Information Society Statistics Map 2005

Broadband subscribers* (m)

Top 25 economies, December 2005

The designations employed and the presentation of material in this map do not imply any opinion whatsoever on the part of ITU concerning the legal or other status of any country, territory or area or any endorsement or acceptance of any boundary.

*Broadband subscribers refers to services equal to or greater than 256 kbit/s in one or both directions, but the total does not include 3G with mobile internet access.

This map of digital opportunity worldwide has been produced on the basis of data in the ITU Information Society Statistics database.

The five indicators highlighted in the map are measures of the penetration of information and communication technologies (ICTs) worldwide. ITU works with other partners in the inter-agency Partnership for Measuring ICT Development in defining a core set of indicators that can be used for measuring progress in bridging the digital divide and implementing the outcomes of the World Summit on the Information Society (WSIS).

Fixed lines per 100 inhabitants: 19.8 Mobile subscribers per 100 inhabitants: 33.9 PCs per 100 inhabitants: 13.4 Estimated internet users per 100 inh.: 15.2 Broadband subs. per 100 inhabitants.: 3.3
