Subject: Modification of the Advance Publication Information (API) of the NSS-G2-17-1 Satellite Network

Dear Sir, Madam,

The Administration of the Netherlands hereby submits to the Radiocommunication Bureau the following modification to the Advance Publication Information (API) via e-Submission:

- NSS-G2-17-1 (BR Notification ID: 122545320) onboard SES-4 (22°W)

This submission pertains to operations in the C-band, covering the frequency ranges 3 400–4 200 MHz and 5 850–6 525 MHz.

The modifications for this satellite network include:

- The addition of associated space stations for ISL operations under RR No. 4.4.

All relevant information has been verified using the latest version of the ITU BRSIS validation software. The results confirm that no fatal errors were detected.

The following file is included with this submission:
NSS-G2-17-1.mdb

- Modification of NSS-G2-17-1 (BR Notification ID: 122545320)

The Administration of the Netherlands remains at your disposal should any additional information be required.

We thank you for your kind attention to this matter.

Yours sincerely,
on behalf of
The Minister for Digital Economy & Sovereignty,

A handwritten signature in blue ink, appearing to read 'RAR', with a long horizontal stroke extending to the right.
