Sex: Female

Year of participation: Youth Forum Asia 2004

Country of origin: P. R. China

Profession: Student (recently graduated)

University: Nanjing University of Posts and Telecommunications

Field of Study: Computer Science

Degree: Master

Ms. Jingjing Yan (Alumni of Youth Forum Asia 2004) just got her Master degree in Computer Science from Nanjing University of Posts and Telecommunications when she was interviewed.

Ms. Yan learned about ITU-Telecom Youth Forum from her university. She was sure that this particular activity would be a wonderful chance to learn more about the ITU and its activities as well as to activate her thoughts. She participated in the ITU-Telecom Youth Forum Asia in 2004, which turned out to be a great opportunity for her to know more about telecom industry of the world, as well as many famous companies in this field. She could never forget that night she worked together with other Forum participants to draft the Youth Declaration, which was presented at the end of the event.

Ms. Yan thanks ITU very much since she can still get some on-line courses provided by the ITU Youth Programme through the Young Leaders in ICTs

Network after she went back to her home country. At the same time, she keeps in touch with other Youth Forum Alumnae to share ideas in the ICTs issues.
