

# Capacity Building Workshop on Information Society Statistics: Infrastructure, Household and other Indicators

November 6-8, 2007 UNCC Bangkok

## Objectives

- ❖ to inform the Members of the ICT indicators in the region from various UN and other Inter-governmental agencies, their purpose and data availability
- ❖ to discuss indicators currently collected by ITU including definitions
- ❖ the need for new indicators and their collection methodology
- ❖ the use of these indicators in policy making and regulation
- ❖ to discuss challenges related to information society measurements, present possible solutions and identify technical assistance needs.

All the presentations and material are/will be available on the web:
