

HAZEM MOAKKIT

Hazem Moakkit is a veteran of the satellite industry where he has worked for over 22 years in various capacities. He currently serves as the Vice President for Spectrum Development at O3b Networks where he leads the creation and implementation of O3b's global spectrum strategy.

Prior to O3b, Hazem spent 5 years at Yahsat in the United Arab Emirates as the Director of Regulatory & Spectrum Affairs where he successfully created and managed the Spectrum Strategy and led the acquisition of licenses and key orbital assets for the start-up operator. He was also instrumental in devising the business strategy for Yahsat.

Early on in his career, Hazem held various engineering and spectrum positions at Intelsat, PanAmSat, and ATCI.

Hazem holds a bachelor's degree in Electrical Engineering from Arizona State University, an MBA degree from Georgetown University.
