Digital Society Policy and Research

Why the ACMA undertakes research

Evidence base

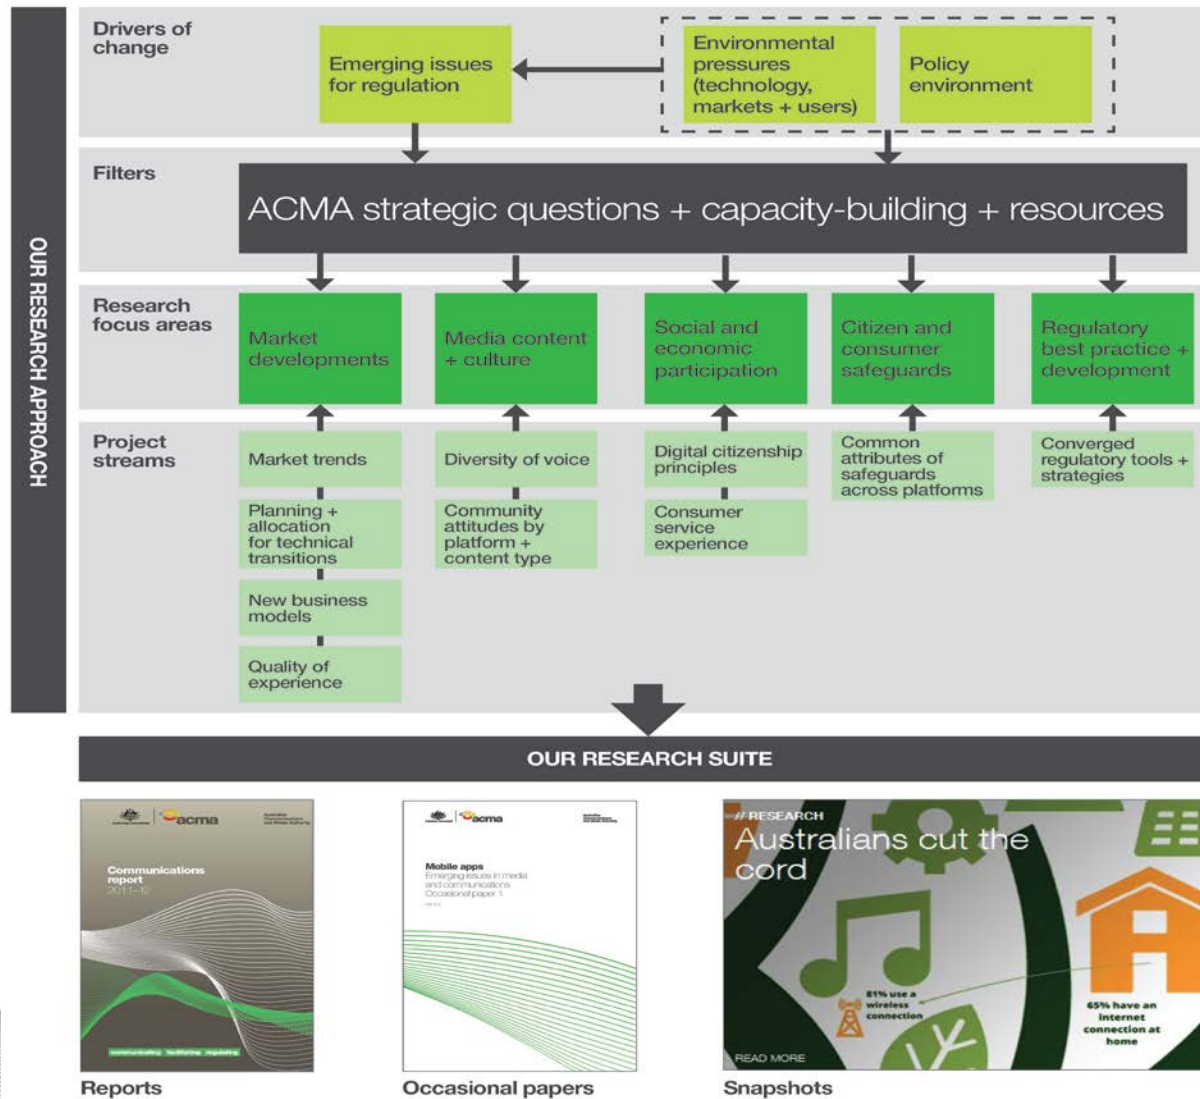

- to inform regulatory decision-making and provision of advice to government
 - > essential where ACMA must have regard to 'community standards', e.g. BSA
- informing discussion on regulatory settings through periodic reviews
- advice to support program design (e.g. Cybersmart)
- to make information available to the public
 - > transparency
 - > better-informed citizens and consumers

Why the ACMA undertakes research

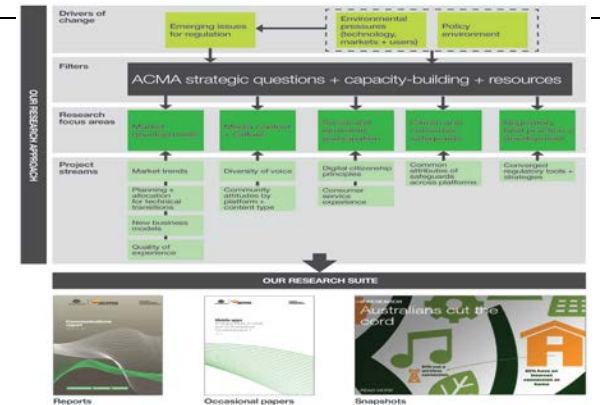

Reputation and influence

- staying relevant – identifying the important issues and facilitating contemporary regulatory or non-regulatory responses
- demonstrating an understanding of changes in the communications and media environment and implications for regulatory settings

ACMA's research approach

Planning

Project priorities and research issues informed by

- Policy environment changes
 - > deregulation agenda
 - > children's e-safety commissioner
 - > NBN delivery model flows through to telecommunications regulation
- Tracking environmental changes
 - > Technology
 - > Industry structures
 - > Citizen and consumer
 - > Institutional structures

Reconnecting the Customer research

bill shock. *consumers find spend management tools and alerts useful*

1 in 3 Aussie telco bill-payers experienced bill shock in the 12 months to May 2013

- ➔ 34% of post-paid bill payers received a higher than expected bill for one of their telco products
- ➔ 33% of pre-paid mobile phone customers ran out of credit sooner than expected

Despite increases in the number of services in operation and changes in consumer usage behaviours, this figure has remained stable since 2012 when 34% of post-paid mobile phone users and 33% of pre-paid mobile phone users reported experiencing billshock in the 12 months to May 2012.

 Consumers accessing data on their post-paid mobile phone were more likely to have experienced bill shock in the 12 months to May 2013 (37%) compared with those not accessing data (21%).

Main causes of bill shock

- ➔ Using the service more than usual (48%)
- ➔ Difficulty monitoring usage or spend (31%)
- ➔ Not understanding their plan or the way they were charged (27%)

Magnitude of bill shock

Around half (47%) of those who experienced bill shock reported that their most recent high bill was at least double their normal bill.

Consumers find spend management tools and alerts useful

While 31% of consumers reported having difficulty monitoring their usage or spend, consumers who reported using spend management tools and/or alerts in the 12 months to May 2013, found these to be useful.

Top tools and alerts used in 2013

	% find it useful
➔ SMS alerts when using a certain amount of pre-paid credit (58%)	 93%
➔ Having broadband speed reduced when data limit is reached (52%)	 63%
➔ Check usage on provider website (38%)	 88%
➔ Receive email alert when used certain amount of data (32%)	 89%
➔ Mobile app to check usage (28%)	 92%
➔ Provider warnings before using more expensive services (26%)	 92%

New complaints to the TIO decrease

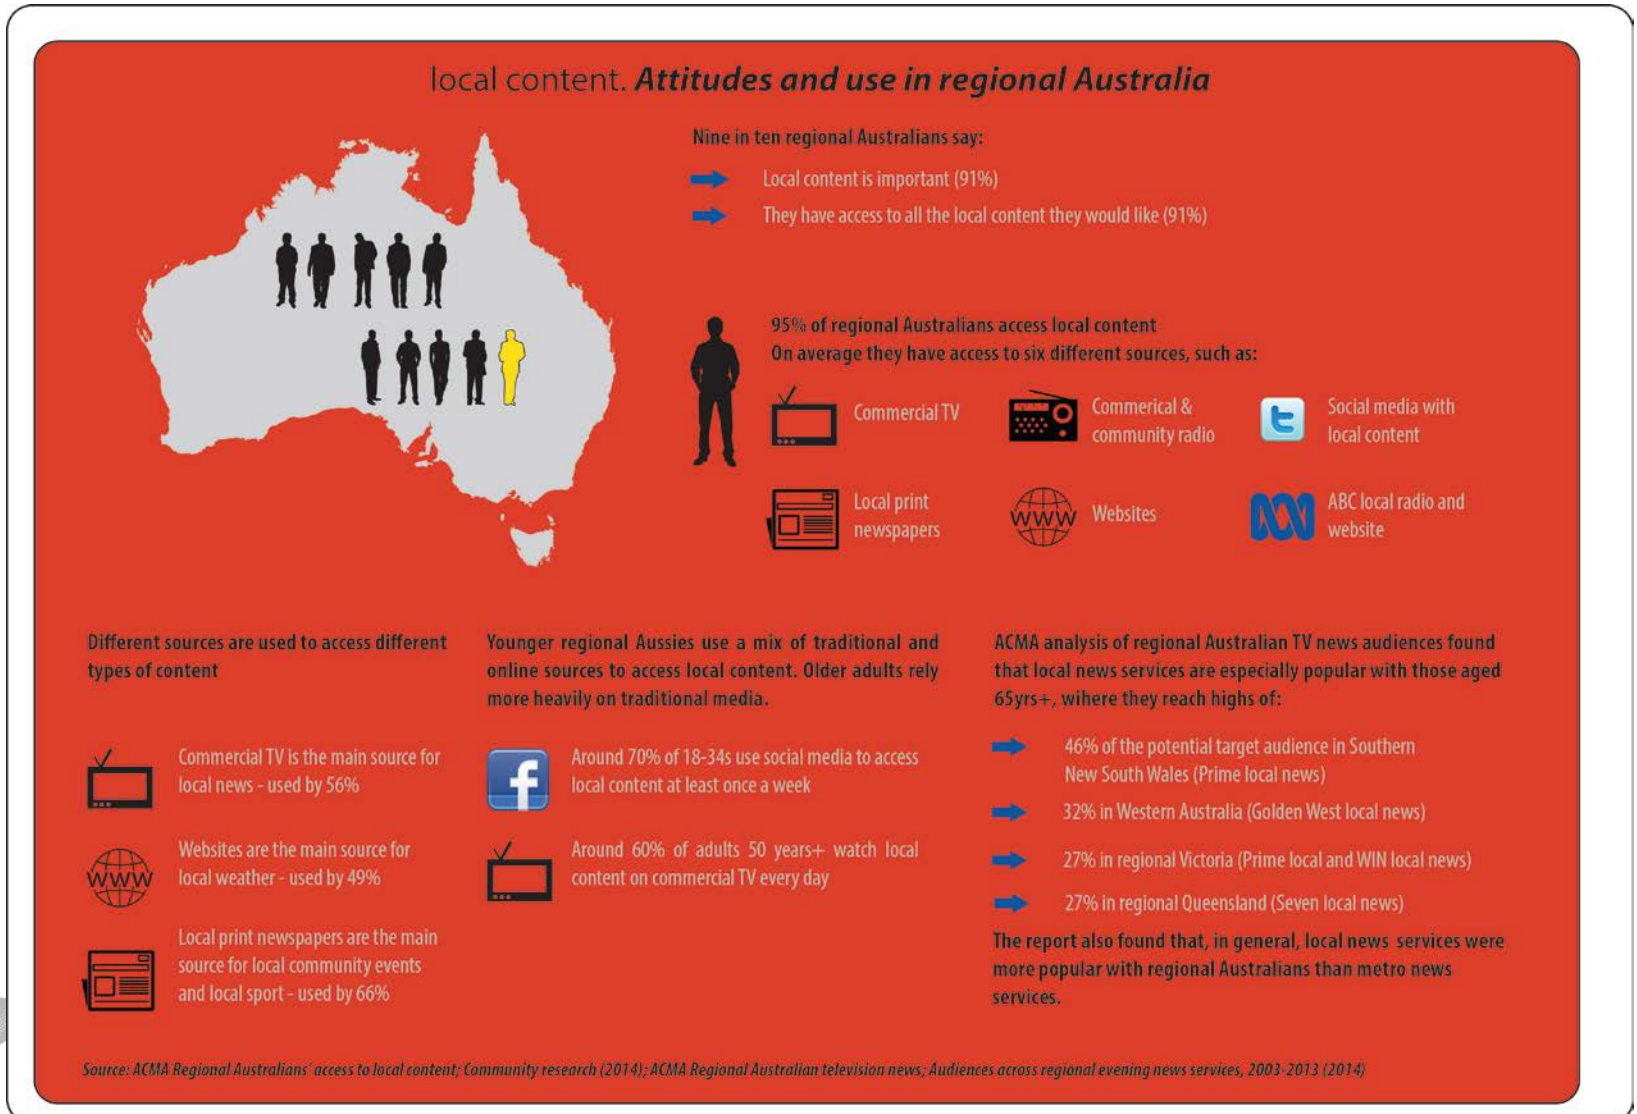

New complaints to the TIO about mobile services fell 25.6% between the 2011/12 and 2012/13 financial years.

The total number of complaints to the TIO across all service types decreased by 18% over this period. From 193,702 complaints in 2011/12 down to 158,652 in 2012/13.

kids online. *connected, social, mobile*

92% used a computer/laptop

In 2013, 34% of 8-11s used a tablet to go online

Kids used the internet at home and on the go in 2013:

13% used a mobile phone

10% used a games console

8-9s

93%

64%

9%

10-11s

94%

72%

25%

3% used a smart TV

17% used an ipod

Kids love social

36% of 8-9s used social media in 2013. Up from 23% in 2012

55% of 10-11s used social media in 2013. Up from 23% in 2012

From the Roy Morgan Research Young Australians survey, half (53%) of 6-13s owned or used a tablet in 2013. Up from 33% in 2012.

2x The proportion of kids who say the internet is very important doubled between 2009 and 2012

Kids and mobiles

In 2013, 11% of 8-9s and 15% of 10-11s used a mobile phone to go online. This increases with age.
