

Forum Session

Regulating the future: safe, inclusive, connected

Thursday, September 12, 2019, 11:00 AM - 12:15 PM, -

Industry convergence, digitalization and the disruption caused by new technologies and new market players is making the job of regulatory agencies more complex and interlinked than ever before, even in mature markets with strong competition. New challenges such as privacy, cybersecurity and data protection are confronting regulators with domains beyond their traditional competencies. What role should regulators play to ensure a safe, inclusive, connected future? How can stimulating innovation and fair competition be balanced against consumer protection? What examples do we have of successful cross-sectoral regulation? How can regulators, policy-makers and industry work together to create an environment for the digital economy that is both enabling and secure?

Open to Leader Pass, Executive Pass, Forum Pass, and Media Pass holders

Moderator

Mr. Philippe Defraigne, Founding Director, Cullen International S.A., Belgium
