

**Introduction**

This Questionnaire is aiming to investigate policy, regulatory and standardization needs that will be evaluated within ITU-T Study Group 5 Regional Group for Asia and the Pacific and that may lead to future activities in the Asia Pacific region. ITU-T Member States, Sector Members, Academia, and Associates are invited to provide their experiences.

**\*Please enter the name of your organization:**

**\*Please enter name of contact person:**

**\*Please enter contact e-mail address:**

## **Copper cables, networks and fibre-optic connection hardware for broadband access:**

### **More information on Question 1/5**

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## **Protective components and assemblies:**

### **More information on Question 2/5**

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## **Interference to telecommunication networks due to power systems and electrified railway systems:**

### **More information on Question 3/5**

Are you are interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## **Resistibility and safety in telecommunications:**

### **More information on Question 4/5**

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## Lightning protection and earthing of telecommunication systems:

### More information on Question 5/5

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## EMC issues arising from the convergence of IT and communication equipment:

### More information on Question 6/5

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## Human exposure to electromagnetic fields (EMFs) due to radio systems and mobile equipment:

### More information on Question 7/5

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## EMC issues in home networks:

### More information on Question 8/5

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## **Generic and product family EMC recommendations for telecommunication equipment:**

### **More information on Question 9/5**

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## **Security of telecommunication and information systems concerning the electromagnetic environment:**

### **More information on Question 10/5**

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## EMC requirements for the information society:

### More information on Question 11/5

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## Guides and terminology on environment and climate change:

### More information on Question 12/5

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## Environmental impact reduction including e-waste:

### More information on Question 13/5

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## Setting up a low-cost sustainable telecommunication infrastructure for rural communications in developing countries:

### More information on Question 14/5

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## ICTs and adaptation to the effects of climate change:

### More information on Question 15/5

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## Leveraging and enhancing the ICT environmental sustainability:

### More information on Question 16/5

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## Energy efficiency for the ICT sector and harmonization of environmental standards:

### More information on Question 17/5

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

## Methodologies for the assessment of environmental impact of ICT:

### More information on Question 18/5

Are you interested in reading ITU documents on this theme?

Has your country planned any projects related to this theme?

Has your country carried any projects on this theme?

Are you using a national or regional standard which is related to this theme?

Do you think we need to develop an international standard which is related to this theme?

**Power feeding systems:**

**More information on Question 19/5**

Are you interested in reading ITU documents on this theme?	
Has your country planned any projects related to this theme?	
Has your country carried any projects on this theme?	
Are you using a national or regional standard which is related to this theme?	
Do you think we need to develop an international standard which is related to this theme?	

**Thank you!**

**Your submission has been received and will be processed.**
