**Subject: Modification to the Request for Coordination of the D-BLUEBIRD
Satellite System**

**Reference: Submission of the Request for Coordination for D-BLUEBIRD,
Notice ID 125520145, dated 3 October 2025**

Our reference: 223-3 D-BLUEBIRD REV CRC 20260924

Dear Madam, dear Sir,

In accordance with Section II of Article 9 of the Radio Regulations, the Administration of Germany hereby submits a modification to the Request for Coordination (CR) information for the non-geostationary satellite system D-BLUEBIRD. This Administration would also like to provide the following clarification regarding the changes introduced through this modification.

Following a review of the submitted information of the coordination request for the D-BLUEBIRD satellite network (Submission Reference D2025-76740, Notice ID 125520145), received by the Bureau on 3 October 2025, some unintended discrepancies were identified in the SpaceCap database concerning the association between service area numbers and the corresponding GIMS service area diagrams. This modification incorporates the necessary corrections through the addition of new groups with the appropriate service area associations. In addition, new groups and beams covering additional frequency assignments have been included.

The modifications are summarized in Table 1. For clarity, this modification includes only the groups for which changes are being submitted. All other groups included in the original submission and not identified in this modification are intended to remain unchanged and should not be suppressed. To avoid any doubt, for the SDL40 SDL46, SUL40, and SUL46, the intention is to add Regions 1 and 3 while also maintaining the service area from the prior filing that included Region 2.

Lastly, this Administration requests that the operating agency name associated with code 216 be modified/updated as follows:

From: 224 — SATCO **To:** 224 — AST SpaceMobile Germany GmbH

Table 1: Summary of modifications to the D-BLUEBIRD coordination request

Beam name	Beam Action code	Direction	Group id	Group Action code	Freq Min (MHz)	Freq Max (MHz)	Service Area	GIMS #
