

## **BR IFIC 2772 – NEWS**

The Radiocommunication Bureau (BR) is pleased to inform administrations that a new RS49/552 Builder tool is integrated into the [SpaceCap software package version 7.1.0](#). This tool simplifies the generation of notices for information submitted under Resolution 49 and Resolution 552, starting from an existing coordination or notification notice from the SRS, SPS or AP30B database.

For detailed information on how to use this software application, please refer to the corresponding HELP file in the SpaceCap menu (Help - > New RS49/552 Builder) which is included in this software package.
