Subject: Request for coordination for NGSO satellite network - SE-6-HEO-1A
Attachments: SE-6-HEO-1A (2).zip, SE-6-HEO-1A Attachments.zip, 1604249-2 1604247-2
Request for coordination - NGSO satellite network - SE-6-HEO-1A.pdf

Dear Sirs,

References:

1. *API/A/9958, BR IFIC 2793, 28.04.2015*
2. *Submission of modification to API for SE-6-LEO API/A/9958 – BRIFIC 2793, our letter ref. 1406006-44, dated 2nd of August 2016*

Please find attached Request for Coordination notice for the NGSO network "SE-6-HEO-1A". Associated API is API/A/9958, SE-6-LEO (References 1). The network is being renamed as SE-6-HEO-1A (References 2).

The API-information is in mdb-format, and "zipped" to ease transmission. SpaceVal has been used for validation. We note that the Validation for this notice results in 1896 fatal errors. However, these all relate to a missing value for modulation type which is explained in Attachment 2 contained in "SE-6-HEO-1A Attachments.zip".

Further details regarding the NGSO satellite network SE-6-HEO-1A could be found in "SE-6-HEO-1A Attachments.zip".

Attached is also a letter that today has been sent by surface mail and fax. This letter is to be considered as the confirmation of the information in this e-mail as required by the Radio Regulations.

If you have any questions or comments, please do not hesitate to contact us.

Thank you very much in advance.

Best regards,
Hæge Andersen
