

BR IFIC 2746 – NEWS

In order to improve the way in which Space Services BR IFIC DVD-ROM publications may be printed, the Bureau has introduced a new module of printing in the BR IFIC DVD-ROM.

From the *Table of Contents* (BR IFIC Publications), it is now possible to create *customized* lists of publications using different criteria:

- Publication type (API/A, CR/C, RES49, PART I-S, PART II-S, PART III-S, etc...)
- Responsible administration
- Orbital position
- Etc...

These new *customized lists* can be printed using the button [Print *current List*], as well as the **Publications** they contain using the button [Print **Publications** in *current List*].

Detailed instruction is available under the [**Print instruction**] button from the *Table of Content* screen.
