

ITU-T Workshop “Opportunities and Challenges in Home Networking”

Abstract

Geneva, 13 – 14 October 2005

Speaker: Lee Hyungkyu, Electronics and Telecommunications Research Institute
Session: Session 4: Security and Digital Rights Management
Title of Presentation: Security framework for remote access in the home network

The intent of this presentation is to discuss the proper security technology for remote access to home network. In this talk, we present three distinct sections: 1) What we need for home network security; 2) security framework for remote access; 3) How to adopt the existing security technologies. We'll mainly describe those issues about home network security from the view point of home gateway centric solution.
