

Title: **Broadcasting and Telecom Convergence in Korea**

- Some Regulatory Issues and Problems to be solved -

Abstract:

This presentation explains several specific cases of recent broadcasting and telecom convergence in Korea focusing on some regulatory issues and problems to be solved. As we can see from the recent trend of technical developments and their convergence, the convergence of broadcasting and telecom will become a global policy issue in the near future. It is worthwhile for other countries to consider and review specific issues and problems regarding the convergence confronted in Korea using it as a reference for establishing their related policies.
