SUMMARY OF WORK EXPERIENCE

Dr. de Silva has over 25 years experience in the Communications Industry, Strategy, Regulatory, Marketing and Technology areas.

Between 1987 and 1992, Dr. de Silva worked for the International Telecommunications Union (ITU). As a ITU Senior Expert, he was advising and working with carriers in the Asia/Pacific region, in planning and optimising telecommunications services investments and business strategies for intercountry services. Whilst with the ITU Dr de Silva has worked in over 30 countries.

Before joining the ITU, Dr. de Silva worked for the Australian Federal Government as a Communications Specialist where he provided technical leadership to build and operate networks for Federal Government Agencies. Dr. de Silva was a key member of the team that implemented Australia's first packet switched network. Dr de Silva is the founding Director of TelSoft Pty Ltd. Presently TelSoft is assisting a number of Telecommunications operators including operators in Indonesia to migrate to NGN.
