Fujitsu Healthcare Solution Offerings in Japan

- Fujitsu Japan has over 2,000 SEs and sales staff.
- Fujitsu innovates workflow with standard package applications.

■ Healthcare Packages

● EMR solution

1. HIS
2. CPOE
3. Electronic carte
4. Nursing system
5. Medical accounting system

● Department solutions

1. RIS / PACS
2. LIS
3. Management support system
4. Health check-up system
5. HIE

■ Business Model

● One-stop solution

1. IT Prime Contractor
2. Total integration and maintenance

● Non-customize solution

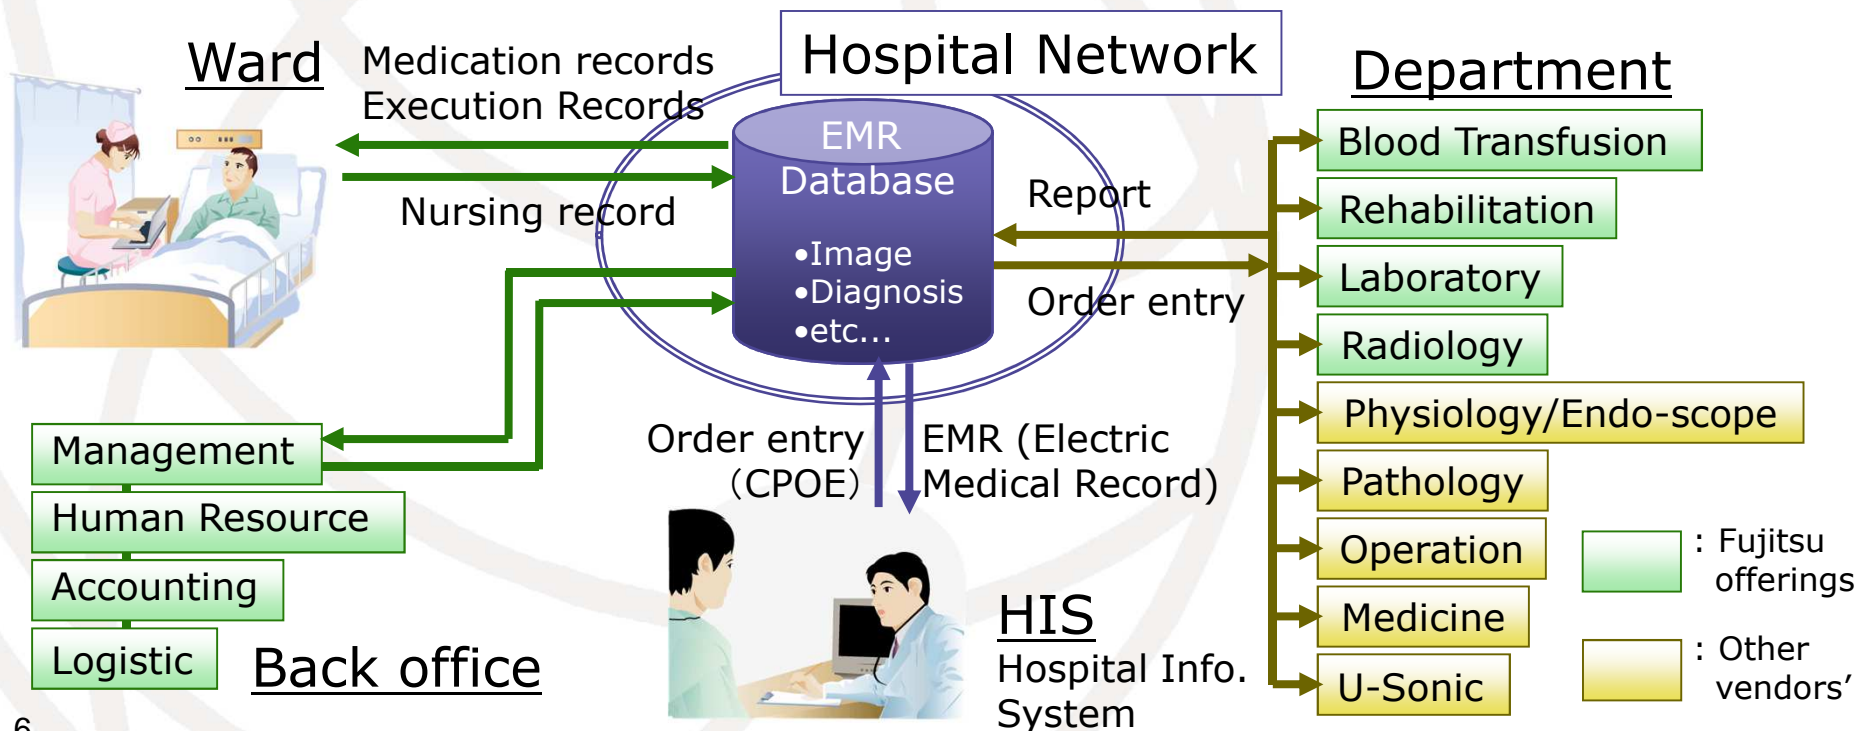

1. Adopt standard package into all hospitals w/o customization
2. Std. PKG covers entire workflow in all hospitals.
3. Annual level-up for the PKG
 - About 350-400 functions are added.
 - User's meeting decides Level-Up contents.

Features of Fujitsu EMR Solution

Fujitsu's EMR system includes the entire hospital ICT systems (HIS, network and department systems) including electronic carte.

Continuous updates and improvement

- Flexibly adapt changes in medical systems and advancements in medicine.
- Periodically reflects opinions from medical staff via user forums.
- Include knowledge collected from all over the country.

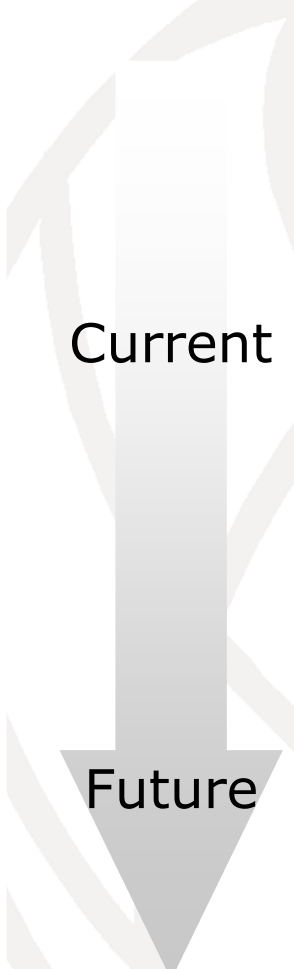

HIE solution

Transition of Healthcare Systems

Healthcare system has been changing to cover wider info.

	Network	Information	Administrator	Examples
EMR (Electronic Medical Record)	Within hospital	<ul style="list-style-type: none"> ✓ Patient carte ✓ Order info. ✓ Management info. 	Hospital	Current EMR solution
EHR HIE (Electronic Health Record)	Among hospitals and clinics	<ul style="list-style-type: none"> ✓ Some info. of carte for medical introduction 	Regional core hospital and municipality National Government	<ul style="list-style-type: none"> • NHS in UK • Info.Way in Canada • KanTa in Finland
PHR (Personal Health Record)	Regional area	<ul style="list-style-type: none"> ✓ Carte ✓ Healthcare info. ex. Home care info. 	Municipality National Government	Best Life Promotion
PLR (Personal Life Record)	Regional area (wide)	<ul style="list-style-type: none"> ✓ PHR ✓ Life record ex. Social service info. 	Municipality National Government	

Needs for HIE network

Change of medical env.

Rapid aging & Increase in lifestyle diseases

- ✓ Change of disease structure
- ✓ Increase in elderly households, single-living of elderly

Lack of doctors and nurses

- ✓ Cruel overwork due to lack of doctors and nurses
- ✓ Difficulty in medical care in remote rural areas

Advancement of healthcare services needs

- ✓ Concentration of patients to large hospital
- ✓ Evaluation of hospitals by patients (e.g. ranking)

Financial crunch of public medical institution

- ✓ Public hospital reform plan, review of management

Change of medical system

- ✓ Optimization of medical expenses
- ✓ Reform of medical system, optimization of beds for acute phase
- ✓ Decrease in days in hospital by introducing DPC*
- ✓ Incentive for computerization & HIE path
- ✓ Online receipts *DPC=Diagnosis Procedure Combination

Solutions

- ✓ Medical systems considering regional feature
- ✓ Optimization of limited human resource
- ✓ Proper role sharing of hospitals / clinics
- ✓ Functional differentiation of hospitals in a region
- ✓ Sharing medical info in a region
- ✓ Remote medical service by utilizing ICT

Solve

Equipment of cooperation network is immediately required in order to promote transfer from hospital-closed healthcare to regional healthcare

EHR Solution in Japan

Enables info sharing among different hospitals/clinics.

Regional area (town/city) network

Nursing facility

Clinic

HumanBridge

Rehabilitation hospital

Clinic

■ Shares reference of the whole carte information, including prescription, inspection and doctor's diagnosis.

⇒ Patients can receive medical care at any convenient sights.

Core hospital

HumanBridge

Core hospital

Core hospital

■ Shares long-term info. such as prescription, inspection results, and allergies.

■ Realizes optimal emergency medicine.

⇒ Patients can receive appropriate medical care at the best hospital.

Core hospital

Inter prefecture/state network

Effects of HIE

Patients (Residents)

- Receiving high quality medical service
- Decreasing economical and mental burden of patients and their families

Realize patient(residents)-oriented, effective and efficient medical delivery system

Medical facilities

- Efficient management by selection and concentration of medical functions
- Effective medical treatment by sharing info
- Decreasing burden of medical staff

Administration

- Establishing sufficient medical delivery system by effective use of medical resources
- Realizing reasonable medical expenses by differentiation and connection of medical functions

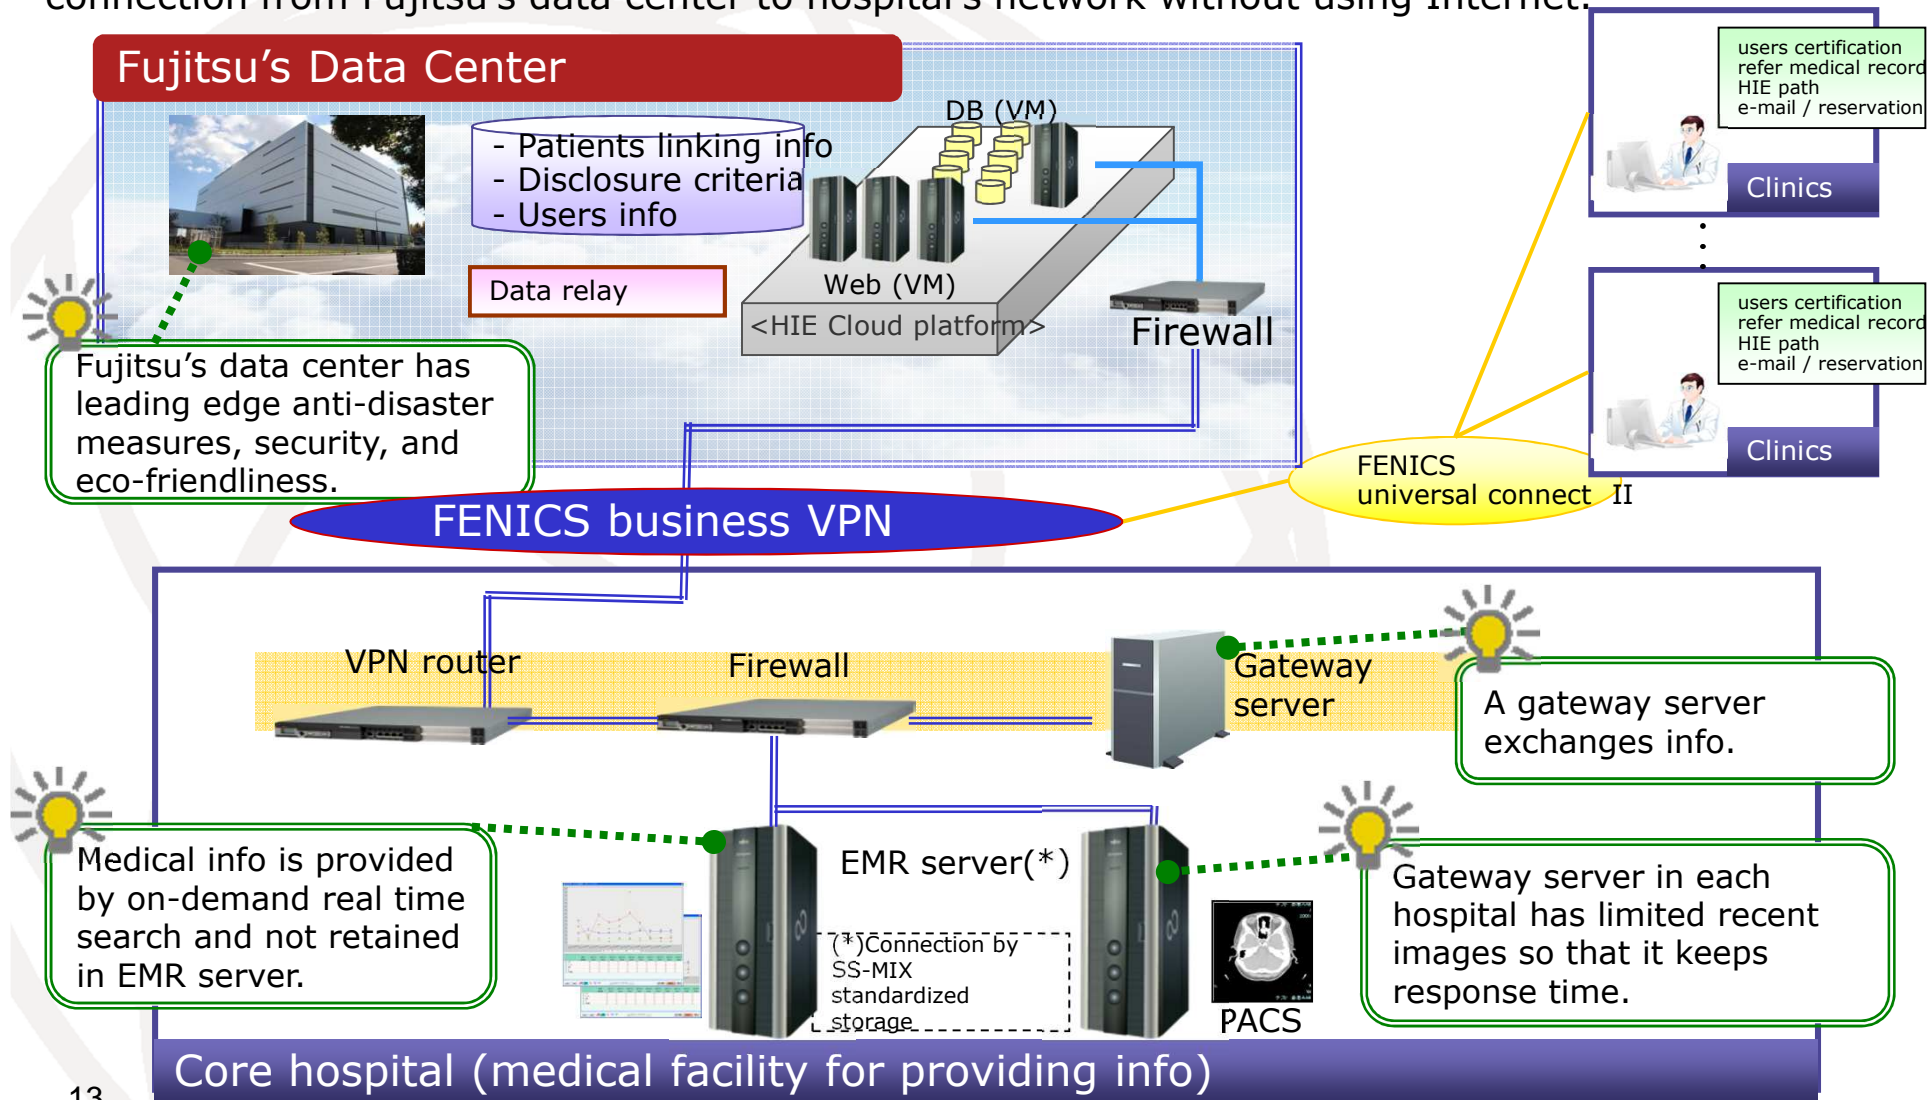

Feature of HumanBridge

HIE with robust security

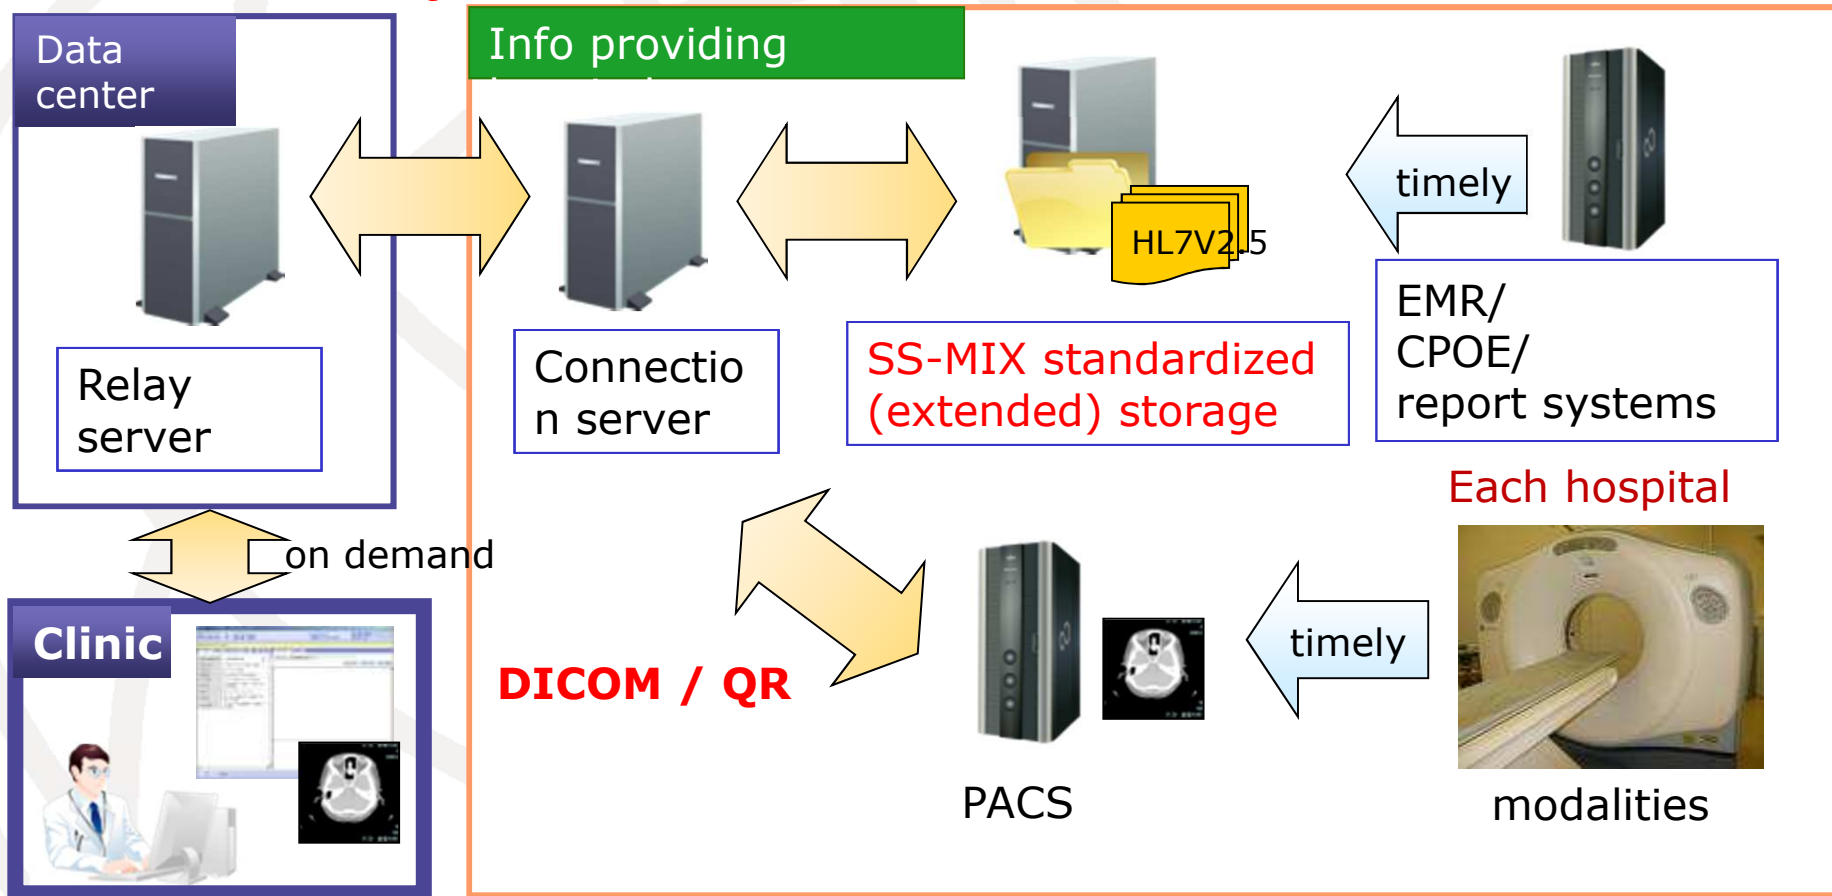

HumanBridge has robust security based on MHLW's guideline concerning safety administration of medical information systems. The security supports sharing medical information via network. Especially, SaaS model adopts closed network connection using FENICS-VPN, so that it can realize connection from Fujitsu's data center to hospital's network without using Internet.

HIE construction w/o depending on vendors

Any EMR made by any vendor can provide information via connection server, if it outputs data into **SS-MIX standardized (extended) storage**.

(*) Most of vendors has already implemented output of data into SS-MIX storage. Any PACS made by any vendor can provide information via connection server by means of **DICOM Q/R**.

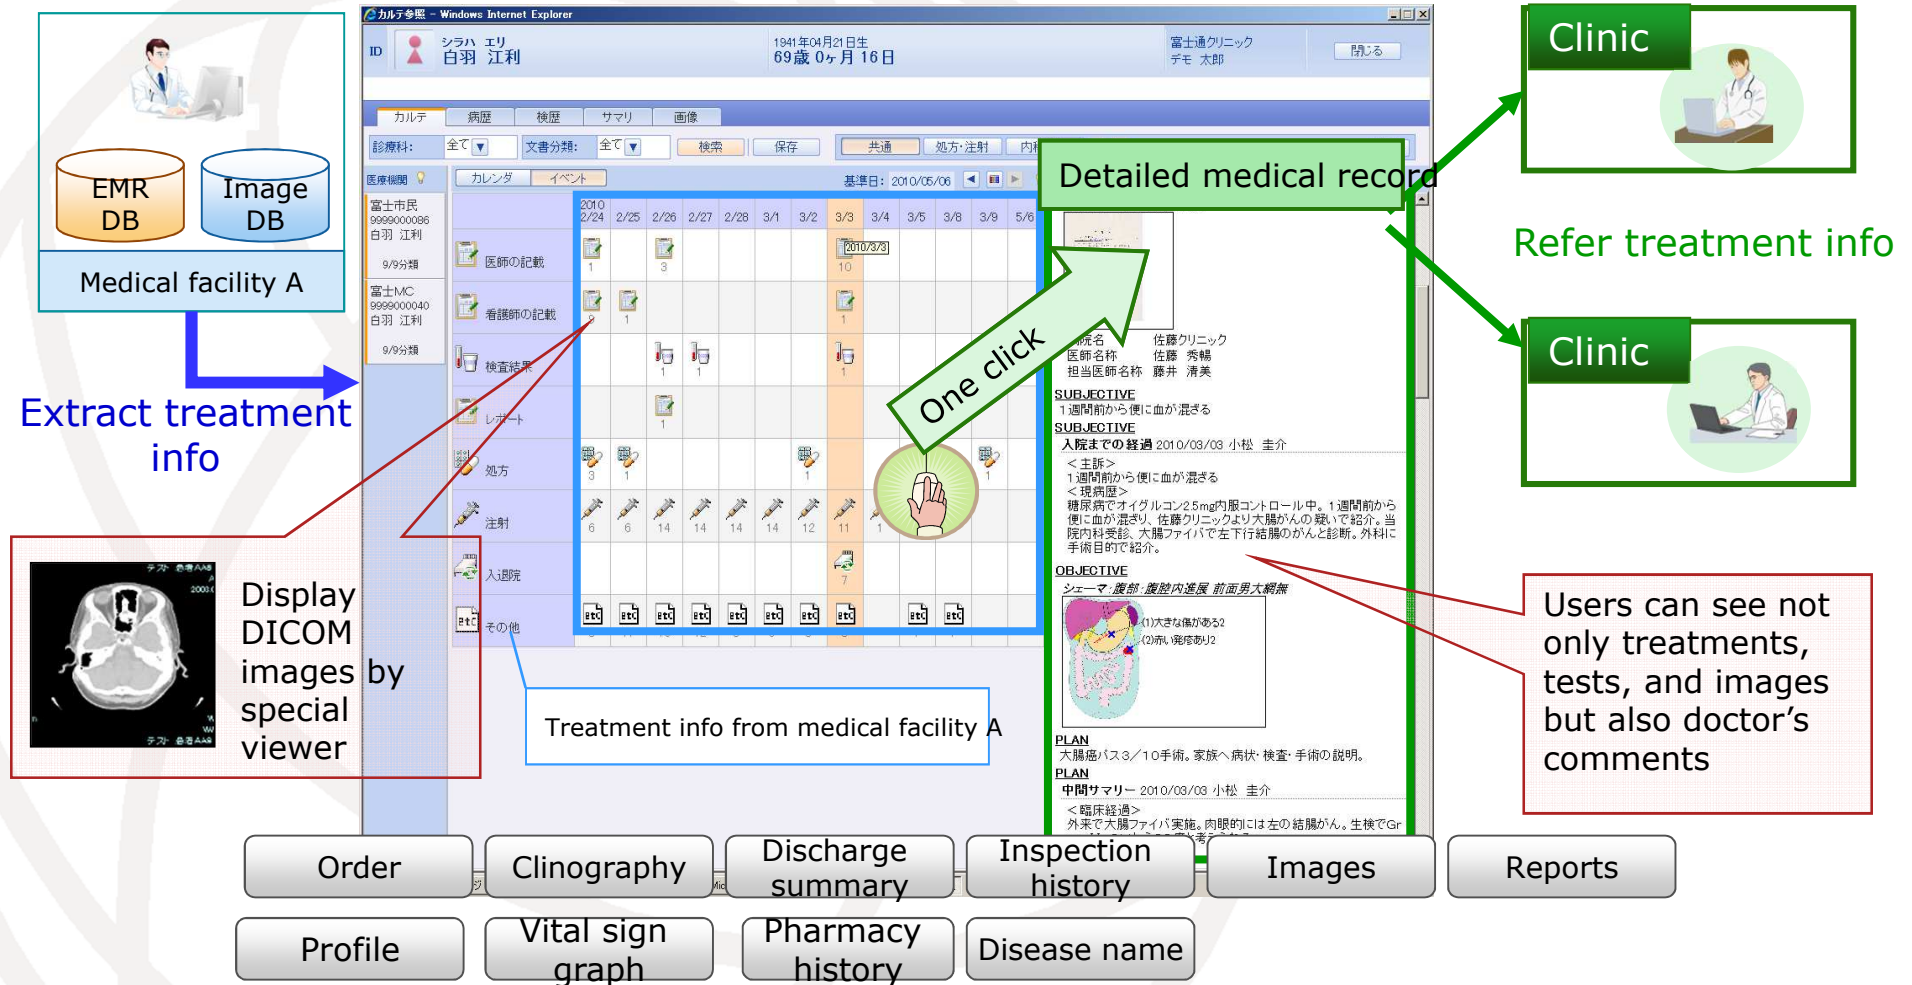

SS-MIX : MHLW's promotion of electronic medical information

Copyright 2013 FUJITSU LIMITED

Sharing all medical info in EMR

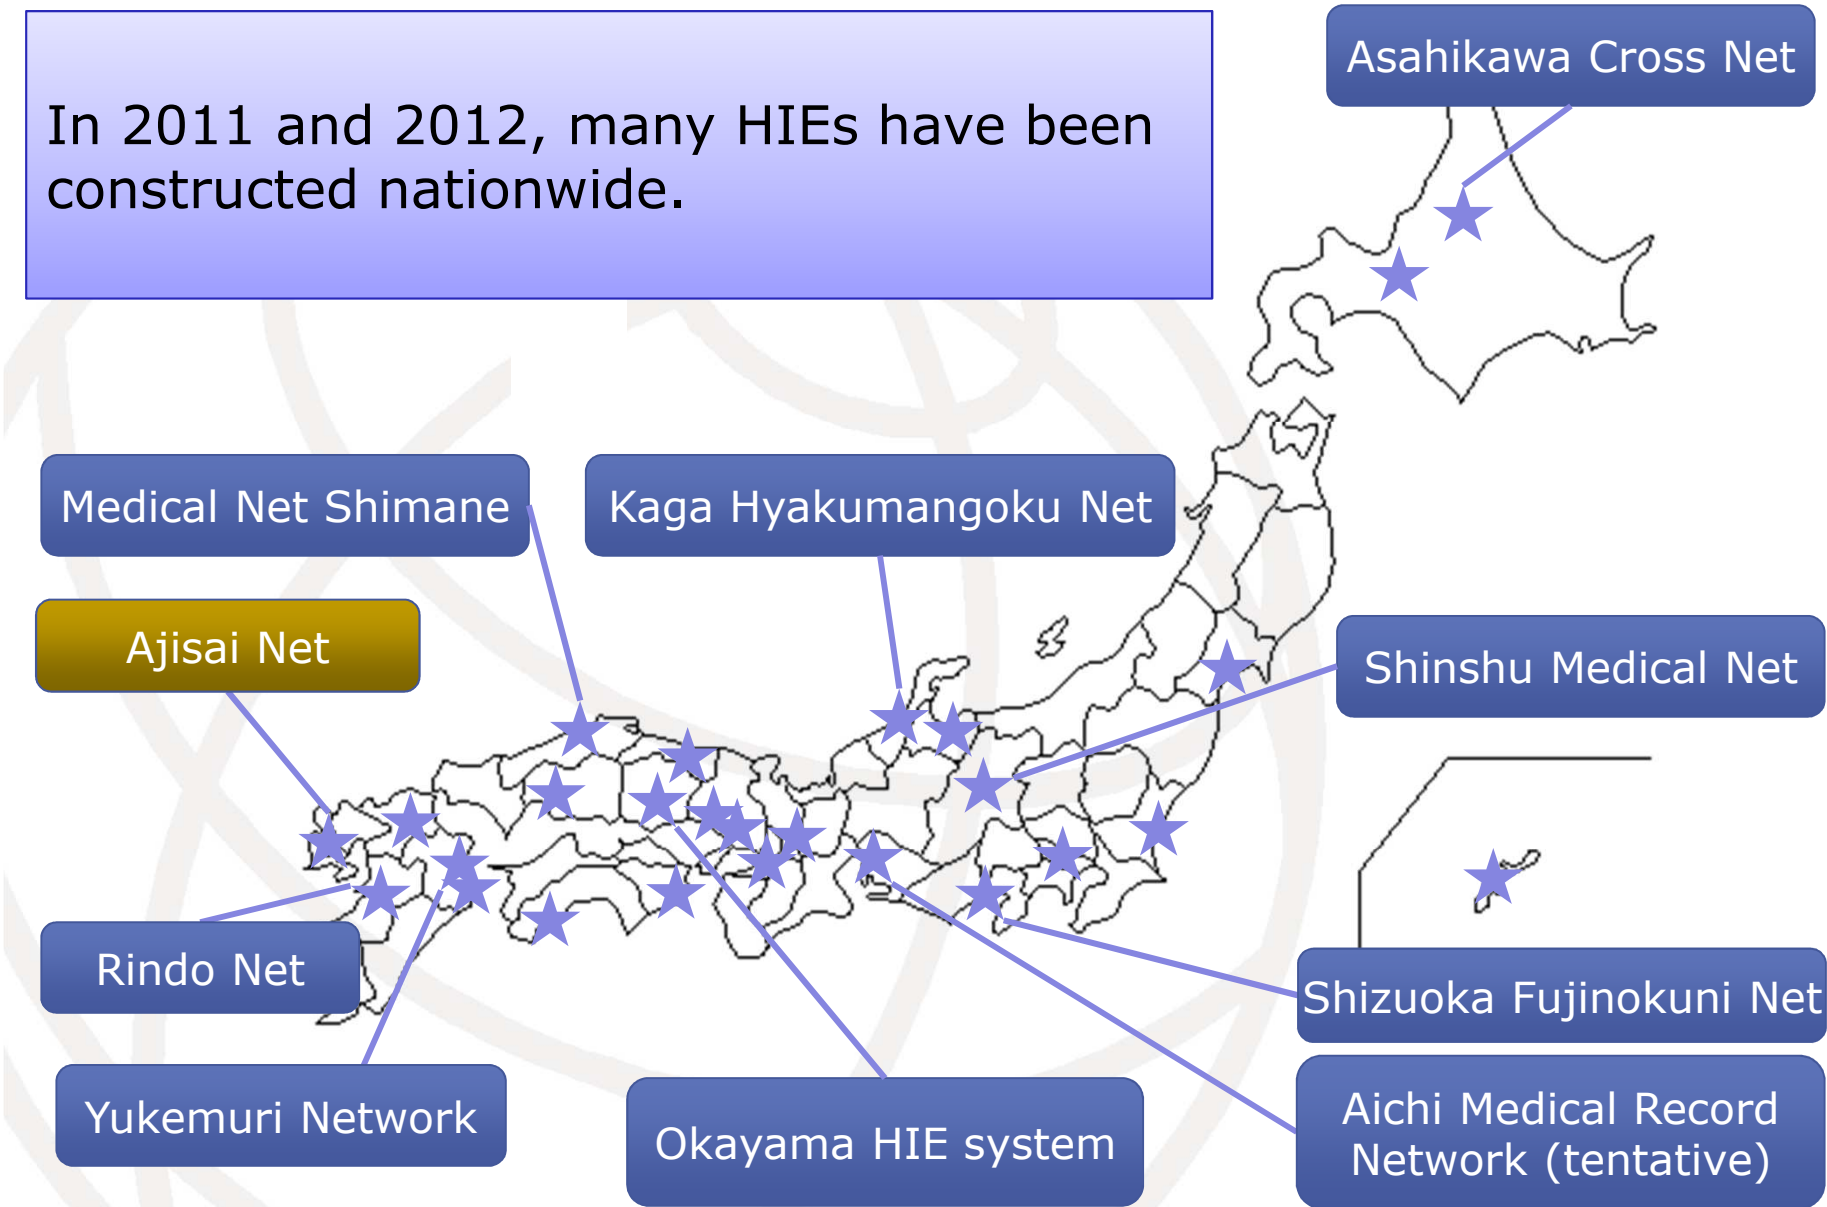

Clinic staff can refer medical treatment info of core hospitals. Therefore, patients can receive consistent medical service in a region.

Sharing medical info beyond letter of introduction and attached documents

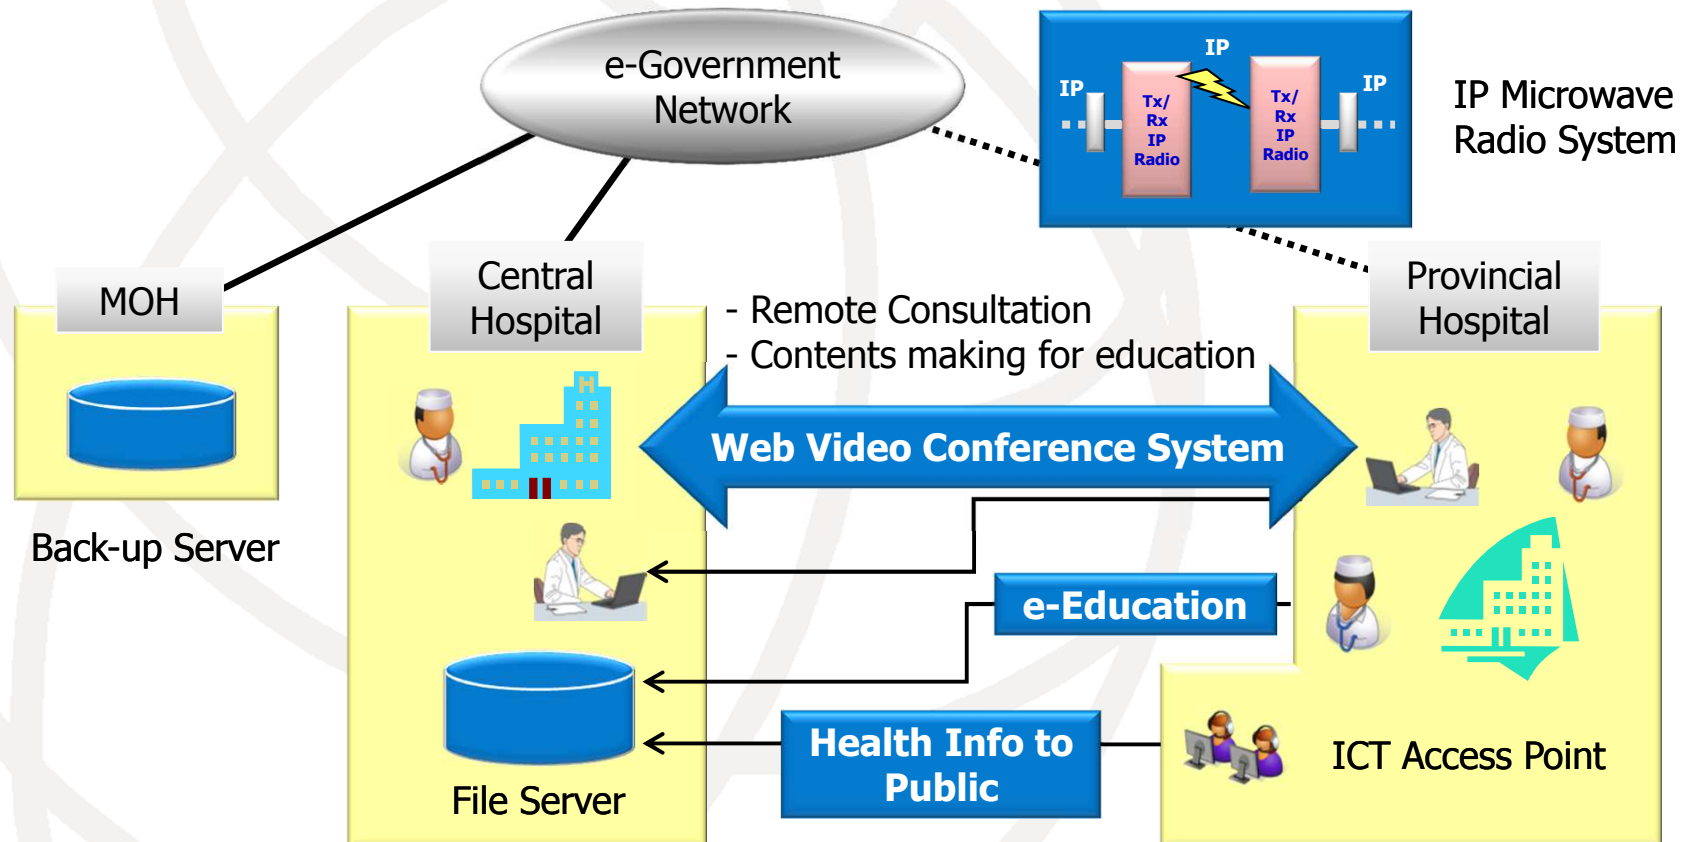

Examples of HIE

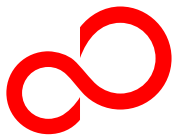

In 2011 and 2012, many HIEs have been constructed nationwide.

e-Health Pilot Project in Laos

- ◆ e-Health Pilot Project in Laos supported by APT Program
- ◆ Employ video facility to improve communication between Central and Provincial Hospitals based on the real needs of doctors
- ◆ File server implemented also for educational purpose
