

**ABSTRACT**  
**for Development Forum**  
**Yogyakarta, Indonesia, 27-29 July 2009**

**International and national spectrum regulatory frameworks**  
**(Colin Langtry)**

This presentation provides an overview of the international framework for managing the radio frequency spectrum. From this base, requirements for national spectrum management activities are identified and information is provided about the numerous ITU-R resources (Handbooks, Recommendations, Reports) that are available to assist spectrum managers.
