

## Paola Tonelli

Ms. Tonelli currently serves as Senior Director Industry Advocacy for Vodafone Group Plc. She is responsible for leading and coordinating Vodafone companies' representation in industry fora, dealing with third generation mobile systems.

She is the current Chairperson of the Operators Group of the UMTS Forum. In this capacity, she championed a series of 3G market studies that shed new light on the service revenue potential of 3G services worldwide. As a member of the Operators Harmonization Group, she also supported many harmonization activities, including the recent workshop on IP-based network evolution.

Previous assignments at AirTouch Communications included planning for intelligent network capabilities for AirTouch's cellular network and developing requirements for elements of the ground network of the Globalstar satellite system. In 1991-1992, she was AirTouch's Italian industry and Government liaison during AirTouch's bid for a cellular license in Italy.

Prior to joining AirTouch, Ms. Tonelli served in various technical and management positions at Pacific Bell. She started her career as a system engineer at AT&T Bell Laboratories.

Ms. Tonelli studied Theoretical Physics at the University of Parma, Italy, and received a degree in Physics at San Diego State University. In addition, she studied Mechanics and Structures at UCLA and Computer Science at Bell Laboratories.
