

"ITU-T new environment: ready for the day after"

Abstract: The presentation will present new tools and new initiatives put in place according to WTSA-04 and PP-06 Resolutions to ease the participation of developing countries in standardization studies e.g. by means of regional groups, to reduce the standardization gap thanks to workshops and new web based tools, such as webinar, to have more effective dissemination of information useful to implement the networks, to show new strategies adopted to involve universities for standardization activities on new emerging technologies, to initiatives where non-members can participate, e.g. focus groups, also with the aim to create new membership opportunities and a more worldwide standardization approach to ICT.
