Biography

Alberto Bernal has more than 20-year of leadership experience in Consulting and Technology in the Public and Transportation Sectors. He is inspired by the challenge of providing innovative solutions to present and future global issues such as urban concentration, climate change, water and food scarcity and social and economic inequalities through new models of thinking and managing and the application of new technologies for all.

In his position as Director for Smart Cities Global Practice at INDRA, Alberto Bernal leads the business development of Smart Cities in all territories and geographies, and coordinates Indra's global smart solutions portfolio (consulting and technologies) of application to the Smart Cities domain.

Alberto Bernal also curates the design of innovative smart programmes for addressing mobility, security, environmental, energy and water, health, economic development, tourism, employment, education issues with disruptive and holistic solutions while also establishing an ecosystem of partners throughout the entire smart cities value chain, including administration, industry and associations for the promotion and dissemination of best practices and experiences in Smart Communities and Territories.

He regularly participates as an expert in Smart City fora and events globally.
