Title:	Liaison on definitions and terminology

LIAISON STATEMENT

For action to:	SG 2, SG 3, SG 5, SG 9, SG 11, SG 12, SG 13, SG 15, SG 16
For comment to:	-
For information to:	TSAG, SCV
Approval:	Agreed to at ITU-T Study Group 17 meeting
Deadline:	
Contact:	Antonio Guimaraes Email: ateixeira@anatel.gov.br Rapporteur of Question 1/17

In its role as Lead Study Group on Security, SG 17 has compiled a number of references and hot links to approved terminology and definitions. All of these are contained in the Security Standards Roadmap Part 1, clause 3.2.

In particular, we would like to remind you of the *Compendium of ITU-T approved security definitions extracted from ITU-T Recommendations*.

This document is a compendium of security-related definitions extracted from approved ITU-T Recommendations with a view toward establishing a common understanding (and use) of security terms within ITU-T. This listing will continue to be developed.

Also Recommendation ITU-T X.1252: Baseline identity management terms and definitions contains key terms and concepts used in identity management.

All Study Groups are invited to consult these existing vocabularies for suitable terms before attempting to develop new terms. This will reduce unnecessary duplication of effort.

We would also like to take this opportunity to remind all Study Groups of the guidance on the development of definitions set out in Annex B to the revised Author's Guide for drafting ITU-T Recommendations.
