

Broadcasting workshop exercises

NO	PROGRAM	Task
1	GE84PLN	In Switzerland (SUI), select one proposed modification (Notice under treatment) at DAVOS GOTSCHNAGRAT, 95.2 MHz. Make a frequency search at that site between 87.6-89 MHz.
2	GE84PLN	Create a new notice to add an assignment using the frequency with the lower usable field strength and run an interference study.
3	GE84PLN	Perform a similar study for a transmitting site in your country.
4	GE84PLN	Select one recorded assignment at BAMAKO, MLI, 87.6 MHz and create a modification notice correcting the antenna heights using the ITU SRTM3 terrain database.
