Wake-up call.

Climate change is a serious problem. So at the International Telecommunication Union (ITU), we're looking at serious solutions. For instance, by using information and communication technologies (ICTs) to monitor global climate change. Or by working with other industries to reduce greenhouse gas emissions through the innovative use of ICTs. And, of course, by promoting and adopting a carbon neutral approach within our own industry. We've heard the wake-up call. Through leadership and example, ITU is determined to answer it.
