

Dmitry Tur

Dmitry Tur is Deputy Head of Spectrum Regulation Division at the Russian Ministry of Communications.

Dmitry Tur graduated from the Moscow Technical University of Communications and Informatics with a diploma of engineering of “means of communication with mobile objects” in 2006. He started his professional career in 2005 at the Radio Research and Development Institute (NIIR), where he worked in the frequency planning laboratory. Here, Mr Tur's

work focused mainly on electromagnetic compatibility calculations, projects of frequency plans for terrestrial television and associated measurements.

He participated in RRC-06 as a delegate from the Russian Federation. During the conference he was responsible for frequency planning of the Black Sea region. After that Dmitry worked on the DTT implementation projects in Russia, conversion of spectrum projects, and studied the issue of cognitive radio.

In April 2013 Dmitry started his work at the Russian Ministry of Telecom and Mass Communications as deputy head of the spectrum management division with responsibilities for spectrum management policy.
