

Promoting a Culture of Cybersecurity New Zealand Case Study

TU Regional Cybersecurity Forum for Asia-Pacific 2008

→ **Richard Beach, Senior NetSafe Consultant, NetSafe**

New Zealand in Context

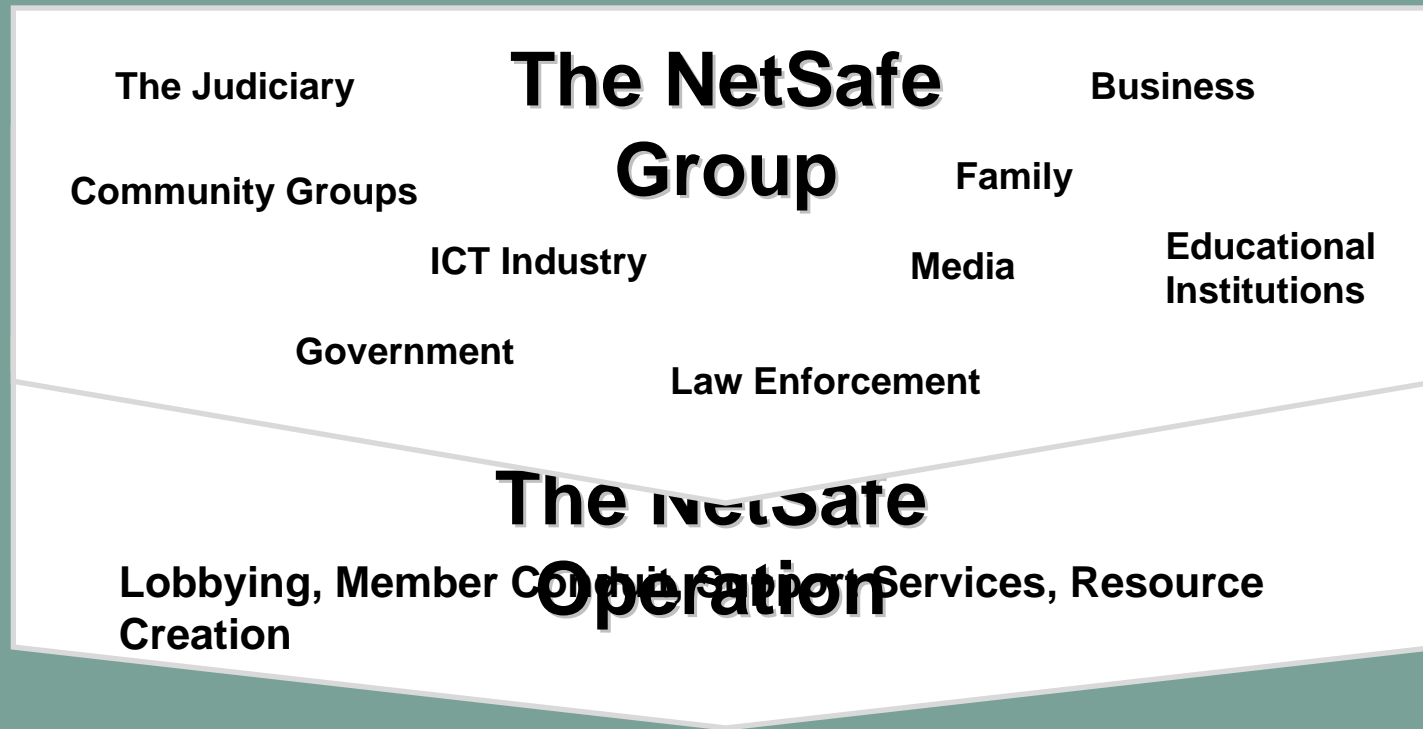

- Pop 4.2 million
- Parliamentary Democracy
- Literacy Rate 99%
- Nation of small businesses
- 16.5 broadband subscribers per 100 inhabitants
- Jack of all trades

Digital Strategy

The Draft Digital Strategy 2.0
Ministry of Economic Development

Achieving a Cybersecurity Culture

- V.B.1. Cybersecurity plan for government-operated systems
 - V.B.2. Security awareness programmes for users of systems and networks
 - V.B.3. Encourage a culture of security in business enterprises
 - V.B.4. Attention to the needs of children and individuals
 - V.B.5. National awareness program
 - V.B.6. Enhance science and technology, and R&D activities
 - V.B.7. Review privacy regime to include online environment
 - V.B.8. Develop awareness of cyber risks and available solutions
- Provide budget support

Achieving a Cybersecurity Culture

- V.B.1. Cybersecurity plan for government-operated systems
 - V.B.2. Security awareness programmes for users of systems and networks
 - V.B.3. Encourage a culture of security in business enterprises
 - V.B.4. Attention to the needs of children and individuals
 - V.B.5. National awareness program
 - V.B.6. Enhance science and technology, and R&D activities
 - V.B.7. Review privacy regime to include online environment
 - V.B.8. Develop awareness of cyber risks and available solutions
- Provide budget support

CHILDREN AND INDIVIDUALS

Cybersafety Programmes

A green background with a silver chain and a black ball. The chain is on the left, and the ball is in the lower center. A long shadow of the ball and chain extends from the left towards the right side of the image.

Oh great!

Here come
the fun police.

Cybercitizenship Pathway

Cybercitizens manage their use of information and communication technology (ICT) with integrity and confidence.

		Beginner		Apprentice		Practitioner		Master	
		ECE Students will:	Year 0-2 Students will:	Year 3-4 Students will:	Year 5-6 Students will:	Year 7-8 Students will:	Year 9-10 Students will:	Year 11-13 Students will:	
ATTRIBUTES	Connected	Identify some ICT devices by name and describe what they can be used for. <ul style="list-style-type: none">• Match pictures of ICT equipment with names• Choose an appropriate technology for a specified action	Share ideas about how ICT is used by themselves, their families and friends, or people they know about (e.g. doctor, teacher). <ul style="list-style-type: none">• Make a chart of ICT in their home• Categorise a range of ICT devices into areas such as who uses it and for what purpose	Describe ways in which particular groups of people use ICT in their personal or professional lives (e.g. friends, sports clubs, emergency services). <ul style="list-style-type: none">• Brainstorm a list of all of the functions of a mobile phone and how these could be used in various groups• On a visit to a shopping centre, airport or other public place, survey the range of ICT devices and their uses	Explore and discuss both positive and negative impacts of the use of ICT in their own lives and those of their peers and family. <ul style="list-style-type: none">• Keep a log of time spent on various activities including time online• Compare time spent engaged in similar activities which take place offline and online e.g. playing games, writing to friends and family, watching video clips	Explore the concept of integrity as it relates to their own use of ICT. <ul style="list-style-type: none">• Discuss reactions to age verification requirements on websites• Create a database or chart of games owned by class members and include censorship ratings	Examine how individual integrity can influence relationships and perceptions within online networks. <ul style="list-style-type: none">• Discuss how online profiles can create an inaccurate picture of an individual• Debate issues around online programs	Explore the relationship between trust, integrity, and confidence with regard to the use of ICT in society. <ul style="list-style-type: none">• Examine how technology organizations gain the trust of individuals through devices such as branding and advertising• Investigate the processes that take place when one person or device communicates to another e.g. biometric authentication, digital certificates	
	Safe	Identify people who can help when using ICT and seek their help when appropriate. <ul style="list-style-type: none">• Answer questions while viewing the pass or logging in to stores which address a cyber risk• Seek help from educators and other adults in an ECE setting	Describe and use safe practices (including identifying people who can help), which maintain personal safety when using ICT. <ul style="list-style-type: none">• Create and use a password to access class or school ICT resources. More able children could create a strong password• Develop a list of people who can be contacted for help in the event of a cybersecurity incident	Identify risks and use safe practices which help maintain both personal safety and the safety of equipment when using ICT. <ul style="list-style-type: none">• Draw lines to match potential risks with safe practices designed to minimize those risks• Design a poster for use online and discuss whether it is ok to share this information with classmates	Access and use information to identify cybersecurity risks to themselves or equipment, and make safe choices when using ICT. <ul style="list-style-type: none">• Hold a telephone or video conference with an expert from the information security industry• List external sources of help for people in their age group such as telephone helpline, school counsellors, online agencies etc.	Access and use information to identify risks, and develop strategies for managing cybersecurity risks to themselves or equipment. <ul style="list-style-type: none">• Conduct a 'audit' of ICT equipment at home or school looking against basic security risks• Analyse media reports of cybersecurity incidents involving young people and write alternative outcomes based on adherence to the principles of cybercitizenship	Investigate the impact of societal and media influences on personal safety when using ICT and practice strategies to minimise subsequent risk. <ul style="list-style-type: none">• Create a list of external (such as peer pressure) and internal influences which affect personal choices regarding a variety of online interactions• Identify a range of agencies which offer personal health and safety services to young people	Analyse contemporary cybercitizenship issues, and describe how this analysis could positively influence personal use of ICT. <ul style="list-style-type: none">• Debate cybercitizenship issues such as the use of mobile phones in school• Compare personal beliefs with cybercitizenship guidelines from a range of sources and discuss	
	Responsible	Follow family and group guidelines for using ICT. <ul style="list-style-type: none">• Discuss appropriate behaviour when using various ICT equipment• Write the name, make, and point of sale of their photo to a poster of ICT rules	Follow basic guidelines and practices that promote responsible use of ICT. <ul style="list-style-type: none">• Use the school network or learning management system to post positive messages to other class members• Design a poster based on one of the class or school cybersecurity rules and guidelines	Contribute to and use basic guidelines and practices that promote cybercitizenship and socially healthy use of ICT. <ul style="list-style-type: none">• Collectively design class cybercitizenship guidelines• Within a roster, take responsibility for basic maintenance of ICT equipment e.g. checking antivirus software is up to date	Research current cybercitizenship guidelines and practices which are relevant to their own use of ICT and take action to promote cybercitizenship to their peers and family. <ul style="list-style-type: none">• Brainstorm the school cybercitizenship use agreements and provide feedback to the school cybercitizenship team• Create a role play which addresses a cybercitizenship issue• Look for commonalities between terms and conditions from favourite websites	Compare cybercitizenship practices within peer groups in line of existing rules, guidelines and social conventions and use this information to promote cybercitizenship within a school or social network. <ul style="list-style-type: none">• Run a peer group cybercitizenship survey and publish a report online• Conference online with a class from another country to discuss cybercitizenship and rules that could about their experiences with technology and cybercitizenship	Identify the rights and responsibilities of users of ICT and use this information to promote cybercitizenship within a range of social networks. <ul style="list-style-type: none">• Invite a representative from a mobile phone company to discuss contractual obligations when subscribing to a network• Create a public service announcement which addresses a cybercitizenship issue• Examine the effects of copyright theft from the position of copyright holders	Advocate for individual and collective action which enhances cybercitizenship. <ul style="list-style-type: none">• Write to politicians or producers of ICT equipment, software or services with suggestions for initiatives which enhance cybercitizenship• Conduct research which compares and evaluates cybercitizenship guidelines from a range of sources and follow up with suggestions for any found inadequate

Challenges

- Low media interest in positive initiatives
- Human response to 'non-immediate' threats
- Funding
- Cutting edge – no clear path
- How do we measure success?
