

The ITU SDG Mapping Tool

The 'ITU SDG Mapping Tool' aims to provide a comprehensive visual overview of ITU contributions to the Sustainable Development Goals, by visualizing the mapping and the linkage of the **ITU strategic framework**, **Connect 2020 Agenda**, **WSIS Action Lines** and the **SDGs**.

Information and data are in full alignment with the ITU strategic and operational plans, aiming to demonstrate the contribution of ITU's work to the 2030 Agenda and address and simplify reporting requirements towards the SDG implementation.

The ITU SDG mapping tool is available at: <https://www.itu.int/sdgmappingtool>

Mapping ITU activities to the SDGs

The tool follows the structure and content of the ITU strategic plan and demonstrates how the ITU activities contribute to the SDGs and related Targets, as well as how the different strategic frameworks (SDGs, WSIS and Connect 2020) are mapped to the activities of the 3 ITU Sectors, as well as the Inter-Sectoral activities.

Overall mapping of the ITU activities to the SDGs

The tool generates a tree-map based on the ITU strategic plan's Outputs and provides detailed information, at the level of the activities of the organization, on the contribution to all 17 Sustainable Development Goals.

The tool allows the user to navigate through the SDGs and get more information on the **Objectives** (the specific aims of the Sectoral and inter-sectoral activities), their **Outputs** (the final tangible results, deliverables, products and services implementing the operational plans) and the various **Activities** of the organization performed under each Output.

Navigation through SDGs and ITU strategic frameworks

Objective	Output	Activity ↑	Title
R.1	R.1-1	R.1-1.1	WRC-15 and updated Radio Regulations
R.1	R.1-3	R.1-3.1	Rules of Procedure adopted by Radio Regulations Board (RRB)
R.1	R.1-4	R.1-4.1	Processing of space notices and other related activities
R.1	R.1-5	R.1-5.1	Processing of terrestrial notices and other related activities
R.1	R.1-6	R.1-6.1	RRB decisions other than the adoption of Rules of Procedure
R.1	R.1-7	R.1-7.1	ITU-R software
R.2	R.2-1	R.2-1.2	Future development of IMT for 2020 and beyond
R.2	R.2-1	R.2-1.5	Development and deployment of international public telecommunications via satellite in developing countries

The user can also drill down to specific SDG Targets to navigate through the ITU activities contributing to this particular target, providing searching and filtering functionality per Sector or any element of the ITU strategic framework (Objectives/Outputs/Activities).

Contribution of the ITU Sectors to the SDGs

Navigation through Connect 2020 Agenda Goals

Navigation through the WSIS Action Lines

Linkage of the ITU Objectives to the SDGs

Automated reporting capabilities

The tool also provides the ability to create automated reports, overall for all SDGs or for specific Targets, filtered per Sector or per Inter-sectoral activities.

Integration with the ITU ERP system

The tool has been designed to be able to integrate with the ITU Enterprise Resource Planning (ERP) system, enhancing monitoring and reporting functionality.

Frequently Asked Questions

Q. Is the tool currently available in all 6 ITU official languages?

A. The ITU team is currently working to provide all information available in 6 languages, following the practice in place for the ITU Annual Report.

Q. Are ITU Member States and partners able to feed the tool with projects and initiatives also contributing to the implementation of the SDGs?

A. The tool currently presents the linkages of the activities of the ITU to the SDGs, as they are outlined in the operational plans of the ITU Sectors and the General Secretariat. The tool can be configured to integrate the visualization of other sources of information, such as the WSIS Stocktaking database.

Q. Is there a World Map functionality to show the regions or countries impacted by ITU's work?

A. Phase II of the tool (under development) will include World Maps demonstrating the location and coverage of the ITU activities.
