

ITU-T Workshop

“Opportunities and Challenges in Home Networking”

Abstract

Geneva, 13 – 14 October 2005

Speaker: BENJAMIN BARLAUD
FRANCE TELECOM R&D

Session: # : Session 6 : Electromagnetic Interference in the Home Environment

Title of Presentation: Electromagnetic security issues in Home Networking environments

This presentation deals with information security regarding electromagnetism. Malicious intent concerns companies, but nowadays takes place closer to the people, at home. Usual protection means must be completed by electromagnetism means to avoid, for example, information leakage by unintentional signal radiations.
