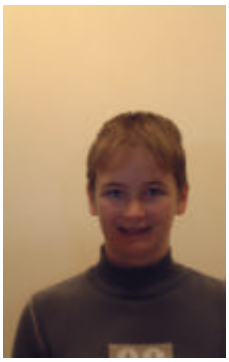
ITU-T Workshop
"Opportunities and Challenges in Home Networking"

CV

Geneva, 13 – 14 October 2005



CHRISTELE BOUCHAT
ALCATEL BELL

Session:	**Session 2: Home Network Architecture and Technologies**
Title of Presentation:	Access and Home Network Architectures, and Bridging the Two

Christele Bouchat receives her Master's degree as engineer in Physics, majoring in Optoelectronics from the Polytechnic University of Liege, Belgium. In 1998, she joined the Optical Access Networks group in the Research and Innovation centre of Alcatel Bell, dealing with ATM Passive Optical Network (APON), Fiber-To-The-Home and DWDM in access concepts. She then changed her focus from physical layer to higher layer, working on solutions for bringing Quality of Service (QoS) in the Access and Metro Ethernet network. Today, she is working on home networking, end-user devices and home services management. She is active in standardization and is editor of several working texts of the DSLHome working group of DSLForum.
