## الاتحاد

www.itu.int/itunews

Communication has always been a human need.

We believe it is also a human right.

As the United Nations specialized agency for telecommunications, the International Telecommunication Union (ITU) is working to bring information and communication technologies to developing nations. ITU advises countries on regulatory strategies, infrastructure applications, investment opportunities and on human capacity building. Drawing on the knowledge of establishing ICT networks in developing countries, we are able to bring the benefits of communications to all people.
