

## Break-out Session A: Investment in a NGN World

- Effect of migratory path to NGNs?
- Legacy and new, networks and regulation, to coexist?
- Investment where revenue is declining
- Balancing needs of players
- Where and how should regulation be applied?
- Regulatory holidays and emerging services?
- Do we understand enough? When will NGN investments be amortised?
- Risk that consumer demand alone will not yield ROI?
- Challenge: to ensure that incentives for investment are not distorted through policy/regulation and to balance regulatory and investment risks
