

ITU-T Workshop

“Opportunities and Challenges in Home Networking”

CV

Geneva, 13 – 14 October 2005

Roberto POMPONI
TILAB

Session: 6 : Electromagnetic Interference in the Home Environment

Roberto Pomponi, earned a degree in Electrical Engineering from the Polytechnic of Turin (Italy) in 1972 and in the same year he joined TILAB (formerly CSELT, Centro Studi e Laboratori Telecomunicazioni in Turin, Italy).

He has carried out activities on protection of telecommunication installations against lightning, electromagnetic interference and safety.

He has been professor of EMC seminars at the Polytechnic of Turin, University of Ancona and at High School of the Telecom Italia Group.

He joined ITU-T Study Groups 5 and 6 in 1974 as delegate and then Rapporteur in both SGs till 1992. In the current Study Period he has been confirmed as chairman of SG 5.

He is author of more than 40 technical papers and many contributions to the standardization activities.
