

Session 3 – Reuse and Recycling of WEEE

Willie Cade, PC Rebuilders & Recyclers

**Co-Chair Environmentally Sound Testing, Refurbishment and Repair of
Used Computing Equipment Project Group**

Guideline (69 pages, work in progress):

<http://archive.basel.int/industry/compartnership/docdevpart/ppg11DraftGuidelineFinal-2011-03-15.pdf>

Context

Every country and every city around the world has citizens refurbishing and repairing!

Developing countries and countries with economies in transition are using as much technology as the developed countries.

Used

=

Waste

Used
=
Waste

A diagram illustrating a common misconception. It features the text "Used" at the top, an equals sign "=" in the center, and "Waste" at the bottom. The entire text is enclosed within a large red circle that has a thick diagonal slash running from the top-left to the bottom-right, effectively striking through the equation. This visualizes that "Used" is not equal to "Waste".

Informal = Bad

Formal = Good

By GlobeScan for the BBC Nearly 28,000 respondents in 26 countries, only 14,000 internet users

7+ Billion people on the planet

80%

5.6 Billion people believe that access
to the internet is a human right

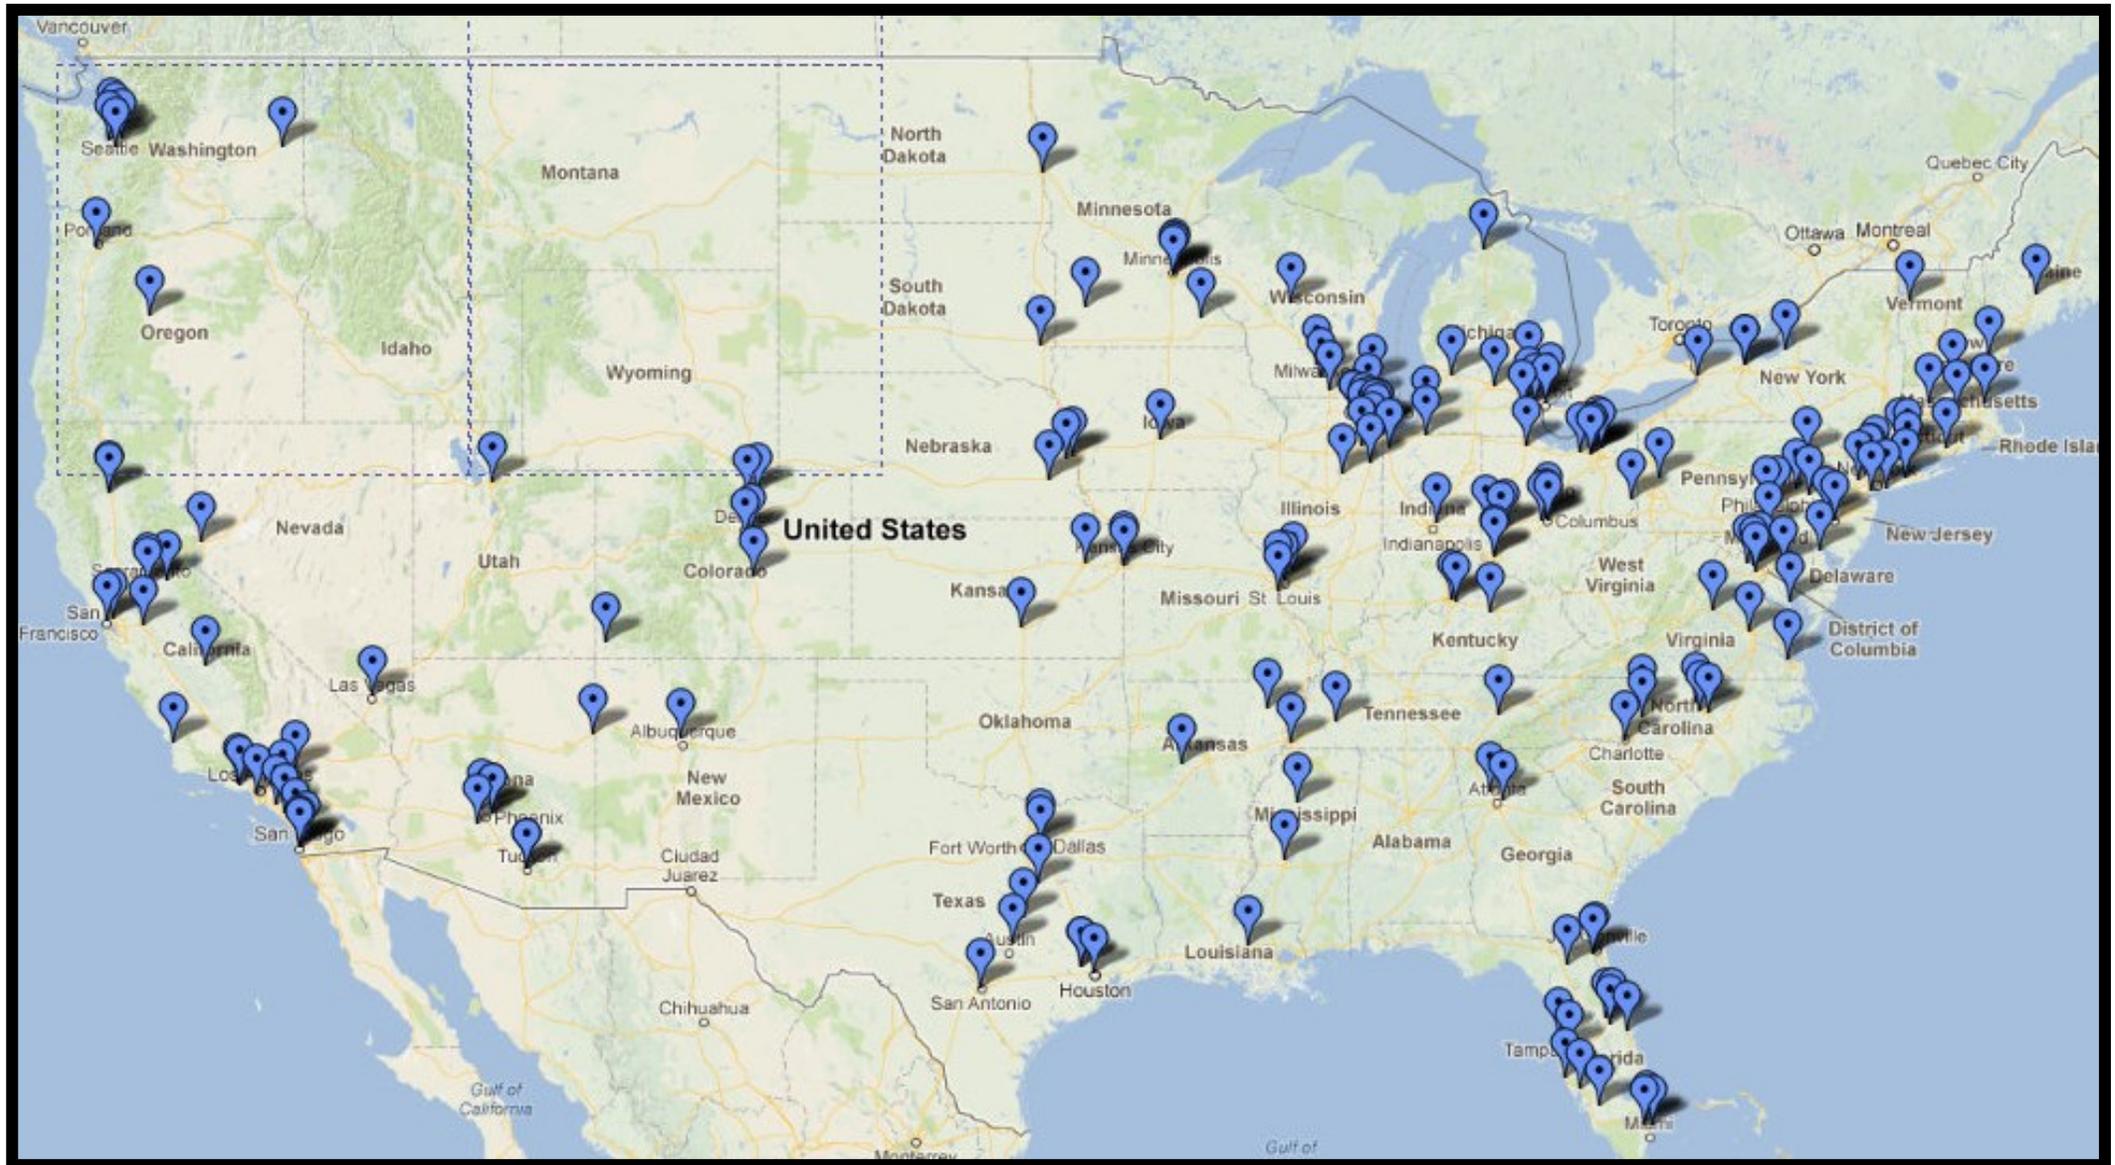

1.5 Billion PCs currently installed

4.1 Billion Needed - Used

25% < 500

PCRR Data wiping service

Reusing 1,000 tons of
PCs creates 30 more
green jobs than
material recovery

5,000 + Microsoft Registered Refurbishers throughout the world!

Reuse

Refurbish
