## MINISTRY OF INFORMATION AND COMMUNICATIONS VIET NAM EMERGENCY RESPONSE TEAM

#### **INCIDENT RESPONSE DDOS ATTACKS IN VIETNAM**

# MINISTRY OF INFORMATION AND COMMUNICATIONS VIET NAM EMERGENCY RESPONSE TEAM

Presenter: Dang Hai Son

**Regional Director** 

#### About me

- Master of Computer Science
- Computer Hacking Forensic Investigator (CHFI)
- GIAC Security Essentials Certification (GSEC)
- EC-Council Certified Security Analyst (ECSA)
- Certified Ethical Hacker (CEH)
- Comptia Security+

Full Name: **Dang Hai Son** 

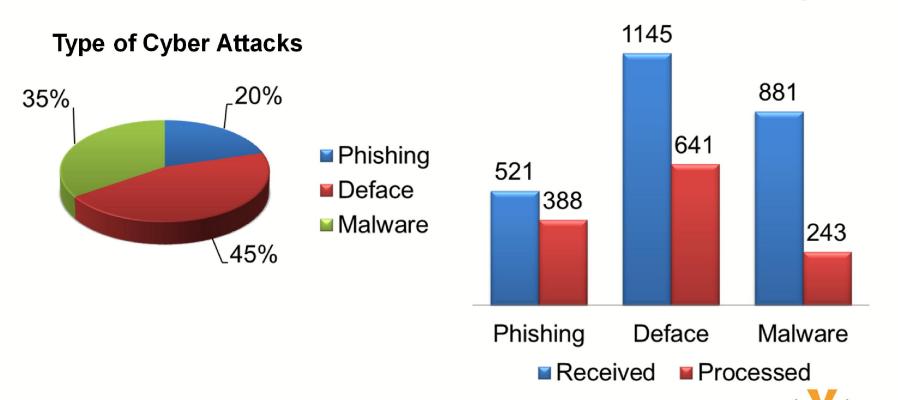

C

Dang Hai Son is currently in charge of VNCERT branch in central Vietnam (VNCERT is a unit of the Ministry of Information and Communications of the Socialist Republic of VietNam). Assisting Vietnam organizations and Internet users in implementing proactive measures to reduce the risks of computer security incidents and to assist them in responding to such incidents when they occur.

#### Statistics Cyber Attacks in Vietnam

#### Total attacks VNCERT receive and process

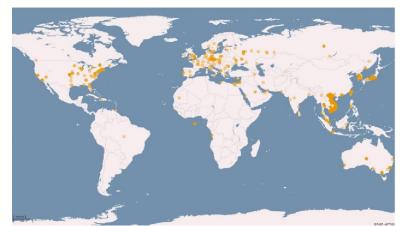

CERT

#### VNCERT Incident Response Report 2013

#### Statistics botnets:

- Zeus Botnet: 14075 IP addresses.
- Sality Botnet, Downadup, Trafficconverter: 113273 IP addresses.
   Send warning information to 174 IP addresses (Government and State Agencies).
- Brobot Botnet (request cooperation from US-CERT): malware removed from 335 sites (linked page 2373).
- Statistics Botnet DDoS attack:
   ~100.000 300.000 bots, 69
   network addresses (Government and State Agencies), C&C Server: 7
   IP addresses, 18 domains from 5 countries.

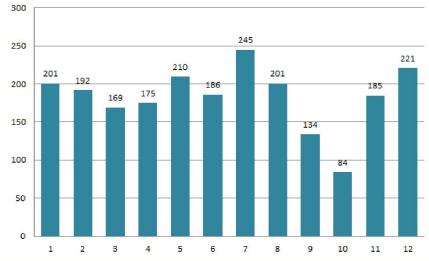

### The common types of attacks

#### Statistics Website Attacked

### Identify trends attacks

- Attacks intended to steal information, malicious code inserted, with the form: E-mail spoofing, phishing site (Phishing), Hack site (defacements), ... especially targeting state agencies and government.
- Spreading malicious increasing (the site for the cracked software or free, sex websites, games, social networking, ...) and the fake e-mail attachments.
- Malware on 3G mobile platforms has increased rapidly.

#### E-newspapers in Vietnam DDOS attack (July 2013)

newspapers

# Incident response DDOS attacks (1)

VNCERT received a assistance request prevent DDOS attacks from the E-

• VNCERT require system administrators to send information related to the incident DDOS attack (Webserver, Firewall, ... log files, network activities \*.pcap files).

• Analysis DDOS attack (strength, speed packets sent, packet type, the number of IP addresses is sent to the destination, ...).

• Based on these factors (speed, package type, ...) to build a set of addresses likely infected computer malware.

 VNCERT require ISPs to provide information about static IP addresses for conducting malware samples.

# Incident response DDOS attacks (2)

Analysis malicious code and send malware samples to antivirus organizations, companies requirements analysis support.

• VNCERT implement sum information malware analysis results.

• VNCERT coordinating ISPs implementation shutdown the C&C server if they are in Vietnam.

• Coordinate with other CERT if C&C server located outside Vietnam.

• Send malware samples and simultaneously require the antivirus vendors to update database to remove malware in computer users.

Awareness activities to users on how to check your computer is infected with malicious perform DDOS attack
or not? Provides links tool for users to download and remove malware (e-newspapers, forums, social
networking)
