Subject: Coordination Request for **USASAT-NGSO-3Q**

Dear Sir,

With reference to Radio Regulations Article 9, No. 9.6., enclosed please find a Request for Coordination for USA non-geostationary orbit (NGSO) satellite network USASAT-NGSO-3Q. The operating agency for the network is Space Exploration Technologies Corp.

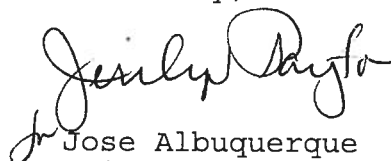

The electronic filing for the Request for Coordination was submitted via the ITU Web Interface for e-Submission of Satellite Network Filings. The electronic Space Capture .mdb file was checked with SpaceVal software version 8.0.19 available from the ITU website. There are no errors that need to be corrected.

Also enclosed is one Microsoft Word file containing Notes by the Administration.

We kindly ask the BR to initiate the relevant procedures under Article 9 of the Radio Regulations with regard to this network.

If further clarification is necessary, we are pleased to be at your disposal.

Sincerely,

  
Jose Albuquerque  
Chief, Satellite Division  
International Bureau
