

# ITU-T Workshop

## “Opportunities and Challenges in Home Networking”

CV

Geneva, 13 – 14 October 2005

---

**Kazuhiro TAGUCHI**

Director, Standardization Promotion Division, NICT

Session: **1: Worldwide Status of Home Networking**

Title of Presentation: **Current Developments in Home Networking in Japan**

---

Kazuhiro Taguchi is the Director of Standardization Promotion Division, in the National Institute of Information and Communications Technology, NICT. He is responsible for promoting and supporting standardization activities in ICT (Information and Communication Technology) field.

Prior to NICT, Mr. Taguchi was the Senior Technology Office for CATV, in the Ministry of Internal Affairs and Communications (MIC) Japan. He led several important discussions during this position, such as matters in SG9, cable television technologies overviews, interoperability and open vendor scheme in Japanese cable television industry.

He joined to the Ministry of Posts and Telecommunications 1988, since then he has worked for wide range of telecommunication policy matters, includes R&D strategy planning, frequency allocation, mobile telecommunication business, and broadcasting technology and so on.

Mr. Taguchi holds a BS and MS degree in Nuclear Physics, from Tohoku University.
