CAN TURN YOUR HOME COMPUTER INTO A BOMB

By BARRY JEFFREY / *Money* Magazine

WASHINGTON — Right now, computer hackers have the ability to turn your home computer into a bomb and blow you to Kingdom Come—and they can do it anonymously from thousands of miles away!

Experts say the recent "hackers" that paralyzed the American, Mexican and eBay websites are lame compared to what will happen in the near future.

Computer experts around the world are alarmed by the sophisticated computer group known as Cyber Army, Persian group known as the APT, and so on. The most recent attack on eBay, which was the first of its kind, was a mere taste of what is to come.

"The criminals who hacked our sites were very sophisticated and they were very smart," says a security expert who works for the FBI.

"There are many more sophisticated hackers out there than you think there are," says a security expert who works for the FBI.

... & blow your family to smithereens!

"The criminals who hacked our sites were very sophisticated and they were very smart," says a security expert who works for the FBI.

"There are many more sophisticated hackers out there than you think there are," says a security expert who works for the FBI.

Sickos can wreak death and destruction from thousands of miles away!

Associated Press

# Concept of Cybersecurity

The threat is real

# **Concept of Cybersecurity**

# Concept of Cybersecurity

## Tentative Definitions

*Cyber security, also referred to as information technology security, focuses on protecting computers, networks, programs and data from unintended or unauthorized access, change or destruction.*

University of Maryland University College

*The state of being protected against the criminal or unauthorized use of electronic data, or the measures taken to achieve this.*

*'some people have argued that the threat to cybersecurity has been somewhat inflated'*

Oxford Dictionary

# Concept of Cybersecurity

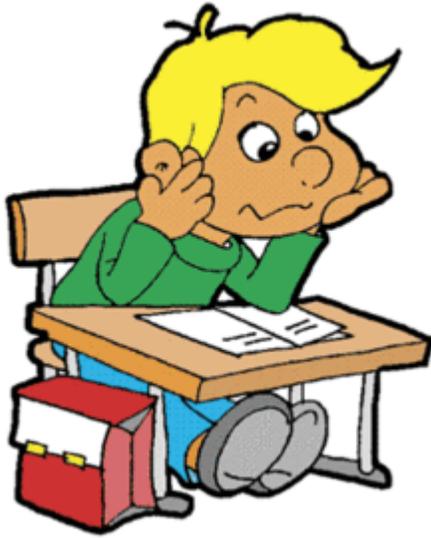

## ITU-T X.1205 Definition

- Cybersecurity is the collection of tools, policies, security concepts, security safeguards, guidelines, risk management approaches, actions, training, best practices, assurance and technologies that can be used to protect the cyber environment and organization and user's assets. Organization and user's assets include connected computing devices, personnel, infrastructure, applications, services, telecommunications systems, and the totality of transmitted and/or stored information in the cyber environment.
- Cybersecurity strives to ensure the attainment and maintenance of the security properties of the organization and user's assets against relevant security risks in the cyber environment.
- The general security objectives comprise the following:
  - **Availability**
  - **Integrity, which may include authenticity and non-repudiation**
  - **Confidentiality**

# Assignment and discussion

# Assignment

*Based in the realities of your organization, rank the three features of security with respect to your information system.*

# The way forward

- ICT is a single point of failure to Businesses.
- IS Security is Achilles heels of ICT
- Your security depends on mine and mine depends on yours,
- Let us come together and protect our cyberspace is creating and managing a CSIRT

HOW?

*Thank  
you*
