

## **Official Invitation**

### **Global VSAT Forum Seminar**

### ***“Satellite Regulation: The State of the Art”***

**6 December, 2001  
8:30 a.m. – 12:30 p.m.**

### **Hotel Intercontinental Geneva**

Dear Regulatory Officer:

Your organization is cordially invited to attend an exclusive Seminar on international satellite regulatory trends and best practices. The meeting objective is twofold: Obtain an update of national regulatory trends related to VSAT-based satellite communications; and examine *regional* regulatory initiatives that are effectively facilitating VSAT-based services around the world.

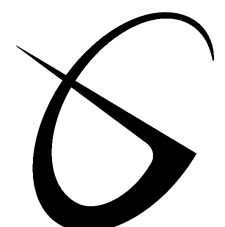

The Seminar is hosted and organized by the Global VSAT Forum (GVF), the non-profit non-partisan association of the satellite telecoms sector. The GVF consists of more than 130 members from 37 countries in every major region of the world and from every industry sector, including carriers, satellite operators, network licensees, manufacturers, system integrators, consultants, educators, and others.

The program will include expert presentations and open-forum discussion on how new regulatory approaches are unlocking the potential of VSAT-based solutions to help fulfill policy objectives. In addition, a briefing will be provided regarding a new global survey that shows how advanced regulatory regimes are being applied in each world region.

Please find attached a registration form for the Seminar. Admission is free, but seating is limited so please register in advance to assure representation for your administration. We look forward to seeing you in Geneva.

Very Best Regards,

David Hartshorn  
Secretary General  
Global VSAT Forum
