

CR/D DRAFT - LIST OF SPACE NETWORKS

The Bureau requests Administrations listed below to kindly inform it of any additional comments concerning disagreements under **Nos. 9.11 to 9.14, 9.21 and RS33 § 2.1** received from administrations, by updating accordingly the database using SpaceCom software and return it to the Bureau by electronic mail (brmail@itu.int).

CR/D draft

The Bureau has continued to improve the [SpaceCom](#) software package, in particular completing the part on the role of the notifying administration and clarifying the demands by administrations to be included in a coordination request, when not initially identified by the Bureau's examination as potentially affected. The updated version 6.0 of the SpaceCom software package and the associated SpaceCom User Manual are now available to administrations and other users at the ITU website (<http://www.itu.int/ITU-R/software/space/spacecom/index.html>), as well as on the BR IFIC (Space services) DVD-ROM

In order to assist the *notifying administration responsible for the satellite network* published in a CR/C special section and the Bureau in completing its task under No. **9.53A**, the following approach has been developed and included in the SpaceCom software package.

Upon expiry of the deadline for comments and on the basis of its records, the Bureau will make available a **draft CR/D database per network** (named **IFICnnnn_BR_CRCxxxx.mdb**) located in BR IFIC DVD-ROM, at folder **Databases\SpaceCom\draft_CRD**. This database will contain a listing of administrations, which have submitted a disagreement under No. **9.52** to one or more requests for coordination within the regulatory four-month time limit.

Furthermore, before proceeding with the publication of the above information in a Special Section of the CR/D series, the Bureau will request the notifying Administration for each network to inform the Bureau of any additional comments concerning disagreements received from administrations, copies of which may not have been sent to the Bureau. This should be carried out by updating the draft CR/D database using the SpaceCom software package and returning it to the Bureau by electronic mail (brmail@itu.int).

The draft CR/D database is available for information to all administrations by using the module 'Viewer' of the SpaceCom software package.

For more information see Circular Letters CR/185 of 20 December 2002 and CR/193 of 23 May 2003.
